Match	Document	Document Title	Score
1	US20140337472	Beacon Services in a Content Delivery Framework A computer-implemented method, operable with a content delivery network (CDN) comprising multiple CD services including at least one beacon service, includes, at particular CD service in said CDN:...	1000
2	US20140344399	Origin Server-Side Channel In A Content Delivery Framework A computer-implemented method is operable in a content delivery network (CDN). The method includes, at a content source external to the CDN, wherein the CDN serves content from the content source...	973
3	US20110060812	CACHE SERVER WITH EXTENSIBLE PROGRAMMING FRAMEWORK Embodiments generally disclosed herein include methods, systems and devices for providing an extensible content delivery platform. The methods, systems and devices include identifying a plurality...	947
4	US20130159472	CONTENT DELIVERY NETWORK A content delivery network (CDN) includes a control core; and a plurality of caches, each of said caches constructed and adapted to: upon joining the CDN, obtain global configuration data from the...	922
5	US20160173634	CACHING IN A CONTENT DELIVERY FRAMEWORK A computer-implemented method, operable with a content delivery network (CDN) uses late binding of caching policies; by a caching node in the CDN, in response to a request for content, determining...	916
6	US20130159473	CONTENT DELIVERY NETWORK A device is operable in a content delivery network (CDN). The device has a cache server mechanism constructed and adapted to: upon joining the CDN, obtain global configuration data from a control...	913
7	US20140173053	LAYERED REQUEST PROCESSING IN A CONTENT DELIVERY NETWORK (CDN)	905

		In a content delivery network (CDN a method includes: receiving a request for a CDN service of a particular type, wherein a CDN service of said particular type defines a fixed number of...	
8	US20140173054	LAYERED REQUEST PROCESSING WITH REDIRECTION AND DELEGATION IN A CONTENT DELIVERY NETWORK (CDN) In a content delivery network (CDN a method includes: receiving a request for a CDN service of a particular type, wherein a CDN service of said particular type defines a fixed number of...	898
9	US20140372589	Customer-Specific Request-Response Processing in a Content Delivery Network A computer-implemented method in a content delivery network (CDN) includes, at a mechanism in said CDN: responsive to a request, determining a particular sequencer to handle the request, the...	839
10	US20140222946	SELECTIVE WARM UP AND WIND DOWN STRATEGIES IN A CONTENT DELIVERY FRAMEWORK Services in a content delivery framework include selective warm-up and wind-down strategies. The warm up strategies include (i) obtaining and preloading a global configuration object; (ii)...	818
11	7860964	Policy-based content delivery network selection In a framework wherein resources of a content provider may be delivered to clients from different domains, a method distributes the requests based on content-provider policies. In some cases, the...	805
12	US20140372588	Request-Response Processing in a Content Delivery Network A computer-implemented method in a content delivery network (CDN) includes, responsive to a request, determining a particular sequencer to handle the request, the particular sequencer includes a...	786
13	US20080215735	Resource invalidation in a content delivery network A repeater server in a content delivery network (CDN) maintains a list of resources that are no longer valid. When the server gets a request for a resource, it checks whether that resource is on...	784
14	US20080104268	Controlling Subscriber information rates in a content delivery network A plurality of content providers provide multiple resources to multiple clients. At least some of the resources are to be served to clients from a shared content delivery network (CDN) formed by a...	766
15	US20080215750	Controlling subscriber information rates in a content delivery network A plurality of content providers provide multiple resources to multiple clients. At least some of said resources are to be served to clients from a shared content delivery network (CDN) formed by...	763
16	7945693	Controlling subscriber information rates in a content delivery network A plurality of content providers provide multiple resources to multiple clients. At least some of the resources are to be served to clients from a shared content delivery network (CDN) formed by a...	762
17	8060613	Resource invalidation in a content delivery network A repeater server in a content delivery network (CDN) maintains a list of resources that are no longer valid. When the server gets a request for a resource, it checks whether that resource is on...	758

18	US20140222984	RENDEZVOUS OPTIMIZATION IN A CONTENT DELIVERY FRAMEWORK In a system with multiple service endpoints, receiving a first request including a resolver IP address, the first request being associated with a client; responding to the first request with a...	731
19	7949779	Controlling subscriber information rates in a content delivery network A plurality of content providers provide multiple resources to multiple clients. At least some of said resources are to be served to clients from a shared content delivery network (CDN) formed by...	727
20	8301774	***WITHDRAWN PATENT AS PER THE LATEST USPTO WITHDRAWN LIST*** Delivering resources to clients in a distributed computing environment A method for delivering resources to clients in a distributed computing environment. At least a first resource associated with a first content provider and maintained on an origin server...	707
21	US20140172970	REQUEST PROCESSING IN A CONTENT DELIVERY NETWORK A content delivery framework (CDF) includes a plurality of devices, each device configured to run at least one content delivery (CD) service of a plurality of CD services. The plurality of CD...	705
22	US20140337461	COLLECTOR MECHANISMS IN A CONTENT DELIVERY NETWORK A computer-implemented method operable in a content delivery service (CDN), includes, by a collector system: receiving multiple event streams of event data, said multiple event streams comprising...	699
23	US20140344413	COLLECTOR MECHANISMS IN A CONTENT DELIVERY NETWORK A computer-implemented method operable in a content delivery service (CDN), includes, by a collector system: (A) receiving at least one event stream of event data, said event data relating to...	685
24	8645517	Policy-based content delivery network selection In a framework wherein resources of a content provider may be delivered to clients from different domains, a method distributes the requests based on content-provider policies. In some cases, the...	677
25	8291046	Shared content delivery infrastructure with rendezvous based on load balancing and network conditions A method of processing requests for resources in a system in which a plurality of content providers provide multiple resources. Content providers offload the serving of some of their resources to...	676
26	8572210	Shared content delivery infrastructure and method of generating a web page A first URL in a first document is modified to produce a first modified URL, that includes a first modified hostname resolvable to a shared content delivery network (CDN) formed by a plurality of...	674
27	US20080140800	Shared content delivery infrastructure & method of generating a web page A first URL in a first document is modified to produce a first modified URL, that includes a first modified hostname resolvable to a shared content delivery network (CDN) formed by a plurality of...	646

28	US20070233884	Shared content delivery infrastructure A method of processing requests for resources in a system in which a plurality of content providers provide multiple resources. Content providers offload the serving of some of their resources to...	643
29	8281035	Optimized network resource location A method for delivering resources in a distributed computing environment, wherein at least a first resource and a second resource are associated with a content provider, and wherein the first...	638
30	8572208	Shared content delivery infrastructure A method of processing requests for resources in a system in which a plurality of content providers provide multiple resources. Content providers offload the serving of some of their resources to...	637
31	US20080215755	Delivering resources to clients in a distributed computing environment with rendezvous based on load balancing and network conditions A plurality of repeater servers form a shared content delivery network (CDN) to serve resources to clients on behalf of a plurality of content providers. First and second resources are associated...	625
32	US20140344425	Content Delivery Framework having Fill Services A framework supporting content delivery and comprising a plurality of devices, each device configured to run at least one content delivery (CD) service of a plurality of CD services, wherein the...	591
33	US20140173132	Responsibility-based Cache Peering A computer-implemented method, operable in a network comprising multiple delivery service endpoints running on a plurality of devices. Each delivery service endpoint delivers resources. A...	578
34	US20140173135	RENDEZVOUS SYSTEMS, METHODS, AND DEVICES A method includes maintaining first and second mapping data. The first mapping data is from canonical names (CNAMEs) to binding names (BNAMEs), and the second mapping data is from BNAMEs to...	573
35	8296396	Delivering resources to clients in a distributed computing environment with rendezvous based on load balancing and network conditions A plurality of repeater servers form a shared content delivery network (CDN) to serve resources to clients on behalf of a plurality of content providers. First and second resources are associated...	572
36	9021112	Content request routing and load balancing for content distribution networks A content distribution mechanism that distributes content of a content provider at various sites across a network and selects the site that is nearest a content requestor using an anycast address...	562
37	US20140173042	Framework Supporting Content Delivery With Delivery Services Network A framework supporting content delivery includes a plurality of devices, each device configured to run at least one content delivery (CD) service of a plurality of CD services. The plurality of CD...	561
38	US20140173052	EVENT STREAM COLLECTOR SYSTEMS, METHODS, AND DEVICES A computer-implemented method includes, by a particular service:	557

		receiving at least one event stream of event data, the event data relating to operation of at least one type of service, each event...	
39	US20140344391	Content Delivery Framework having Storage Services A framework supporting content delivery and comprising a plurality of devices, each device configured to run at least one content delivery (CD) service of a plurality of CD services, wherein the...	532
40	US20140344401	Content Delivery Framework having Origin Services A framework supporting content delivery and comprising a plurality of devices, each device configured to run at least one content delivery (CD) service of a plurality of CD services, wherein the...	521
41	US20140173041	Framework Supporting Content Delivery With Rendezvous Services Network A framework supporting content delivery includes a plurality of devices, each device configured to run at least one content delivery (CD) service of a plurality of CD services. The plurality of CD...	515
42	7822871	Configurable adaptive global traffic control and management A framework for delivery of Internet content includes a subscriber server network; and at least one domain name server constructed and adapted to provide policy-based domain name service, wherein,...	512
43	US20140173040	Framework Supporting Content Delivery With Collector Services Network A framework supporting content delivery includes a plurality of devices, each device configured to run at least one content delivery (CD) service of a plurality of CD services. The plurality of CD...	509
44	US20140172956	FRAMEWORK SUPPORTING CONTENT DELIVERY WITH CONTENT DELIVERY SERVICES A framework supporting content delivery includes a plurality of devices, each device configured to run at least one content delivery (CD) service of a plurality of CD services. The plurality of CD...	508
45	US20140173039	Framework Supporting Content Delivery With Reducer Services Network A framework includes a plurality of devices, each device configured to run at least one content delivery (CD) service of a plurality of CD services. The plurality of CD services include reducer...	506
46	US20140172951	Framework Supporting Content Delivery With Hybrid Content Delivery Services A framework supporting content delivery includes a plurality of devices, each device configured to run at least one content delivery (CD) service of a plurality of CD services. The plurality of CD...	504
47	US20140173131	RESPONSIBILITY-BASED REQUEST PROCESSING A method is operable in a network comprising multiple service endpoints, the service endpoints running on a plurality of devices, wherein the multiple service endpoints form one or more...	501
48	US20110219120	Transparent Redirection Of Resource Requests A plurality of repeater servers form a shared content delivery network	500

		(CDN) to serve resources to clients on behalf of a plurality of content providers. First and second resources are associated...	
49	US20140172944	INVALIDATION SYSTEMS, METHODS, AND DEVICES A computer-implemented method includes receiving, at a service running on the hardware, invalidation information relating to one or more resources; and determining whether the invalidation...	494
50	8478903	Shared content delivery infrastructure A system in which a plurality of content providers provide multiple resources to multiple clients, wherein each content provider provides at least some resources via one or more content sources...	494
