Match	Document	Document Title	Score
1	7603439	System for tiered distribution in a content delivery network A tiered distribution service is provided in a content delivery network (CDN) having a set of surrogate origin (namely, "edge") servers organized into regions and that provide content delivery on...	1000
2	US20080222281	Method and system for tiered distribution in a content delivery network A tiered distribution service is provided in a content delivery network (CDN) having a set of surrogate origin (namely, "edge") servers organized into regions and that provide content delivery on...	952
3	7376716	Method and system for tiered distribution in a content delivery network A tiered distribution service is provided in a content delivery network (CDN) having a set of surrogate origin (namely, "edge") servers organized into regions and that provide content delivery on...	941
4	US20130159472	CONTENT DELIVERY NETWORK A content delivery network (CDN) includes a control core; and a plurality of caches, each of said caches constructed and adapted to: upon joining the CDN, obtain global configuration data from the...	925
5	US20160173634	CACHING IN A CONTENT DELIVERY FRAMEWORK A computer-implemented method, operable with a content delivery network (CDN) uses late binding of caching policies; by a caching node in the CDN, in response to a request for content, determining...	916
6	US20130159473	CONTENT DELIVERY NETWORK A device is operable in a content delivery network (CDN). The device has a cache server mechanism constructed and adapted to: upon joining the CDN, obtain global configuration data from a control...	912
7	US20100023693	Method and system for tiered distribution in a content delivery network A tiered distribution service is provided in a content delivery network	900

		(CDN) having a set of surrogate origin (namely, "edge") servers organized into regions and that provide content delivery on...	
8	US20140173053	LAYERED REQUEST PROCESSING IN A CONTENT DELIVERY NETWORK (CDN) In a content delivery network (CDN a method includes: receiving a request for a CDN service of a particular type, wherein a CDN service of said particular type defines a fixed number of...	899
9	US20140173054	LAYERED REQUEST PROCESSING WITH REDIRECTION AND DELEGATION IN A CONTENT DELIVERY NETWORK (CDN) In a content delivery network (CDN a method includes: receiving a request for a CDN service of a particular type, wherein a CDN service of said particular type defines a fixed number of...	889
10	US20140372589	Customer-Specific Request-Response Processing in a Content Delivery Network A computer-implemented method in a content delivery network (CDN) includes, at a mechanism in said CDN: responsive to a request, determining a particular sequencer to handle the request, the...	800
11	US20030233423	Method and system for tiered distribution in a content delivery network A tiered distribution service is provided in a content delivery network (CDN) having a set of surrogate origin (namely, "edge") servers organized into regions and that provide content delivery on...	765
12	7860964	Policy-based content delivery network selection In a framework wherein resources of a content provider may be delivered to clients from different domains, a method distributes the requests based on content-provider policies. In some cases, the...	750
13	US20070055764	Method and system for tiered distribution in a content delivery network A tiered distribution service is provided in a content delivery network (CDN) having a set of surrogate origin (namely, "edge") servers organized into regions and that provide content delivery on...	747
14	US20030154239	Java application framework for use in a content delivery network (CDN) An application deployment model for enterprise applications to enable such applications to be deployed to and executed from a globally distributed computing platform, such as an Internet content...	734
15	7133905	Method and system for tiered distribution in a content delivery network A tiered distribution service is provided in a content delivery network (CDN) having a set of surrogate origin (namely, "edge") servers organized into regions and that provide content delivery on...	729
16	US20150012661	Media Processing in a Content Delivery Network An intermediary node, such as an edge node, in a content delivery network (CDN) intercepts a media transmission en-route to a client device. The media transmission and a client profile are...	724
17	US20140372588	Request-Response Processing in a Content Delivery Network A computer-implemented method in a content delivery network (CDN) includes, responsive to a request, determining a particular sequencer to handle the request, the particular sequencer includes a...	721

18	US20080215735	Resource invalidation in a content delivery network A repeater server in a content delivery network (CDN) maintains a list of resources that are no longer valid. When the server gets a request for a resource, it checks whether that resource is on...	717
19	US20080104268	Controlling Subscriber information rates in a content delivery network A plurality of content providers provide multiple resources to multiple clients. At least some of the resources are to be served to clients from a shared content delivery network (CDN) formed by a...	691
20	US20080215750	Controlling subscriber information rates in a content delivery network A plurality of content providers provide multiple resources to multiple clients. At least some of said resources are to be served to clients from a shared content delivery network (CDN) formed by...	687
21	7945693	Controlling subscriber information rates in a content delivery network A plurality of content providers provide multiple resources to multiple clients. At least some of the resources are to be served to clients from a shared content delivery network (CDN) formed by a...	684
22	8060613	Resource invalidation in a content delivery network A repeater server in a content delivery network (CDN) maintains a list of resources that are no longer valid. When the server gets a request for a resource, it checks whether that resource is on...	678
23	US20140108474	System and Method for Exposing Cloud Stored Data to a Content Delivery Network A system for exposing data stored in a cloud computing system to a content delivery network provider includes a database configured to receive and store metadata about the data, the database being...	663
24	US20150172149	SHARED DELIVERY USING A TERMINAL-NETWORK CACHE IN COOPERATIVE DELIVERY SYSTEMS Systems and methods for delivering a content object from a cache in a terminal network are disclosed. An edge server in a content delivery network provides a duration for a terminal network to...	648
25	US20130041972	Content Delivery Network Routing Using Border Gateway Protocol An announcement protocol may allow disparate, and previously incompatible, content delivery network caches to exchange information and cache content for one another. Announcement data may be...	632
26	7949779	Controlling subscriber information rates in a content delivery network A plurality of content providers provide multiple resources to multiple clients. At least some of said resources are to be served to clients from a shared content delivery network (CDN) formed by...	631
27	US20110196943	Optimal route selection in a content delivery network A routing mechanism, service or system operable in a distributed networking environment. One preferred environment is a content delivery network (CDN) wherein the present invention provides...	615
28	US20140172970	REQUEST PROCESSING IN A CONTENT DELIVERY NETWORK A content delivery framework (CDF) includes a plurality of devices, each device configured to run at least one content delivery (CD) service of a plurality of CD services. The plurality of CD...	599

29	US20140337461	COLLECTOR MECHANISMS IN A CONTENT DELIVERY NETWORK A computer-implemented method operable in a content delivery service (CDN), includes, by a collector system: receiving multiple event streams of event data, said multiple event streams comprising...	590
30	8769047	Delivery control for cooperative delivery systems Systems and methods for content delivery control in a cooperative delivery system are disclosed. A rules repository stores control parameters. A content delivery network is configured to receive a...	586
31	8046432	Network caching for multiple contemporaneous requests A live caching system is described herein that reduces the burden on origin servers for serving live content. In response to receiving a first request that results in a cache miss, the system...	583
32	US20140337472	Beacon Services in a Content Delivery Framework A computer-implemented method, operable with a content delivery network (CDN) comprising multiple CD services including at least one beacon service, includes, at particular CD service in said CDN:...	579
33	US20080086523	Method of data collection in a distributed network A content delivery network (CDN) service provider extends a content delivery network to gather information on atomically identifiable web clients (called "user agents") as such...	569
34	US20140344413	COLLECTOR MECHANISMS IN A CONTENT DELIVERY NETWORK A computer-implemented method operable in a content delivery service (CDN), includes, by a collector system: (A) receiving at least one event stream of event data, said event data relating to...	568
35	8645517	Policy-based content delivery network selection In a framework wherein resources of a content provider may be delivered to clients from different domains, a method distributes the requests based on content-provider policies. In some cases, the...	556
36	8291046	Shared content delivery infrastructure with rendezvous based on load balancing and network conditions A method of processing requests for resources in a system in which a plurality of content providers provide multiple resources. Content providers offload the serving of some of their resources to...	556
37	8572210	Shared content delivery infrastructure and method of generating a web page A first URL in a first document is modified to produce a first modified URL, that includes a first modified hostname resolvable to a shared content delivery network (CDN) formed by a plurality of...	552
38	US20140344399	Origin Server-Side Channel In A Content Delivery Framework A computer-implemented method is operable in a content delivery network (CDN). The method includes, at a content source external to the CDN, wherein the CDN serves content from the content source...	538
39	US20080086524	Method and system for identifying valid users operating across a distributed network A content delivery network (CDN) service provider extends a content	524

		delivery network to gather information on atomically identifiable web clients (called "user agents") as such...	
40	US20080140800	Shared content delivery infrastructure & method of generating a web page A first URL in a first document is modified to produce a first modified URL, that includes a first modified hostname resolvable to a shared content delivery network (CDN) formed by a plurality of...	510
41	8484283	Method and system for mitigating automated agents operating across a distributed network A content delivery network (CDN) service provider extends a content delivery network to gather information on atomically identifiable web clients (called "user agents") as such...	507
42	US20070233884	Shared content delivery infrastructure A method of processing requests for resources in a system in which a plurality of content providers provide multiple resources. Content providers offload the serving of some of their resources to...	505
43	US20110060812	CACHE SERVER WITH EXTENSIBLE PROGRAMMING FRAMEWORK Embodiments generally disclosed herein include methods, systems and devices for providing an extensible content delivery platform. The methods, systems and devices include identifying a plurality...	500
44	8281035	Optimized network resource location A method for delivering resources in a distributed computing environment, wherein at least a first resource and a second resource are associated with a content provider, and wherein the first...	498
45	8572208	Shared content delivery infrastructure A method of processing requests for resources in a system in which a plurality of content providers provide multiple resources. Content providers offload the serving of some of their resources to...	497
46	US20120246273	Optimal route selection in a content delivery network A routing mechanism operable in a distributed networking environment, such as a content delivery network (CDN), provides improved connectivity back to an origin server, especially for HTTP...	497
47	US20100268789	NETWORK CACHING FOR MULTIPLE CONTEMPORANEOUS REQUESTS A live caching system is described herein that reduces the burden on origin servers for serving live content. In response to receiving a first request that results in a cache miss, the system...	495
48	US20140115090	METHODS AND APPARATUS FOR CONTENT CACHING IN A VIDEO NETWORK Methods and apparatus for selectively caching (and de-caching) video content in network so as to reduce content transformation requirements and also cache storage requirements. In one embodiment...	487
49	US20080215755	Delivering resources to clients in a distributed computing environment with rendezvous based on load balancing and network conditions A plurality of repeater servers form a shared content delivery network	478

		(CDN) to serve resources to clients on behalf of a plurality of content providers. First and second resources are associated...	
50	8255489	Method of data collection among participating content providers in a distributed network A content delivery network (CDN) service provider extends a content delivery network to gather information on atomically identifiable web clients (called "user agents") as such...	466
