Match	Document	Document Title	Score
1	9553778	***WITHDRAWN PATENT AS PER THE LATEST USPTO WITHDRAWN LIST*** Layered request processing in a content delivery network (CDN) In a content delivery network (CDN a method includes: receiving a request for a CDN service of a particular type, wherein a CDN service of said particular type defines a fixed number of...	1000
2	10114882	Content delivery network analytics management via edge stage collectors Example embodiments herein include a system having one or more edge servers disposed in an edge site of a content delivery network (CDN). The system can include a collector for collecting...	952
3	10122820	***WITHDRAWN PATENT AS PER THE LATEST USPTO WITHDRAWN LIST*** Request-response processing an a content delivery network A computer-implemented method in a content delivery network (CDN) includes, responsive to a request, determining a particular sequencer to handle the request, the particular sequencer includes a...	937
4	8825608	Content delivery network analytics management via edge stage collectors Example embodiments herein include a system having one or more edge servers disposed in an edge site of a content delivery network (CDN). The system can include a collector for collecting...	932
5	9559913	***WITHDRAWN PATENT AS PER THE LATEST USPTO WITHDRAWN LIST*** Configuring a content delivery network (CDN) In a content delivery network (CDN a method includes: receiving a	873

		request for a CDN service of a particular type, wherein a CDN service of said particular type defines a fixed number of...	
6	US20140337472	Beacon Services in a Content Delivery Framework A computer-implemented method, operable with a content delivery network (CDN) comprising multiple CD services including at least one beacon service, includes, at particular CD service in said CDN:...	850
7	US20120215779	ANALYTICS MANAGEMENT Example embodiments herein include a system having one or more edge servers disposed in an edge site of a content delivery network (CDN). The system can include a collector for collecting...	844
8	US20140344399	Origin Server-Side Channel In A Content Delivery Framework A computer-implemented method is operable in a content delivery network (CDN). The method includes, at a content source external to the CDN, wherein the CDN serves content from the content source...	827
9	9456053	Content delivery network A content delivery network (CDN) includes a control core; and a plurality of caches, each of said caches constructed and adapted to: upon joining the CDN, obtain global configuration data from the...	809
10	US20110060812	CACHE SERVER WITH EXTENSIBLE PROGRAMMING FRAMEWORK Embodiments generally disclosed herein include methods, systems and devices for providing an extensible content delivery platform. The methods, systems and devices include identifying a plurality...	806
11	US20150161226	ANALYTICS MANAGEMENT Example embodiments herein include a system having one or more edge servers disposed in an edge site of a content delivery network (CDN). The system can include a collector for collecting...	801
12	9451045	Content delivery network A device is operable in a content delivery network (CDN). The device has a cache server mechanism constructed and adapted to: upon joining the CDN, obtain global configuration data from a control...	800
13	10841177	Content delivery framework having autonomous CDN partitioned into multiple virtual CDNs to implement CDN interconnection, delegation, and federation An autonomous content delivery network (CDN) is partitioned into multiple virtual CDNs which are organized into a CDN hierarchy. Within the CDN hierarchy, a parent virtual CDN grants at least one...	787
14	US20130159472	CONTENT DELIVERY NETWORK A content delivery network (CDN) includes a control core; and a plurality of caches, each of said caches constructed and adapted to: upon joining the CDN, obtain global configuration data from the...	784
15	9749191	Layered request processing with redirection and delegation in a content delivery network (CDN) In a content delivery network (CDN) a method includes: receiving a request for a CDN service of a first type, wherein a CDN service of the first type defines a fixed number of configurable layers...	783

16	US20160173634	CACHING IN A CONTENT DELIVERY FRAMEWORK A computer-implemented method, operable with a content delivery network (CDN) uses late binding of caching policies; by a caching node in the CDN, in response to a request for content, determining...	779
17	9648127	Caching in a content delivery framework A computer-implemented method, operable with a content delivery network (CDN) uses late binding of caching policies; by a caching node in the CDN, in response to a request for content, determining...	777
18	US20130159473	CONTENT DELIVERY NETWORK A device is operable in a content delivery network (CDN). The device has a cache server mechanism constructed and adapted to: upon joining the CDN, obtain global configuration data from a control...	776
19	US20140223017	Content Delivery Framework Having Autonomous CDN Partitioned into Multiple Virtual CDNs to Implement CDN Interconnection, Delegation, and Federation An autonomous content delivery network (CDN) is partitioned into multiple virtual CDNs which are organized into a CDN hierarchy. Within the CDN hierarchy, a parent virtual CDN grants at least one...	776
20	9628347	Layered request processing in a content delivery network (CDN) In a content delivery network (CDN a method includes: receiving a request for a CDN service of a particular type, wherein a CDN service of said particular type defines a fixed number of...	771
21	US20140173053	LAYERED REQUEST PROCESSING IN A CONTENT DELIVERY NETWORK (CDN) In a content delivery network (CDN a method includes: receiving a request for a CDN service of a particular type, wherein a CDN service of said particular type defines a fixed number of...	769
22	US20140173054	LAYERED REQUEST PROCESSING WITH REDIRECTION AND DELEGATION IN A CONTENT DELIVERY NETWORK (CDN) In a content delivery network (CDN a method includes: receiving a request for a CDN service of a particular type, wherein a CDN service of said particular type defines a fixed number of...	764
23	9544345	***WITHDRAWN PATENT AS PER THE LATEST USPTO WITHDRAWN LIST*** Framework supporting content delivery with delivery services network A framework supporting content delivery includes a plurality of devices, each device configured to run at least one content delivery (CD) service of a plurality of CD services. The plurality of CD...	747
24	10142191	Content delivery framework with autonomous CDN partitioned into multiple virtual CDNs A content delivery network (CDN) includes a single autonomous CDN partitioned into multiple virtual CDNs, the multiple virtual CDNs being organized into a CDN hierarchy. Each virtual CDN is...	747
25	9516136	Customer-specific request-response processing in a content delivery network A computer-implemented method in a content delivery network (CDN)	741

		includes, at a mechanism in said CDN: responsive to a request, determining a particular sequencer to handle the request, the...	
26	9590871	***WITHDRAWN PATENT AS PER THE LATEST USPTO WITHDRAWN LIST*** Layered request processing in a content delivery network (CDN) In a content delivery network (CDN a method includes: receiving a request for a CDN service of a particular type, wherein a CDN service of said particular type defines a fixed number of...	739
27	9559912	***WITHDRAWN PATENT AS PER THE LATEST USPTO WITHDRAWN LIST*** Framework supporting content delivery with rendezvous services network A framework supporting content delivery includes a plurality of devices, each device configured to run at least one content delivery (CD) service of a plurality of CD services. The plurality of CD...	717
28	US20140372589	Customer-Specific Request-Response Processing in a Content Delivery Network A computer-implemented method in a content delivery network (CDN) includes, at a mechanism in said CDN: responsive to a request, determining a particular sequencer to handle the request, the...	713
29	9590868	***WITHDRAWN PATENT AS PER THE LATEST USPTO WITHDRAWN LIST*** Framework supporting content delivery with hybrid content delivery services A framework supporting content delivery includes a plurality of devices, each device configured to run at least one content delivery (CD) service of a plurality of CD services. The plurality of CD...	708
30	9590867	***WITHDRAWN PATENT AS PER THE LATEST USPTO WITHDRAWN LIST*** Framework supporting content delivery with collector services network A framework supporting content delivery includes a plurality of devices, each device configured to run at least one content delivery (CD) service of a plurality of CD services. The plurality of CD...	703
31	9544200	***WITHDRAWN PATENT AS PER THE LATEST USPTO WITHDRAWN LIST*** Framework supporting content delivery with collector services network A framework supporting content delivery includes a plurality of devices, each device configured to run at least one content delivery (CD) service of a plurality of CD services. The plurality of CD...	703
32	9544199	***WITHDRAWN PATENT AS PER THE LATEST USPTO WITHDRAWN LIST*** Framework supporting content delivery with reducer services network A framework includes a plurality of devices, each device configured to run at least one content delivery (CD) service of a plurality of CD services. The plurality of CD services include reducer...	700
33	9590866	***WITHDRAWN PATENT AS PER THE LATEST USPTO WITHDRAWN LIST***	700

		Framework supporting content delivery with reducer services network A framework includes a plurality of devices, each device configured to run at least one content delivery (CD) service of a plurality of CD services. The plurality of CD services include reducer...	
34	10187491	Request-response processing an a content delivery network A computer-implemented method in a content delivery network (CDN) includes, responsive to a request, determining a particular sequencer to handle the request, the particular sequencer includes a...	698
35	US20140222946	SELECTIVE WARM UP AND WIND DOWN STRATEGIES IN A CONTENT DELIVERY FRAMEWORK Services in a content delivery framework include selective warm-up and wind-down strategies. The warm up strategies include (i) obtaining and preloading a global configuration object; (ii)...	696
36	9590870	***WITHDRAWN PATENT AS PER THE LATEST USPTO WITHDRAWN LIST*** Devices and methods supporting content delivery with reducer services A device supporting content delivery is configured to run at least one content delivery (CD) service of a plurality of CD services. The plurality of CD services include reducer services.	689
37	9584376	***WITHDRAWN PATENT AS PER THE LATEST USPTO WITHDRAWN LIST*** Framework supporting content delivery with content delivery services A framework supporting content delivery includes a plurality of devices, each device configured to run at least one content delivery (CD) service of a plurality of CD services. The plurality of CD...	689
38	9553779	***WITHDRAWN PATENT AS PER THE LATEST USPTO WITHDRAWN LIST*** Framework supporting content delivery with content delivery services A framework supporting content delivery includes a plurality of devices, each device configured to run at least one content delivery (CD) service of a plurality of CD services. The plurality of CD...	689
39	7860964	Policy-based content delivery network selection In a framework wherein resources of a content provider may be delivered to clients from different domains, a method distributes the requests based on content-provider policies. In some cases, the...	684
40	US20140223018	Content Delivery Framework With Autonomous CDN Partitioned into Multiple Virtual CDNs A content delivery network (CDN) includes a single autonomous CDN partitioned into multiple virtual CDNs, the multiple virtual CDNs being organized into a CDN hierarchy. Each virtual CDN is...	669
41	US20140372588	Request-Response Processing in a Content Delivery Network A computer-implemented method in a content delivery network (CDN) includes, responsive to a request, determining a particular sequencer to handle the request, the particular sequencer includes a...	668
42	US20080215735	Resource invalidation in a content delivery network A repeater server in a content delivery network (CDN) maintains a list of	665

		resources that are no longer valid. When the server gets a request for a resource, it checks whether that resource is on...	
43	9548902	***WITHDRAWN PATENT AS PER THE LATEST USPTO WITHDRAWN LIST*** Devices and methods supporting content delivery with delivery services having dynamically configurable log information A device supporting content delivery is configured to run at least one content delivery (CD) service of a plurality of CD services. The plurality of CD services include delivery services with...	653
44	US20080104268	Controlling Subscriber information rates in a content delivery network A plurality of content providers provide multiple resources to multiple clients. At least some of the resources are to be served to clients from a shared content delivery network (CDN) formed by a...	650
45	US20080215750	Controlling subscriber information rates in a content delivery network A plurality of content providers provide multiple resources to multiple clients. At least some of said resources are to be served to clients from a shared content delivery network (CDN) formed by...	648
46	7945693	Controlling subscriber information rates in a content delivery network A plurality of content providers provide multiple resources to multiple clients. At least some of the resources are to be served to clients from a shared content delivery network (CDN) formed by a...	646
47	9647901	Configuring a content delivery network (CDN) In a content delivery network (CDN a method includes: receiving a request for a CDN service of a particular type, wherein a CDN service of said particular type defines a fixed number of...	645
48	9641402	Configuring a content delivery network (CDN) In a content delivery network (CDN a method includes: receiving a request for a CDN service of a particular type, wherein a CDN service of said particular type defines a fixed number of...	645
49	8060613	Resource invalidation in a content delivery network A repeater server in a content delivery network (CDN) maintains a list of resources that are no longer valid. When the server gets a request for a resource, it checks whether that resource is on...	643
50	US20140173066	CONFIGURING A CONTENT DELIVERY NETWORK (CDN) In a content delivery network (CDN a method includes: receiving a request for a CDN service of a particular type, wherein a CDN service of said particular type defines a fixed number of...	635
