Subject: RE: request for new edrawing sketches if available
Attachments: ro convert to edrawings.zip

Dear Kieth,

Thanks a lot we are doing fine, working on a many of different projects.

The drawings we need would be an extension of our patent 7,942,903. We need;

- 1) In the solidworks labeled C10 and C11 they are the same device. We need it in edrawings
- 2) In the PDF 110503 please put the sketches from pages 6 through 10 into edrawings. The first drawing we don't need since it is the same as the patent
- 3) If you could do you think you can add a few mechanical descriptions of the primary device from the expandable box ; description c10,c11. And we would also like the description to encapsulate the expandable box part of 7,942,903. So it would be convergent descriptions .You would not have to be too specific we would like a technical description it could be in bullet form .like 1,2,3, ... A device that...
This one you don't have to do if you think you can't, or you think it would take too much time.

Please let me know if you could do these 6 edrawings, and how much you would want for it.

Thanks,

Andy

Hi Andy,

I'm good, thanks. How have your projects been working out? Sure, I can help out. Sounds quick. Send the details and I'll get started.

Best,
Keith

Dear Kieth,

How are you? I have a small job request. We have some diagrams pictures we need in edrawings.

we dont need any dimensions or tolerances since we have no intention of prototyping them just in edrawings.

It should take a few hours.

let me know,

Andy
