Report: Google shifting Nest, other hardware manufacturing out of China

Abner Li | Jun 11 2019 - 9:30 pm PT | 0 Comments

Google is taking proactive measures to counter the possible effects of the [U.S. trade war](#) with China. A report today revealed that Google is shifting Nest and server hardware manufacturing meant for the United States out of China into Taiwan.

According to [Bloomberg](#), Google has “already shifted much of its production of U.S.-bound motherboards to Taiwan.” These components are crucial to powering data centers around the world, with Google taking a more proactive approach than its competitors in light of tariffs and “an increasingly hostile government in Beijing.”

While the likes of Amazon (AWS), Microsoft (Azure), and Facebook purchase complete server racks, Google only procures individual components for later assembly. Those motherboards — categorized as “printed circuit board assembly” — are subject to 25% tariffs when imported into the U.S., while server racks are not.

30-DAY
TAI CHI PLAN
FOR BEGINNERS

DAY 1

- 18 Walking Lunge
- 20 Close-Grip Curl
- 20 Dumbbell Squat
- 10 Jump Squat
- 13 Reverse Curl

DAY 2

- 28 Overhead Press
- 15 Push-Ups

Anti-Aging Center

Bloomberg also noted a Google shift of Nest manufacturing from China to Taiwan and Malaysia. The report only specifies thermostats for the U.S. market, with the lineup now consisting of Assistant Smart Displays and soon speakers, as well as security cameras and other smart home devices.

Of course, compared to Apple, Google produces hardware at a much smaller scale, with other Made by Google products like the Pixel 3, Nest Hub, and upcoming Nest Hub Max still manufactured in China.

Pixel 3

Pixel 3a

Google, especially following the acquisition of HTC's smartphone division, has a sizable presence in Taiwan. In 2017, Google announced the \$1.1 billion deal to take on 2,000 HTC employees already working on the Pixel. That HTC team is responsible for the Pixel 3a and Pixel 3a XL.

Meanwhile, Google in March announced that it was **expanding its Taiwan presence** with a new campus and hires. It will allow Google to double the size of teams working on hardware and software. *Bloomberg* notes that the shift is a boon to Taiwan's manufacturing industry.

This is a great opportunity to bring teams together and provide room for continued growth. The new space will allow us to more than double the size of our team here in the coming years, helping us continue to work on offering the best Google experiences via our hardware and software to people all around the world.

Google Home

Please review the product information, regulatory information, health and safety information and instructions available at support.google.com/googlehome before using your device. The limited warranty and additional support resources are also available there.

Electric Shock and Heat: Do not expose Google Home or the power supply to water or extreme conditions. Take care when handling the power supply to avoid electric shock. To provide power to your Google Home, only use the power supply provided with your Google Home. Do not use the power supply provided with your Google Home to power any devices other than your Google Home. If you wish to plug your Google Home into a wall socket, you will need to install your Google Home near a wall socket that is easily accessible. Your Google Home may get hot to the touch; this is normal. Unplug your Google Home's power supply and let it cool before handling.

Pacemakers and Other Implanted Devices: Google Home contains magnets and components that emit an electromagnetic field and could interfere with pacemakers or other electronic medical devices. Before using your Google Home, consult your physician or medical device manufacturer about the required minimum safe distance between Google Home and your medical device.

Device with Magnet: Avoid placing any media that contains magnets or is sensitive to magnetism, such as credit cards, bank cards, audio/video, tapes, or magnetic memory devices, near this product. Media containing information sensitive to magnets should be kept at least 5 cm (2 inches) away from the product. For example, if you carry your wallet or billfold containing magnetic cards next to this product, information stored on those cards could be destroyed. Similarly, magnet-sensitive devices, such as a mechanical watch or measuring device, can be damaged if they come too close to this product.

FCC Compliance Statement:

NOTE ON INTERFERENCE IN A RESIDENTIAL INSTALLATION

This device has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. Google Home generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If Google Home does cause harmful interference to radio or television reception, which can be determined by plugging in, then unplugging, Google Home, the user is encouraged to try to correct the interference by reorienting or relocating the receiving antenna and/or consulting the dealer or an experienced radio/TV technician for help.

Google Home complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) the device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate Google Home or warranty.

Model: HOME

FCC ID: A4RHOME -- your Google Home's FCC ID is printed on its bottom.

To satisfy FCC exposure requirements, a separation distance of at least 20 cm should be maintained between the antenna of this device and persons during device operation. Operations at closer than this distance are not recommended.

The antenna used for this transmitter must not be co-located in conjunction with any other antenna or transmitter.

The Micro-USB port in the back of the device is a service-only port.

Safety warnings

WARNING: HEALTH AND SAFETY INFORMATION; READ BEFORE USE TO

REDUCE THE RISK OF PERSONAL INJURY, DISCOMFORT, PROPERTY DAMAGE, INCLUDING DAMAGE TO YOUR DEVICE, AND OTHER POTENTIAL HAZARDS

To avoid damaging your device, accessories or any connected devices, and to reduce the risk of personal injury, discomfort, property damage or other potential hazards, follow the precautions below before using your Nest Mini.

Handling

Handle your Nest Mini with care. You may damage the device if you disassemble, drop, bend, burn, crush or puncture it. Do not use a Nest Mini with a damaged enclosure. Using a damaged product may cause injury. Do not expose your Nest Mini to liquids, which can cause a short circuit and overheating. If your Nest Mini gets wet, do not attempt to dry it using an external heat source. Nest Mini is designed to operate in a dry, indoor environment.

Your Nest Mini is designed to work in ambient temperatures between 32° to 95° F (0° and 35° C), and should be stored between ambient temperatures of -4° and 140° F (-20° and 60° C). Do not leave your Nest Mini in places where the temperature may exceed 140° F (60° C), such as on a car dashboard or near a heating vent as this may damage the product or pose a potential risk of fire. Keep your product away from heat sources and out of direct sunlight. If your device becomes

too hot, disconnect it from its power source if it is plugged in, move it to a cooler place, and do not use it until it has cooled. Your Nest Mini is designed to work at an altitude of up to 6,560 ft (2,000 m).

Repair & service

Do not attempt to repair your Nest Mini yourself. Disassembling the device may cause injury to you or damage your device.

Unauthorized repairs or modifications could result in permanent damage to the device and may affect your warranty coverage and regulatory authorizations.

Contact customer service and do not use your device if it isn't working properly or has been damaged. For online help and support, visit <https://g.co/nest/help>. To reach an expert, visit <https://g.co/nest/contact>.

Powering your device

Be sure the power adapter and Nest Mini are well ventilated when in use. Using a damaged cable or power adapter can cause fire, electric shock, injury, or damage to your Nest Mini or other property. When powering the product, make sure the power adapter is plugged into a socket near the product and is easily accessible. Avoid powering the device in direct sunlight. This device is intended for use with a certified Limited Power Source (LPS) per IEC 60950-1 and/or classified PS2 per IEC 62368-1 rated: 14 Volts DC, maximum 1.1Amp.

Only power your Nest Mini with the included power adapter and cable. Failure to do so can cause fire, electric shock, injury, or damage to the device and the accessories.

When disconnecting the power adapter from a power outlet, pull on the adapter, never on the cable. Do not twist or pinch the cable, and do not force a connector into a port.

Wall-mounting

Your Nest Mini can be wall-mounted. See <https://g.co/mini/wallmount> for additional wall-mount instructions.

Prolonged heat exposure

Nest Mini generates heat during normal operation and complies with applicable surface temperature standards and limits. Avoid prolonged, direct or indirect skin contact when the device is in use because exposing skin to hot surfaces for a long period of time may cause discomfort or burns.

Disposal, Transportation, & Recycling

Dispose of and transport your device and accessories according to local environmental and transportation regulations. Do not improperly transport them or dispose of them in normal household waste. Improper disposal or transport may lead to fire, explosion, and/or other hazards. For more information on recycling your device, batteries and accessories, visit g.co/HWR RecyclingProgram.

Environmental restrictions

To prevent damage to your Nest Mini or internal circuits, do not use or store the device or its accessories in dusty, smoky, damp, or dirty environments, or near magnetic fields. Keep it away from heat sources and out of direct sunlight. Do not leave your device inside a vehicle or in places where the temperature may exceed 140° F (60° C), such as on a window sill, near a heating vent, or behind glass that is exposed to direct sunlight or strong ultraviolet light for extended periods of time. This may damage the Nest Mini or pose a risk of fire or explosion.

Explosive atmospheres

Do not use, store or transport your Nest Mini where flammables or explosives are stored (in gas stations, fuel depots, or chemical plants, for example). Do not use your wireless device where blasting operations are in progress, or in potentially explosive atmospheres such as in areas where the air contains high levels of flammable chemicals, vapors, or particles (such as grain, dust, or metal powders). Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death. Observe all notices and signs where these hazards might exist.

Radio frequency interference

Observe rules that prohibit the use of wireless technology (e.g. WiFi). Your device is designed to comply with regulations governing radio frequency emissions but use of wireless devices can negatively affect other electronic equipment.

Medical device interference

Your device uses radios and other components that emit electromagnetic fields, and also contains magnets near the speaker. These electromagnetic fields and magnets may interfere with pacemakers and other implanted medical devices. Always keep the product and its power adapter at a safe distance away from the pacemaker or other implanted medical device. If you have questions about using your Google device with or near your pacemaker or other implanted medical device, consult your healthcare provider before using your product. If you suspect your product is interfering with your pacemaker or other implanted medical devices, turn off your Google device and consult your physician for information specific to your medical device.

Child safety

This device is not a toy. Your product may contain (or may come with) small parts, plastic elements, and parts with sharp edges that may cause an injury or create a choking hazard. Children have strangled on cords and cables. Keep Nest Mini's cable out of the reach of children (more than 3 feet / 1 meter away) and do not allow them to play with Nest Mini and its accessories. They could hurt themselves or others or could accidentally damage the product. Consult a physician immediately if small parts are swallowed.

Emergency communications

This device operates using radio signals and may not establish or maintain a connection in all conditions. Wireless devices may not be reliable for emergency communications. While some jurisdictions transmit emergency information over wireless networks, your device may not always receive these communications depending upon network connectivity or other factors.

Radio frequency exposure

This equipment complies with radiation exposure limits set forth for an uncontrolled environment. In order to avoid the possibility of exceeding the radio frequency exposure limits, human proximity to the antenna shall not be less than 20cm during normal operation.

Proper handling and usage

Follow these guidelines when using, storing, cleaning, or disposing of your Nest Mini:

Operating temperature

Do not use your Nest Mini and power adapter, at ambient temperatures lower than 0°C (32°F) or higher than 35°C (95°F). If the interior temperature of the device exceeds normal operating temperatures, you may experience the following behaviors while the device tries to regulate its temperature: reduced performance and connectivity or device power down. You may not be able

to use the device while it regulates its temperature. Move the device to a cooler (or warmer) location and wait a few minutes before attempting to use it again.

Care & cleaning

Unplug the product and power adapter before cleaning, during lightning storms, or when unused for extended periods of time. Use a clean, soft, and dry cloth to clean Nest Mini and its accessories.

Do not use any chemical detergent, powder, or other chemical agents (such as alcohol or benzene) to clean the product or accessories.

Water resistance

Do not expose your product to any liquids, which can cause a short circuit and overheating. The device, its adapter, and other accessories are not water resistant and should not be exposed to liquids.

Magnetic fields

Avoid placing any media containing magnets or sensitive to magnetism, such as credit cards, bank cards, audio/video tapes, or magnetic memory devices, near this product or its accessories because you may lose information stored on those media. Media containing information sensitive to magnets should be kept at least 2 inches (5 cm) away from this product.

Service & support

Devices should only be repaired by Google. Unauthorized repairs or modifications could result in permanent damage to the device and may affect your warranty coverage and regulatory authorizations. Contact customer service for authorized service. For online help and support, visit g.co/nest/help.

For customer service, call 1800 891 071 (in Australia) or +64 800854860 (in New Zealand).

Regulatory Information

Regulatory information, certification, and compliance marks specific to Nest Mini can be found at the bottom of your product.

EMC compliance

Important: This device, power adapter, and other in-box accessories have demonstrated Electromagnetic Compatibility (EMC) compliance under conditions that included the use of compliant peripheral devices and shielded cables between system components. It is important that you use compliant peripheral devices and shielded cables between system components to reduce the possibility of causing interference to radios, televisions, and other electronic devices.

Regulatory Information: United States

FCC Regulatory Compliance

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, this equipment may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by

turning the equipment off and on, try to correct the interference in one or more of the following ways:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Responsible party – U.S. contact information:

Google LLC, 1600 Amphitheatre Parkway, Mountain View, CA 94043.

Contact : g.co/nest/contact

Model number: H2C

Product name: Google Nest Mini

Changes or modifications not expressly approved by Google could void your authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following 2 conditions:

1. These devices may not cause harmful interference.
2. These devices must accept any interference received, including interference that may cause undesired operation.

Radio frequency exposure

This device meets the U.S. Federal Communications Commission's (FCC) requirements for exposure to radio waves and is designed and manufactured not to exceed the FCC's emission limits for exposure to radio frequency (RF) energy. To comply with FCC RF exposure compliance requirements, a distance of at least 20 cm should be maintained between the antenna of this device and persons during device operation. This device must not be co-located or operating in conjunction with any other antenna or transmitter.

Regulatory Information: Canada

Industry Canada, Class B

This device complies with ICES-003 Class B limits.

Notice: The ISSED Canada regulations provide that changes or modifications not expressly approved by Google could void your authority to operate this equipment.

H2C complies with ISSED license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'ISDE Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:

- (1) l'appareil ne doit pas produire de brouillage, et
- (2) l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

The device for operation in the band 5150–5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems.

Les dispositifs fonctionnant dans la bande de 5 150 à 5 250 MHz sont réservés uniquement pour une utilisation à l'intérieur afin de réduire les risques de brouillage préjudiciable aux systèmes de satellites mobiles utilisant les mêmes canaux.

Regulatory Information: EU/UK

Frequency bands and power

European Union

The devices operate in the following frequency bands within the EU:

Bluetooth: 2402-2480 MHz

WLAN: 2412-2472 MHz, 5180-5240 MHz, 5260-5320 MHz, 5500-5700 MHz

The maximum radio-frequency power transmitted for Nest Mini:

2400–2483.5 MHz, less than 20 dBm EIRP

5150–5250 MHz, less than 23 dBm EIRP

5250–5350 MHz, less than 20 dBm EIRP

5470–5725 MHz, less than 20 dBm EIRP

Radio frequency interference

Google is not responsible for any radio or television interference caused by unauthorized modification of these devices or accessories, or by the substitution or attachment of connecting cables and equipment other than that specified by Google. The correction of interference caused by such unauthorized modification, substitution or attachment is the responsibility of the user. Google and its authorized resellers or distributors are not liable for any damage or violation of government regulations that may arise from the user failing to comply with these guidelines.

EU compliance notice

Hereby, Google LLC declares that radio equipment type: H2C is in compliance with Directive 2014/53/EU (Radio Equipment Directive). The full declaration of conformity may be found at g.co/cast/red.

Restrictions or Requirements under Directive 2014/53/EU

The device is restricted to indoor use only when operating in the 5150 to 5350 MHz frequency range in AT, BE, BG, CY, CZ, DE, DK, EE, EL, ES, FI, FR, HR, HU, IE, IT, LT, LU, LV, MT, NL, PL, PT, RO, SE, SI, SK, UK(NI), CH, IS, LI, NO, TR.

Waste electrical and electronic equipment (WEEE) directive

The WEEE symbol above means that according to local laws and regulations your product should be disposed of separately from household waste. When this product reaches its end of life, take it to a collection point designated by local authorities for safe disposal or recycling. The separate collection and recycling of your product and its electrical accessories will help conserve natural resources, protect human health, and help the environment.

RoHS compliance

This product is in compliance with Directive 2011/65/EU of the European Parliament and of the Council of 8 June 2011, on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS) and its amendments.

REACH

REACH (Registration, Evaluation, Authorization and Restriction of Chemicals, EC No 1907/2006) is the EU chemical substances regulatory framework. Google complies with all requirements of the regulation, and we are committed to providing our customers with information about the presence of REACH Substances of Very High Concern (SVHCs). For information, you can contact Google at Env-Compliance@google.com.

UK compliance notice

Hereby, Google LLC declares that electrical equipment type: H2C is in compliance with the relevant statutory requirements. The full text of the UK Declaration of Conformity is available at: g.co/nest/conformity.

Restrictions or Requirements under Radio Equipment Regulations 2017

The device is restricted to indoor use only when operating in the 5150 to 5350 MHz frequency range in the UK.

UK Waste Electric and Electronic Equipment Regulations

The WEEE symbol above means that according to local laws and regulations your product should be disposed of separately from household waste. When this product reaches its end of life, take it to a collection point designated by local authorities for safe disposal or recycling. The separate collection and recycling of your product and its electrical accessories will help conserve natural resources, protect human health, and help the environment.

RoHS Compliance

This product is in compliance with Statutory Instrument 2012 No. 3032 The Restriction of the Use of Certain Hazardous Substance in Electrical and Electronic Equipment Regulations.

UK REACH

UK REACH (Registration, Evaluation, Authorization and Restriction of Chemicals, Statutory Instrument 2020 No. 1577) is the UK chemical substances regulatory framework. Google complies with all requirements of the regulation and we are committed to providing our customers with

information about the presence of REACH Substances of Very High Concern (SVHCs). For information, you can contact Google at Env-Compliance@google.com.

Google Commerce Limited UK establishment, Belgrave House, 76 Buckingham Palace Road, London, SW1W 9TQ.

Regulatory Information: India**Recycling, e-waste management and handling statement**

In India, this label indicates that this product should not be thrown away with household waste. It should be deposited at an appropriate facility to allow recovery and recycling.

Google declares that your Nest Mini has been designed and manufactured in compliance with E-Waste (Management) Rules, 2016 (hereafter "the Rules"), and is specifically in compliance with Rule 16 (1) on the reduction in the use of hazardous substances in the manufacture of electrical and electronic equipment and their maximum allowed concentrations by weight in the homogenous materials (except for the exemptions listed in schedule II).

Improper handling, disposal, accidental breakage, damage or improper recycling of e-waste may present risks, including, but not limited to, fire, explosion and/or other hazards, and uncontrolled waste disposal which may be detrimental to/have adverse effects on the environment as it prevents reuse of resources. Some e-waste may contain hazardous chemicals which, if disposed improperly, may make water, soil and other natural resources toxic. Improper disposal may cause harm to plant, animal and human life.

Regulatory Information: Australia and New Zealand

WLAN function of these devices is restricted only to indoor use when operating in the 5150 to 5350 MHz frequency range to reduce the potential for harmful interference to co-channel mobile satellite systems.

Google Home Mini (1st gen)

- [Where to find product information](#)
- [Safety Warnings](#)
- [Proper Handling and Usage](#)
- [Regulatory Information: EU | DE](#)

This detailed guide includes the basic safety guidelines in the printed Safety & Warranty booklet that comes with your Google Home Mini. It also includes additional safety, regulatory, and warranty information about your Google Home Mini.

Google Home Mini and your Family and Friends: If you make your Google Home Mini available for others to use, please be sure to let them know that their interactions may be stored by Google. More information about this is available at g.co/home/guests. In the link, you can also find information and tips about others being able to access information you make available to Google Home Mini.

Safety Warnings

WARNING: HEALTH AND SAFETY INFORMATION; READ BEFORE USE TO REDUCE THE RISK OF PERSONAL INJURY, DISCOMFORT, PROPERTY DAMAGE, INCLUDING DAMAGE TO YOUR GOOGLE HOME MINI, AND OTHER POTENTIAL HAZARDS

Handling

To avoid damaging your device, accessories or any connected devices, and to reduce the risk of personal injury, discomfort, property damage or other potential hazards, follow the precautions below:

- Handle your Google Home Mini with care. You may damage the device if you disassemble, drop, bend, burn, crush or puncture your device. Using a damaged device may cause overheating or injury. Don't expose your Google Home Mini to liquids, which can cause a short circuit and overheating. If it gets wet, do not attempt to dry it using an external heat source.
- Be sure the power adapter and device are well ventilated when in use. Using damaged cables or power adapters, or using your device when moisture is present, can cause fire, electric shock, injury, or damage to the Google Home Mini or other property. When using the Google Home Mini, make sure the power adapter is plugged into a nearby socket and is easily accessible. This product is intended for use with a certified Limited Power Source (LPS) per IEC 60950-1 rated: 5 Volts DC, minimum 1.8 Amps. Only use your Google Home Mini with the included power adapter and cable, or compatible accessories available on the Google Store. Failure to use compatible accessories can cause fire, electric shock, injury, or damage to the device and the accessories. Compatible accessories are available on the Google Store and at Google authorized resellers (look for Google's "made for" badge).
- The Micro-USB port in the back of the device is a service-only/power-only port.
- Contact customer service and do not use your Google Home Mini if it isn't working properly or has been damaged.

Repair & service

Don't attempt to repair your Google Home Mini yourself. Disassembling the device may cause injury.

Your Google Home Mini should only be repaired by Google or a Google authorized service provider. Unauthorized repairs or modifications could result in permanent damage to the device, and may affect your warranty coverage and regulatory authorizations. Contact customer service for authorized service. For online help and support, visit support.google.com. For online help and support, visit g.co/home/help. To reach an expert, visit g.co/home/support.

Prolonged Heat Exposure

Google Home Mini and its charger generate heat during normal operation and comply with applicable surface temperature standards and limits. Avoid prolonged, direct or indirect skin contact when the device is in use or charging because exposing skin to hot surfaces for a long period of time may cause discomfort or burns. Do not sleep on your device or its power adapter, or cover them with a blanket or pillow. Be aware of this issue if you have a physical condition that affects your ability to detect heat against your skin.

Proper Handling and Usage

Follow these guidelines when using, storing, cleaning or disposing of your Google Home Mini:

Operating Temperature

Do not use your Google Home Mini or its power adapter at ambient temperatures lower than 0°C (32°F) or higher than 35°C (95°F). If the interior temperature of the device exceeds normal operating temperatures, you may experience the following behaviors while the device tries to regulate its temperature: reduced performance and connectivity or device power down. You may not be able to use the device while it regulates its temperature. Move the device to a cooler (or warmer) location and wait a few minutes before attempting to use it again.

Care & Cleaning

Unplug the device and adapter before cleaning, during lightning storms, or when unused for extended periods of time. Use a clean, soft, and dry cloth to clean the device and power adapter. Do not use any chemical detergent, powder, or other chemical agents (such as alcohol or benzene) to clean Google Home Mini.

Connectors and Ports

When disconnecting the power adapter from a power outlet, pull on the adapter, never on the cable. Do not twist or pinch the cable and do not force a connector into a port.

Power Supply

You should install your power supply near a wall socket that is easily accessible.

Regulatory Information

Regulatory certification and compliance marks specific to Google Home Mini can be found on the rubber foot on the bottom of your Google Home Mini.

Manufacturer address: Google Inc., 1600 Amphitheatre Parkway, Mountain View, CA 94043.

Regulatory Information: United States and Canada
FCC and IC/ISED Regulatory Compliance

This device complies with Part 15 of the FCC Rules. This device complies with Innovation, Science and Economic Development Canada (ISED) license-exempt RSS standard(s). Operation is subject to the following two conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

More details on the FCC and ISED statements can be found at g.co/home/legal.

The Innovation, Science and Economic Development Canada and Federal Communications Commission regulations provide that changes or modifications not expressly approved by Google Inc. could void your authority to operate this equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Industry Canada, Class B

Innovation, Science and Economic Development Canada ICES-003 Compliance Label:

CAN ICES-3 (B)/NMB-3(B)

The device for operation in the band 5150-5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems

EMC Compliance

Important: This device and power adapter have demonstrated Electromagnetic Compatibility (EMC) compliance under conditions that included the use of compliant peripheral devices and shielded cables between system components. It is important that you use compliant peripheral devices and shielded cables between system components to reduce the possibility of causing

interference to radios, televisions, and other electronic devices.

Recycling

For Recycling in the United States, visit [g.co/HWRcyclingProgram](https://www.google.com/hwrecycling).

© Google Inc. All rights reserved. Google, Google Home Mini, the G logo, Chromecast, and their respective logos are trademarks of Google Inc.

Regulatory Information: European Union

Frequency Bands and Power

European Union

The devices operate in the following frequency bands within the EU:

2400–2483.5MHz: Wi-Fi (< 20 dBm EIRP), BT (< 10 dBm EIRP). 5150–5250 MHz, 5250–5350 MHz, 5470–5725 MHz: Wi-Fi (< 20 dBm EIRP).

EU Compliance Notice

Hereby, Google Inc. declares that radio equipment type: HOA is in compliance with Directive 2014/53/EU (Radio Equipment Directive). The full declaration of conformity may be found at [g.co/cast/red](https://www.google.com/cast/red)

Restrictions and Requirements under Directive 2014/53/EU

The device is restricted to indoor use only when operating in the 5150 to 5350 MHz frequency range in AT, BE, BG, CY, CZ, DE, DK, EE, EL, ES, FI, FR, HR, HU, IE, IT, LT, LU, LV, MT, NL, PL, PT, RO, SE, SI, SK, UK, CH, IS, LI, NO, TR

Waste Electrical and Electronic Equipment (WEEE) Directive

The Waste Electrical and Electronic Equipment (WEEE) Directive requires that all Electrical and Electronic Equipment (EEE), including your device and its accessories, must be marked with the symbol of the crossed-out wheeled bin. This symbol means that the equipment must not be disposed of as unsorted municipal waste. Disposing of WEEE together with normal waste may pose a risk to the environment and to human health, due to certain substances used in EEE.

Under the WEEE Directive, each EU Member State is responsible for achieving a high level of collection of WEEE for treatment, recovery and environmentally sound disposal. Before tossing your device, think a minute about how to reduce the amount of WEEE you create. You could, for example, reuse it, recover it, or turn it into artwork. By simply extending the life of your device, you

will have reduced waste and helped the EU achieve its objectives.

The success of this EU policy will depend on your active contribution in returning your WEEE to the appropriate facilities dedicated to the disposal of such waste. You should contact your local authority or your retailer for details about the return and collection points available.

Additional regulatory information: Germany

§ 10 I 2 ElektroG: Vor der Entsorgung dieses Geräts (i) Altbatterien/-akkus, sofern sie nicht vom Gerät umschlossen sind, und zerstörungsfrei entnehmbare Lampen zerstörungsfrei trennen und (ii) alle personenbezogenen Daten löschen. § 17 I und II ElektroG: Viele Vertreiber müssen Altgeräte kostenlos zurücknehmen.

RoHS Compliance

This product is in compliance with Directive 2011/65/EU of the European Parliament and of the Council of 8 June 2011, on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS) and its amendments.

REACH

REACH (Registration, Evaluation, Authorization and Restriction of Chemicals, EC No 1907/2006) is the EU chemical substances regulatory framework. Google complies with the REACH regulation and your device does not contain any Substances of Very High Concern (SVHCs) beyond the limits of this regulation. We are committed to providing our customers with information about the chemical substances in our products as needed to comply with legal requirements.

The point of contact for regulatory matters in the EU is Google Commerce Limited, 70 Sir John Rogerson's Quay, Dublin 2, Ireland.

Google Home Max

- [Where to find product information](#)
- [Safety Warnings](#)
- [Proper Handling and Usage](#)
- [Regulatory Information: US and CA](#)

This detailed guide includes the basic safety guidelines in the printed Safety & Warranty booklet that comes with your Google Home Max. It also includes additional safety, regulatory, and warranty information about your Google Home Max.

Google Home Max and your Family and Friends: If you make your Google Home Max available for others to use, please be sure to let them know that their interactions may be stored by Google. More information about this is available at g.co/home/guests. In the link, you can also find

information and tips about others being able to access information you make available to Google Home Max.

Safety Warnings

WARNING: HEALTH AND SAFETY INFORMATION; READ BEFORE USE TO REDUCE THE RISK OF PERSONAL INJURY, DISCOMFORT, PROPERTY DAMAGE, INCLUDING DAMAGE TO YOUR GOOGLE HOME MAX, AND OTHER POTENTIAL HAZARDS

Handling

To avoid damaging your device, accessories or any connected devices, and to reduce the risk of personal injury, discomfort, property damage or other potential hazards, follow the precautions below:

- Handle your Google Home Max with care. You may damage the device if you disassemble, drop, bend, burn, crush or puncture your device. Using a damaged device may cause overheating or injury. Don't expose your Google Home Max to liquids, which can cause a short circuit and overheating. If it gets wet, do not attempt to dry it using an external heat source. Do not use your Google Home Max in the bathroom. Do not expose your Google Home Max to direct sunlight.
- Be sure the device is well ventilated when in use. Using a damaged cable, or using your device when moisture is present, can cause fire, electric shock, injury, or damage to the Google Home Max or other property. When using the Google Home Max, make sure the power cord is plugged into a nearby socket and is easily accessible. Only use your Google Home Max with the included power adapter and cable, or compatible accessories available on the Google Store. Failure to use compatible accessories can cause fire, electric shock, injury, or damage to the device and the accessories. Compatible accessories are available on the Google Store and at Google authorized resellers (look for Google's "made for" badge).
- Contact customer service and do not use your Google Home Max if it isn't working properly or has been damaged.
- Maintain a distance of at least 20 cm from your body to be consistent with how the device is tested for compliance with US/Canadian RF exposure requirements.
- Prolonged exposure to loud sounds (including music) can cause hearing loss. To prevent possible hearing damage, avoid listening at high volume for prolonged periods of time. Continued exposure to high volumes and background noise can make loud sounds seem quieter than they actually are. Check the volume before use.
- Google Home Max should be stored between ambient temperatures of -4° and 113°F (-20° and 45°C).

Repair & service

Don't attempt to repair your Google Home Max yourself. Disassembling the device may cause injury.

Your Google Home Max should only be repaired by Google or a Google authorized service provider. Unauthorized repairs or modifications could result in permanent damage to the device, and may affect your warranty coverage and regulatory authorizations. Contact customer service for authorized service. For online help and support, visit g.co/home/help. To reach an expert, visit g.co/home/support.

Prolonged Heat Exposure

Google Home Max generates heat during normal operation and complies with applicable surface temperature standards and limits. Avoid prolonged, direct or indirect skin contact when the device is in use because exposing skin to hot surfaces for a long period of time may cause discomfort or burns. Do not cover your device with a blanket or pillow. Be aware of this issue if you have a physical condition that affects your ability to detect heat against your skin.

Proper Handling and Usage

Follow these guidelines when using, storing, cleaning or disposing of your Google Home Max:

Safety Warnings

WARNING: HEALTH AND SAFETY INFORMATION; READ BEFORE USE TO REDUCE THE RISK OF PERSONAL INJURY, DISCOMFORT, PROPERTY DAMAGE, INCLUDING DAMAGE TO YOUR NEST AUDIO, ACCESSORIES AND OTHER POTENTIAL HAZARDS

Handling

To avoid damaging your device, accessories or any connected devices, and to reduce the risk of personal injury, discomfort, property damage or other potential hazards, follow the precautions below.

Handle your Nest Audio with care. You may damage the device if you disassemble, drop, bend, burn, crush or puncture your device. Do not use a Device with a damaged enclosure. Using a damaged Device may cause injury. Don't expose your Device to liquids, which can cause a short circuit and overheating. If your Device gets wet, do not attempt to dry it using an external heat source. Nest Audio is designed to operate in a dry, indoor environment.

Your Device is designed to work in ambient temperatures between 32° to 95° F (0° and 35° C), and should be stored between ambient temperatures of -4° and 140° F (-20° and 60° C). Do not leave your Device in places where the temperature may exceed 140° F (60° C), such as near a heating vent, as this may damage the Device, or pose a potential risk of fire. Keep your Device away from heat sources and out of direct sunlight. If your device becomes too hot, disconnect it from its

power source if it is plugged in, move it to a cooler place and don't use it until it has cooled. Your Device is designed to work at an altitude of up to 16,404 ft (5000m).

Repair & Service

Don't attempt to repair your Device yourself. Disassembling the device may cause injury or damage to your device.

Contact customer service and do not use your Device if it isn't working properly or has been damaged: <https://g.co/nest/contact>.

Powering Your Device

Be sure the power adapter and Google Nest Audio are well ventilated when in use. Using damaged cables or power adapters, can cause fire, electric shock, injury, or damage to the Device or other property. When powering the Device, make sure the power adapter is plugged into a socket near the Device and is easily accessible. This device must be used with an AC adapter that has been certified with a Limited Power Source (LPS) output per IEC 60950-1 and/or classified PS2 power source per IEC 62368-1 rated: 24Volts DC, maximum 1.25 Amp.

Only power your Device with the included power adapter and cable. Failure to use compatible accessories can cause fire, electric shock, injury, or damage to the device and the accessories.

When disconnecting the power adapter from a power outlet, pull on the adapter, never on the cable. Do not twist or pinch the cable, and do not force a connector into a port.

Prolonged Heat Exposure

The Device and its power adapter generate heat during normal operation and comply with applicable surface temperature standards and limits. Avoid prolonged, direct or indirect skin contact when the device is in use because exposing skin to hot surfaces for a long period of time may cause discomfort or burns. Do not sleep on or with your device or its power adapter, or cover them with a blanket or pillow. Be aware of this issue if you have a physical condition that affects your ability to detect heat against your skin.

Child Safety

This device is not a toy. Your Device may contain small parts, plastic elements, and parts with sharp edges that may cause an injury or create a choking hazard. Children have strangled on cords and cables. Keep the Device's cords and cables out of the reach of children (more than 3 feet / 1 meter away) and do not allow them to play with the Device and its accessories. They could hurt themselves or others, or could accidentally damage the Device. Consult a physician immediately if small parts are swallowed.

Hearing Loss

Prolonged exposure to loud sounds (including music) can cause hearing loss. To prevent possible hearing damage, avoid listening at high volume for prolonged periods of time. Continued exposure to high volumes and background noise can make loud sounds seem quieter than they actually are. Check the volume before using headphones or earphones.

Disposal, Transportation, & Recycling

Dispose of and transport your device and accessories according to local environmental and transportation regulations. Do not improperly transport them or dispose of them in normal household waste. Improper disposal or transport may lead to fire, explosion, and/or other hazards.

Do not open, crush, heat above 140 °F (60 °C), or incinerate. For more information on recycling your device and accessories, visit <https://g.co/hardware/recycle>.

Environmental Restrictions

To prevent damage to your Device, do not use or store the device or its accessories in dusty, smoky, damp, or dirty environments, or near magnetic fields. Keep it away from heat sources and out of direct sunlight. Do not leave your Device inside a vehicle or in places where the temperature may exceed 140° F (60° C), such as on a window sill, near a heating vent, or behind glass that is exposed to direct sunlight or strong ultraviolet light for extended periods of time. This may damage the Device, overheat the Device, or pose a risk of fire.

Medical Device Interference

Your device uses radios and other components that emit electromagnetic fields, and also contains magnets near the speaker. These electromagnetic fields and magnets may interfere with pacemakers and other implanted medical devices. Always keep the Device and its power adapter at a safe distance away from the pacemaker or other implanted medical device. If you have questions about using your Google device with or near your pacemaker or other implanted medical device, consult your healthcare provider before using your Device. If you suspect your Device is interfering with your pacemaker or other implanted medical devices, turn off your Google device and consult your physician for information specific to your medical device.

Radio Frequency Exposure

This device has been evaluated and meets the applicable regulatory requirements for exposure to radio waves and is designed and manufactured not to exceed the permissible radio frequency (RF) exposure limits. To comply with applicable RF exposure compliance requirements, a distance of at least 20 cm should be maintained between the antenna of this device and persons during device operation.

LEDs

The LEDs visible on your device are safe under reasonably foreseeable conditions per the requirements in IEC 62471. However, it is recommended that you do not direct the LEDs at anyone's eyes.

Proper Handling and Usage

Follow these guidelines when using, storing, cleaning or disposing of your Device:

Operating Temperature

Do not use the Device and power adapter, at ambient temperatures lower than 0°C (32°F) or higher than 35°C (95°F). If the interior temperature of the device exceeds normal operating temperatures, you may experience reduced performance as the device tries to regulate its temperature.

Care & Cleaning

Unplug the device and power adapter before cleaning, during lightning storms, or when unused for extended periods of time. Do not clean your device while it is powered as this may cause injury or damage to your device. Avoid solvent and abrasive material that may cause damage to the product surface. Do not use any chemical detergent, powder, or other chemical agents (such as benzene) to clean the device or accessories.

Exposure to makeup, chemicals, and dyed materials such as denim can stain light colored devices.

To clean your device we recommend gently wiping it with a soft, lint-free cloth. Use a dry cloth to remove streaks, smudges or dust.

To disinfect your Device, you can use ordinary household disinfecting wipes or 70% isopropyl alcohol-based wipes. Don't use wipes that have bleach.

Water Resistance

Your Device is not water resistant. Don't expose your Device to liquids, which can cause a short circuit and overheating. The device and its power adapter are not water resistant and should not be exposed to liquids.

Magnetic Fields

Avoid placing any media containing magnets or sensitive to magnetism, such as credit cards, bank cards, audio/video tapes, or magnetic memory devices, near this Device or its power adapter, because you may lose information stored on those media. Media containing information sensitive to magnets should be kept at least 2 inches (5 cm) away from this Device.

Service & Support

Nest Audio should only be repaired by [Google](#) or a [Google authorized service provider](#).

Unauthorized repairs or modifications could result in permanent damage to the device, and may affect your warranty coverage and regulatory authorizations. Contact customer service for authorized service. For online help and support, visit . For customer service, visit <https://g.co/nest/contact>.

For customer service, call 1800 891 071 (in Australia) or +64 800854860 (in New Zealand).

Regulatory Information

Regulatory information, certification, and compliance marks specific to Nest Audio can be found on your device.

EMC Compliance Statement

Important: This device and its power adapter have demonstrated Electromagnetic Compatibility (EMC) compliance under conditions that included the use of compliant peripheral devices and shielded cables between system components. It is important that you use compliant peripheral devices and shielded cables between system components to reduce the possibility of causing interference to radios, televisions, and other electronic devices.

Regulatory Information: United States

FCC Regulatory Compliance

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by Google could void your authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following 2 conditions:

1. These devices may not cause harmful interference.
2. These devices must accept any interference received, including interference that may cause undesired operation.

Product name: Google Nest Audio

EMC Compliance Statement

Important: This device and its power adapter have demonstrated Electromagnetic Compatibility (EMC) compliance under conditions that included the use of compliant peripheral devices and shielded cables between system components. It is important that you use compliant peripheral devices and shielded cables between system components to reduce the possibility of causing interference to radios, televisions, and other electronic devices.

Radio Frequency Exposure

This device meets the U.S. Federal Communications Commission's (FCC) requirements for exposure to radio waves and is designed and manufactured not to exceed the FCC's emission limits for exposure to radio frequency (RF) energy. To comply with FCC RF exposure compliance requirements, a distance of at least 20 cm should be maintained between the antenna of this device and persons during device operation. This device must not be co-located or operating in conjunction with any other antenna or transmitter.

Recycling

For Recycling in the United States, visit <https://g.co/HWR RecyclingProgram>.

Regulatory Information: Canada

Industry Canada, Class B

This device complies with ICES-003 Class B limits.

Notice: The Industry Canada regulations provide that changes or modifications not expressly approved by Google could void your authority to operate this equipment.

This device complies with ISSED license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'ISDE Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:

- (1) l'appareil ne doit pas produire de brouillage, et
- (2) l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

The device for operation in the band 5150–5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems.

Les dispositifs fonctionnant dans la bande de 5 150 à 5 250 MHz sont réservés uniquement pour une utilisation à l'intérieur afin de réduire les risques de brouillage préjudiciable aux systèmes de satellites mobiles utilisant les mêmes canaux.

RF Exposure Information

The radiated output power of this device is below the ISED radio frequency exposure limits. These devices have been evaluated for and shown compliant with the ISED Radio Frequency (RF) Exposure limits. These devices should be used in a manner such that the potential for human contact during normal operation is minimized.

When using the device next to your body, maintain a distance of 20 cm (8 inches) from your body to be consistent with how the device is tested for compliance with RF exposure requirements.

This device has been certified for use in Canada. Status of the listing in the ISED's (Radio Equipment List) can be found at the following web address:

<https://www.ic.gc.ca/app/sitt/reltel/srch/nwRdSrch.do>.

Additional Canadian information on RF exposure also can be found at the following web address:

<https://www.ic.gc.ca/eic/site/smt-gst.nsf/eng/sf08792.html>.

Regulatory Information: EU

Frequency Bands and Power

European Union

The devices operate in the following frequency bands within the EU:

Bluetooth: 2402–2480 MHz

WLAN: 2412–2472 MHz, 5150–5250 MHz, 5250–5350 MHz, 5470–5725 MHz, 5745–5825 MHz

The maximum radio-frequency power transmitted for this device:

2400–2483.5 MHz, less than 20 dBm EIRP

5150–5250 MHz, less than 23 dBm EIRP

5250–5350 MHz, less than 20 dBm EIRP

5470–5725 MHz, less than 20 dBm EIRP

5745–5825 MHz, less than 14 dBm EIRP

Radio frequency interference

Google is not responsible for any radio or television interference caused by unauthorized modification of these devices or accessories, or by the substitution or attachment of connecting cables and equipment other than that specified by Google. The correction of interference caused by such unauthorized modification, substitution or attachment is the responsibility of the user. Google and its authorized resellers or distributors are not liable for any damage or violation of government regulations that may arise from the user failing to comply with these guidelines.

EU Compliance Notice

Hereby, Google LLC declares that radio equipment type: GXCA6 is in compliance with Directive 2014/53/EU (Radio Equipment Directive). The full declaration of conformity may be found at

<https://g.co/nest/conformity>.

Restrictions and Requirements under Directive 2014/53/EU

The device is restricted to indoor use only when operating in the 5150 to 5350 MHz frequency range in AT, BE, BG, CY, CZ, DE, DK, EE, EL, ES, FI, FR, HR, HU, IE, IT, LT, LU, LV, MT, NL, PL, PT, RO, SE, SI, SK, UK(NI), CH, IS, LI, NO, TR.

RF Exposure Information - EU

These devices are classified for use in a typical Class B domestic environment.

This equipment complies with radiation exposure limits set forth for an uncontrolled environment. In order to avoid the possibility of exceeding the radio frequency exposure limits, human proximity to the antenna should not be less than 20 cm (8 in) during normal operation.

Waste Electrical and Electronic Equipment (WEEE) Directive

The WEEE symbol above means that according to local laws and regulations your product should be disposed of separately from household waste. When this product reaches its end of life, take it to a collection point designated by local authorities for safe disposal or recycling. The separate collection and recycling of your product and its electrical accessories will help conserve natural resources, protect human health, and help the environment. Regulatory Information: United Kingdom

UK Compliance Notice

Hereby, Google LLC declares that radio equipment type: GXCA6 is in compliance with Radio Equipment Regulation 2017. The full declaration of conformity may be found at g.co/nest/conformity.

Restrictions and Requirements under Radio Equipment Regulations 2017

The device is restricted to indoor use only when operating in the 5150 to 5350 MHz frequency range in the UK.

Frequency Bands and Power

The devices operate in the following frequency bands within the United Kingdom:

Bluetooth: 2402–2480 MHz

WLAN: 2412–2472 MHz, 5150–5250 MHz, 5250–5350 MHz, 5470–5725 MHz, 5745–5825 MHz

The maximum radio-frequency power transmitted for this device:

2400–2483.5 MHz, less than 20 dBm EIRP

5150–5250 MHz, less than 23 dBm EIRP

5250–5350 MHz, less than 20 dBm EIRP

5470–5725 MHz, less than 20 dBm EIRP

5745–5825 MHz, less than 14 dBm EIRP

Radio frequency interference

Google is not responsible for any radio or television interference caused by unauthorized modification of these devices or accessories, or by the substitution or attachment of connecting cables and equipment other than that specified by Google. The correction of interference caused by such unauthorized modification, substitution or attachment is the responsibility of the user. Google and its authorized resellers or distributors are not liable for any damage or violation of government regulations that may arise from the user failing to comply with these guidelines.

RF Exposure Information

These devices are classified for use in a typical Class B domestic environment.

This equipment complies with radiation exposure limits set forth for an uncontrolled environment. In order to avoid the possibility of exceeding the radio frequency exposure limits, human proximity to the antenna should not be less than 20 cm (8 in) during normal operation.

UK Waste Electric and Electronic Equipment Regulations

The WEEE symbol above means that according to local laws and regulations your product should be disposed of separately from household waste. When this product reaches its end of life, take it to a collection point designated by local authorities for safe disposal or recycling. The separate collection and recycling of your product and its electrical accessories will help conserve natural resources, protect human health, and help the environment.

RoHS Compliance

This product is in compliance with Statutory Instrument 2012 No. 3032 The Restriction of the Use of Certain Hazardous Substance in Electrical and Electronic Equipment Regulations.

UK REACH

UK REACH (Registration, Evaluation, Authorization and Restriction of Chemicals, Statutory Instrument 2020 No. 1577) is the UK chemical substances regulatory framework. Google complies with all requirements of the regulation and we are committed to providing our customers with information about the presence of REACH Substances of Very High Concern (SVHCs). For information, you can contact Google at Env-Compliance@google.com.

**Complies with
IMDA Standards
DA107248**

Regulatory Information: India**Specific Absorption Rate (SAR) Information**

This equipment complies with radiation exposure limits set forth for an uncontrolled environment. In order to avoid the possibility of exceeding the radio frequency exposure limits, human proximity to the antenna should not be less than 20 cm (8 in) during normal operation.

Recycling, E-waste Management and Handling Statement

In India, this label indicates that this product should not be thrown away with household waste. It should be deposited at an appropriate facility to allow recovery and recycling.

Google declares that your phone has been designed and manufactured in compliance with E-Waste (Management) Rules, 2016 (hereafter "the Rules"), and is specifically in compliance with Rule 16 (1) on the reduction in the use of hazardous substances in the manufacture of electrical and electronic equipment and their maximum allowed concentrations by weight in the homogenous materials (except for the exemptions listed in schedule II).

Improper handling, disposal, accidental breakage, damage or improper recycling of e-waste may present risks, including, but not limited to, fire, explosion and/or other hazards, and uncontrolled waste disposal which may be detrimental to/have adverse effects on the environment as it prevents reuse of resources. Some e-waste may contain hazardous chemicals which, if disposed improperly, may make water, soil and other natural resources toxic. Improper disposal may cause harm to plant, animal and human life.

Google Home Hub/Google Nest Hub

- [Where to find product information](#)
- [Safety Warnings](#)
- [Proper Handling and Usage](#)
- [Regulatory Information: US and CA](#)

Where to find product information

This detailed guide includes the basic safety guidelines in the printed Safety & Warranty booklet that comes with your Google Home Hub. It also includes additional safety, regulatory, and warranty information about your Google Home Hub.

Google Home Hub and your Family and Friends: If you make your Google Home Hub available for others to use, please be sure to let them know that their interactions may be stored by Google. More information about this is available at g.co/home/guests. In the link, you can also find information and tips about others being able to access information you make available to Google Home Hub.

Safety warnings

WARNING: HEALTH AND SAFETY INFORMATION; READ BEFORE USE TO REDUCE

THE RISK OF PERSONAL INJURY, DISCOMFORT, PROPERTY DAMAGE, INCLUDING DAMAGE TO YOUR PHONE AND OTHER POTENTIAL HAZARDS

To avoid damaging your phone, accessories, or any connected devices, and to reduce the risk of personal injury, discomfort, property damage, or other potential hazards, follow these precautions below.

Handling

To avoid damaging your device, accessories or any connected devices, and to reduce the risk of personal injury, discomfort, property damage or other potential hazards, follow the precautions below:

Handle your Google Home Hub with care. You may damage the device if you disassemble, drop, bend, burn, crush or puncture your device. Do not use a device with a cracked screen. Using a damaged device may cause overheating or injury. Don't expose your Google Home Hub to liquids, which can cause a short circuit and overheating. If it gets wet, do not attempt to dry it using an external heat source.

Be sure the power adapter and device are well ventilated when in use. Using damaged cables or power adapters, or using your device when moisture is present, can cause fire, electric shock, injury, or damage to the Google Home Hub or other property. If it gets wet, do not attempt to dry it using an external heat source. Do not use your Google Home Hub in the bathroom. Do not expose your Google Home Hub to direct sunlight. Google Home Hub and its adapter are designed to work best in ambient temperatures between 32° to 95° F (0° to 35° C), and should be stored between ambient temperatures of -4° and 140° F (-20° and 60° C). Do not expose the Google Home Hub to temperatures above 140° F (60° C) as this may damage the product or pose a risk of fire.

Maintain a distance of 20 cm (8 inches) from your body to be consistent with how the device is tested for compliance with RF exposure requirements.

Contact customer service and do not use your Google Home Hub if it isn't working properly or has been damaged.

Repair and service

Don't attempt to repair your Google Home Hub yourself. Disassembling the device may cause injury.

For online help and support, visit g.co/hub/help. To reach an expert, visit g.co/hub/support.

Prolonged Heat Exposure

Google Home Hub and its charger generate heat during normal operation and comply with applicable surface temperature standards and limits. Avoid prolonged, direct or indirect skin contact when the device is in use or charging because exposing skin to hot surfaces for a long period of time may cause discomfort or burns. Do not sleep on your device or its power adapter, or cover them with a blanket or pillow. Be aware of this issue if you have a physical condition that affects your ability to detect heat against your skin.

Proper Handling and Usage

Follow these guidelines when using, storing, cleaning or disposing of your Google Home Hub:

Operating Temperature

Do not use your Google Home Hub or its power adapter at ambient temperatures lower than 0°C (32°F) or higher than 35°C (95°F). If the interior temperature of the device exceeds normal operating temperatures, you may experience the following behaviors while the device tries to regulate its temperature: reduced performance and connectivity or device power down. You may not be able to use the device while it regulates its temperature. Move the device to a cooler (or warmer) location and wait a few minutes before attempting to use it again.

Care & Cleaning

Unplug the device and adapter before cleaning, during lightning storms, or when unused for extended periods of time. Use a clean, soft, and dry cloth to clean the device and power adapter.

Do not use any chemical detergent, powder, or other chemical agents (such as alcohol or benzene) to clean Google Home Hub.

Connectors and Ports

When disconnecting the power adapter from a power outlet, pull on the adapter, never on the cable. Do not twist or pinch the cable and do not force a connector into a port.

Power Supply

Be sure the power adapter and device are well ventilated when in use. Using damaged cables or power adapter or using them when moisture is present, can cause fire, electric shock, injury, or damage to the device or other property. Make sure the power adapter is plugged into a socket near your Google Home Hub and is easily accessible. This product is intended for use with a certified Limited Power Source (LPS) rated: 14 Volts DC, maximum 1.1 Amp. Only power your Google Home Hub with the included power adapter and cable or compatible accessories available on the Google Store. Failure to use compatible accessories can cause fire, electric shock, injury, or damage to the device and the accessories. Compatible accessories may be available on the Google Store and at Google authorized resellers (look for Google's "made for" badge).

Regulatory information

Regulatory certification and compliance marks specific to Google Home Hub can be found on the device under Setting>About Device and on the bottom of your device. Additional regulatory and environmental information can be found at g.co/hub/legal.

Manufacturer address: Google LLC., 1600 Amphitheatre Parkway, Mountain View, CA 94043..

Regulatory information: United States and Canada

FCC and IC/ISED Regulatory Compliance

This device complies with Part 15 of the FCC Rules. This device complies with Innovation, Science and Economic Development Canada (ISED) license-exempt RSS standard(s). Operation is subject to the following two conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

More details on the FCC and ISED statements can be found at g.co/hub/legal.

The Innovation, Science and Economic Development Canada and Federal Communications Commission regulations provide that changes or modifications not expressly approved by Google LLC. could void your authority to operate this equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Safety Warnings

WARNING: HEALTH AND SAFETY INFORMATION; READ BEFORE USE TO

REDUCE THE RISK OF PERSONAL INJURY, DISCOMFORT, PROPERTY DAMAGE, INCLUDING DAMAGE TO YOUR Nest Hub (2nd gen) ACCESSORIES OR ANY CONNECTED DEVICES, AND OTHER POTENTIAL HAZARDS

Handling

Handle your Nest Hub (2nd gen) with care. You may damage the device or accessories if you disassemble, drop, bend, burn, crush or puncture your device. Do not use a Nest Hub (2nd gen) with a damaged enclosure, a cracked screen or some other form of physical damage. Using a damaged Nest Hub (2nd gen) may cause overheating or injury. Do not expose your Nest Hub (2nd gen) to liquids, which can cause a short circuit and overheating. If your Nest Hub (2nd gen) gets wet, do not attempt to dry it using an external heat source.

Nest Hub (2nd gen) is designed to operate in a dry, indoor environment. Your Nest Hub (2nd gen) is designed to work best in ambient temperatures between 32° and 95° F (0° and 35° C), and should be stored between ambient temperatures of -4° and 113° F (-20° and 45° C). Do not expose your Nest Hub (2nd gen) to temperatures above 140° F (60° C), as this may damage the Nest Hub (2nd gen), overheat the battery, or pose a risk of fire. Keep your Nest Hub (2nd gen) away from heat sources and out of direct sunlight. If your device becomes too hot, disconnect it from its power source if it is plugged in, move it to a cooler place and do not use it until it has cooled.

Repair & Service

Do not attempt to repair your Nest Hub (2nd gen) yourself. Disassembling the device may cause injury or damage to your device.

Contact customer service if Nest Hub (2nd gen) isn't working properly or has been damaged.
g.co/nest/contact 

Powering

Be sure the power adapter and Nest Hub (2nd gen) are well ventilated when in use or charging. Using damaged cables, or power adapters, or powering when moisture is present, can cause fire, electric shock, injury, or damage to the Nest Hub (2nd gen) or other property. Do not power your Nest Hub (2nd gen) when it's wet. Avoid powering your device in direct sunlight.

When powering the device, make sure the power adapter is plugged into a power outlet near the device and is easily accessible. Do not force this power adapter and other plugs or power adapters to a power outlet if space is not sufficient to accommodate both. When disconnecting the power adapter from a power outlet, pull on the adapter, never on the charging cable. Do not twist or pinch the cable, and do not force a connector into a port. If you receive a message while powering that instructs you to unplug the power adapter, disconnect the power adapter. Before attempting to power up again, make sure both the power adapter cable connector and the device's input power port are dry and clear of any objects.

This device comes with an AC adapter that has appropriate certifications.

Only power your Nest Hub (2nd gen) with the included power adapter and cable or compatible accessories. The AC adapter must be certified with a Limited Power Source output per IEC 60950-1 and/or classified PS1 per IEC 62368-1, rated: 14 Volts DC, maximum 1.1 Amp. Failure to use compatible charging accessories can cause fire, electric shock, injury, or damage to the device and the accessories.

Prolonged Heat Exposure

The Nest Hub (2nd gen) and its power adapter generate heat during normal operation and comply with applicable surface temperature standards and limits. Avoid prolonged skin contact when the device is in use because exposing skin to hot surfaces for a long period of time may cause discomfort or burns. Do not sleep on or with your device or its power adapter, or cover them with a blanket or pillow. Be aware of this issue if you have a physical condition that affects your ability to detect heat against your skin.

Child Safety

This device is not a toy. Your Nest Hub (2nd gen) may contain (or may come with) small parts, plastic, glass, or metal elements, and parts with sharp edges that may cause an injury or create a choking hazard. Children have strangled on cords and cables. Keep the Nest Hub (2nd gen)'s cords and cables out of the reach of children (more than 3 feet (0.9 meters) away) and do not allow them to play with the Nest Hub (2nd gen) and its accessories. They could hurt themselves or others, or could accidentally damage the Nest Hub (2nd gen).

Disposal, Transportation, & Recycling

Dispose of and transport your device, batteries and accessories according to local environmental and transportation regulations. Do not improperly transport them or dispose of them in normal household waste. Improper disposal or transport may lead to fire, explosion, and/or other hazards. Do not open, crush, heat above 113° F (45° C), or incinerate. For more information on recycling your device, batteries and accessories, visit [g.co/HWR RecyclingProgram](https://www.google.com/hwrecycling) 

Environmental Restrictions

To prevent damage to your Nest Hub (2nd gen)'s parts or internal circuits, do not use or store the device or its accessories in dusty, smoky, damp, or dirty environments, or near magnetic fields. Keep it away from heat sources and out of direct sunlight. Do not leave your Nest Hub (2nd gen) inside a vehicle or in places where the temperature may exceed 113° F (45° C), such as on a car dashboard, window sill, near a heating vent, or behind glass that is exposed to direct sunlight or strong ultraviolet light for extended periods of time. This may damage the Nest Hub (2nd gen), overheat the battery, or pose a risk of fire or explosion.

Radio Frequency Exposure

This device has been evaluated and meets the applicable regulatory requirements for exposure to radio waves and is designed and manufactured not to exceed the permissible radio frequency (RF) exposure limits.. To comply with applicable RF exposure compliance requirements, a distance of at least 20 cm should be maintained between the antenna of this device and persons during device operation.

Radio Frequency Interference

Observe rules that prohibit the use of wireless technology (e.g. cellular or Wi-Fi). Your device is designed to comply with regulations governing radio frequency emissions but use of wireless devices can negatively affect other electronic equipment.

Medical Device Interference

Your device uses radios and other components that emit electromagnetic fields. These electromagnetic fields and magnets may interfere with pacemakers and other implanted medical devices. Always keep the product and its power adapter at a safe distance away from the pacemaker or other implanted medical device. If you have questions about using your Google device with or near your pacemaker or other implanted medical device, consult your healthcare provider before using your product. If you suspect your product is interfering with your pacemaker or other implanted medical devices, turn off your Google device and consult your physician for information specific to your medical device.

Health Related Functions

Your Nest Hub (2nd gen) and its sleep functions are not medical devices and are intended for information purposes only. They are not designed or intended for use in the diagnosis of disease or other conditions, or in the cure, monitoring, mitigation, treatment, or prevention of disease or other conditions.

LEDs

The LEDs visible on your device are safe under reasonably foreseeable conditions per the requirements in IEC 62471. However, it is recommended that you do not direct the LEDs at anyone's eyes.

Medical Conditions

A small percentage of users may experience headaches, seizures, blackouts, eye strain, fatigue or dry eyes that are triggered by visual stimuli, such as flashing lights or bright patterns, or use of electronics with displays. Those symptoms can be experienced by people who have never previously experienced such issues. If you have a history of seizures, blackouts, epilepsy, a medical condition, or experience discomfort that you believe could be affected by your Nest Hub (2nd gen), consult with a doctor before using your device. Stop using your Nest Hub (2nd gen) immediately and contact a doctor if you experience any symptoms that you believe could be caused or affected by your Nest Hub (2nd gen) (for example, headaches, blackouts, or seizures).

Musculoskeletal Disorders

Repetitive activities, such as typing, tapping, or swiping on the screen of your Nest Hub (2nd gen), may cause discomfort in your fingers, hands, wrists, arms, shoulders, or other parts of your body. If you experience any discomfort from such activities, stop using your Nest Hub (2nd gen) and consult with your doctor.

Proper Handling and Usage

Follow these guidelines when using, storing or cleaning of your Nest Hub (2nd gen):

Operating Temperature

Do not use the Nest Hub (2nd gen) and power adapter at ambient temperatures lower than 0°C (32°F) or higher than 35°C (95°F). If the interior temperature of the device exceeds normal operating temperatures, you may experience the following behaviors while the device tries to regulate its temperature: reduced performance and connectivity, inability to charge, or powering down of the display or device power down. You may not be able to use the device while it regulates its temperature. Move the device to a cooler (or warmer) location and wait a few minutes before attempting to use it again.

Care & Cleaning

Unplug the Nest Hub (2nd gen) and power adapter before cleaning, during lightning storms, or when unused for extended periods of time. Do not clean your Nest Hub (2nd gen) while it is energized as this may cause injury or damage to your device. Avoid solvent and abrasive material that may cause damage to the product surface. Do not use any chemical detergent, powder, or other chemical agents (such as benzene) to clean the Nest Hub (2nd gen) or accessories.

To clean your Nest Hub (2nd gen) we recommend gently wiping it with a soft, lint-free cloth. Use a dry cloth for streaks, smudges or dust

Water Resistance

Your Device is not water resistant. Don't expose your Device to liquids, which can cause a short circuit and overheating. The device and its power adapter are not water resistant and should not be exposed to liquids.

Magnetic Fields

Avoid placing any items containing magnets or which are sensitive to magnetism, such as credit cards, bank cards, audio/video tapes, or magnetic memory devices, near this Nest Hub (2nd gen) or its charging cable connector, because you may lose information stored on such items. Items containing information sensitive to magnets should be kept at least 2 inches (5 cm) away from this Nest Hub (2nd gen).

Service & Support

Unauthorized repairs or modifications could result in permanent damage to the device, and may affect your warranty coverage and regulatory authorizations. Devices should only be repaired by Google or a Google authorized service provider. Contact customer service for authorized service. If you send your device in for service, you might receive a replacement in place of your original device. Goods presented for repair may be replaced by refurbished goods of the same type rather than being repaired. Refurbished parts may be used to repair the goods. If the goods are capable of retaining user-generated data then the repair or replacement may result in loss of the data. For online help and support, visit g.co/nest/help. [For customer service, visit g.co/nest/contact.](#)

For customer service, call 1800 905 941 (in Australia) or 03 288 9187 (in New Zealand).

Regulatory Information

Regulatory information certification and compliance marks specific to Nest Hub (2nd gen) can be found on your device under System setting > Regulatory labels, as well as on the bottom of your device.

EMC Compliance Statement

Important: This device and its power adapter have demonstrated Electromagnetic Compatibility (EMC) compliance under conditions that included the use of compliant peripheral devices and shielded cables between system components. It is important that you use compliant peripheral devices and shielded cables between system components to reduce the possibility of causing interference to radios, televisions, and other electronic devices.

Regulatory Information: United States

FCC Regulatory Compliance

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by Google could void your authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following 2 conditions:

1. These devices may not cause harmful interference.
2. These devices must accept any interference received, including interference that may cause undesired operation.

Model number: GUIK2

Product name: Nest Hub (2nd gen)

Responsible Party

Google LLC
1600 Amphitheatre Parkway
Mountain View, CA 94043
Contact: g.co/nest/contact 

Regulatory Information: Canada

Industry Canada, Class B

This device complies with ICES-003 Class B limits.

This device complies with ISSED license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'ISDE Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:

- (1) l'appareil ne doit pas produire de brouillage, et
- (2) l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

The device for operation in the band 5150–5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems.

Les dispositifs fonctionnant dans la bande de 5 150 à 5 250 MHz sont réservés uniquement pour une utilisation à l'intérieur afin de réduire les risques de brouillage préjudiciable aux systèmes de satellites mobiles utilisant les mêmes canaux.

UK Compliance Notice

Hereby, Google LLC declares that radio equipment type: GUK2 is in compliance with Radio Equipment Regulation 2017. The full declaration of conformity may be found at: g.co/nest/conformity 

Restrictions or Requirements under Radio Equipment Regulations 2017

The device is restricted to indoor use only when operating in the 5150 to 5350 MHz frequency range in the UK.

Wireless Information

United Kingdom

Data given here is the maximum radio-frequency power transmitted in the frequency band(s) in which the radio equipment operates.

Frequency	Power
Wi-Fi 2 400-2 483,5 MHz	Max 19 dBm

W-iFi 5 150-5 250 MHz	Max 22 dBm
Wi-Fi 5 250-5 350 MHz	Max 22 dBm
Wi-Fi 5 470-5 725 MHz	Max 22 dBm
Bluetooth (BT/BLE): 2 400-2 483,5 MHz	Max 14/9.8 dBm
Thread: 2 400-2 483,5 MHz	Max. 10 dBm
SRD (57-64 GHz)	Max. 13 dBm

Radio frequency interference

Google is not responsible for any radio or television interference caused by unauthorized modification of these devices or accessories, or by the substitution or attachment of connecting cables and equipment other than that specified by Google. The correction of interference caused by such unauthorized modification, substitution or attachment is the responsibility of the user. Google and its authorized resellers or distributors are not liable for any damage or violation of government regulations that may arise from the user failing to comply with these guidelines.

RoHS Compliance

This product is in compliance with Statutory Instrument 2012 No. 3032 The Restriction of the Use of Certain Hazardous Substance in Electrical and Electronic Equipment Regulations.

UK REACH

UK REACH (Registration, Evaluation, Authorization and Restriction of Chemicals, Statutory Instrument 2020 No. 1577) is the UK chemical substances regulatory framework. Google complies with all requirements of the regulation and we are committed to providing our customers with information about the presence of REACH Substances of Very High Concern (SVHCs). For information, you can contact Google at Env-Compliance@google.com

UK Waste Electric and Electronic Equipment Regulations

The WEEE symbol above means that according to local laws and regulations your product should be disposed of separately from household waste. When this product reaches its end of life, take it to a collection point designated by local authorities for safe disposal or recycling. The separate collection and recycling of your product, its electrical accessories, and its battery(ies) will help conserve natural resources, protect human health, and help the environment.

Regulatory Information: Australia

WLAN function of these devices is restricted only to indoor use when operating in the 5150 to 5350 MHz frequency range to reduce the potential for harmful interference to co-channel mobile satellite systems.

Regulatory Information: Singapore

Regulatory Information: Japan

When operating in 5GHz (W52/W53), the device is restricted to indoor use only (except communicate to high power radio).

Motion Sense の使用制限

電波天文学への干渉を与える可能性を避けるために、電波天文台の近くではモーションセンスを無効にする必要があります。

This is a Class B equipment. Although this equipment is intended for use in a residential environment, it could cause poor reception if used near a radio or a television receiver. Please follow instructions in the instruction manual.

VCCI-B

Regulatory Information: India

Recycling, E-waste Management and Handling Statement

In India, this label indicates that this product should not be thrown away with household waste. It should be deposited at an appropriate facility to allow recovery and recycling.

Google declares that your device has been designed and manufactured in compliance with E-Waste (Management) Rules, 2016 (hereafter ""the Rules""), and is specifically in compliance with Rule 16 (1) on the reduction in the use of hazardous substances in the manufacture of electrical and electronic equipment and their maximum allowed concentrations by weight in the homogenous materials (except for the exemptions listed in schedule II).

Improper handling, disposal, accidental breakage, damage or improper recycling of e-waste may present risks, including, but not limited to, fire, explosion and/or other hazards, and uncontrolled waste disposal which may be detrimental to/have adverse effects on the environment as it prevents reuse of resources. Some e-waste may contain hazardous chemicals which, if disposed improperly, may make water, soil and other natural resources toxic. Improper disposal may cause harm to plant, animal and human life."
