Service Provider /

Cisco Build America, Buy America (BABA) Certification for US BEAD Program

Cisco provides a vast array of broadband solutions to help service providers build their networks under the National Telecommunications and Information Administration's (NTIA) Broadband Equity, Access, and Deployment (BEAD) Program.

The Department of Commerce issued a limited, general applicability, nonavailability waiver of the BABA preference requirements for the BEAD Program for certain construction materials and certain manufactured products. To ensure conformity with the waiver, the NTIA has created a self-certification and compliance framework for manufacturers.

Cisco certifies the products listed below meet the domestic manufacturing requirements outlined in the BABA waiver requirements for the BEAD Program. [Explore resources](#) on Cisco's comprehensive support for the BEAD Program.

Cisco also offers products that are exempt from domestic manufacturing requirements specified in the BABA waiver issued by the Department of Commerce. [Learn more](#) about Cisco Broadband.

Product Name	Product Identifier	Product Description	Manufacturing Location
XGS-PON OLT SFP	SFP-10G-OLT20I-US	XGS PON OLT pluggable; DML, I-temp, 20km reach	Carrollton, TX

Contact us to request Cisco's BABA certification letter required for BEAD compliance.
