

PORTFOLIOS

Take your ideas further.

For us, innovation is the heart of the matter. Allow us to illustrate.

We commercialize high-value patent portfolios for leading innovative enterprises from around the world. Their breakthrough ideas are recognized with patents in a broad range of technology areas, including semiconductors, networking, telecommunications, computer systems, displays, and consumer electronics.

Here we present a sampling of portfolios we've commercialized, many of which have included hundreds or thousands of patent families. In all, we've managed the commercialization of more than 60,000 patents.

Red Oak Innovations Limited ("Red Oak Innovations") acquired over 850 worldwide patents and pending applications covering organic lightLimited ...

Lumitek Display Technology Limited ("Lumitek")...

Tahoe Research Limited ("Tahoe") acquired nearly 5,000 worldwide patents and pending applications from Intel Corporation. This portfolio draws from nearly two decades...

Marlin Semiconductor Ltd. ("MSL") acquired over 800 worldwide patents and pending applications. These patents were acquired from United Microelectronics Corporations (UMC), one of the world's leading semiconductor foundry manufacturers. These patents represent UMC's extensive and longstanding commitment to industry leadership and innovation. MSL's patents cover many aspects of semiconductor structures, processes, and circuits, and apply to many types of products, including those using advanced communication, infrastructure, cloud computing, memory, imaging, and processing technologies.

Longitude Licensing Ltd., as exclusive licensee, conducts the licensing of the MSL portfolio. IPValue Management, Inc. advises and supports Longitude in the licensing of the portfolio. For details on licensing opportunities, please contact MSL.licensing@longitudelicensing.ie.

Trivale Technologies, LLC ("Trivale") acquired over 1,450 worldwide patents and pending applications resulting from more than two decades of R&D by R&D ...

Longitude Flash Memory Solutions, Ltd. ("LFMS") acquired over 500 worldwide patents and pending applications from Cypress Semiconductor, which was acquired by Infineon T...
