CAUTION: This email has originated from a source outside of USPTO. PLEASE CONSIDER THE SOURCE before responding, clicking on links, or opening attachments.

Dear Honorable Director,

Patent Owner objected to the email below for containing improper argument, as seen in the attached email. Petitioner's untimely request comes nearly a month after its Opposition to Patent Owner's Discretionary Denial Brief was filed and should be rejected. If Petitioner's request is granted, Patent Owner requests a sur-reply of equal length.

Respectfully submitted,

Subject: Sagemcom v. Entropic, IPR2026-00263: Request for Authorization to File Supplemental Discretion Opposition

Dear Director Squires,

Petitioner respectfully requests authorization to file a supplemental discretion opposition, not exceeding one page, in IPR2026-00263 to address the Updated Mandatory Notices filed on June 15, 2026. Petitioner proposes to file the reply within one business day of receiving authorization.

Petitioner requests to file the supplemental discretion opposition to explain that the updated mandatory notices moot any potential RPI issue raised by the Discretion Request (Paper 12). Although Petitioner identifies additional potential RPIs only out of an abundance of caution without intending any suggestion, admission, or representation that the identified entities have controlled or could control this IPR, Petitioner moots the issue raised because none of those entities are subject to a time bar, making it unnecessary for the Office to expend resources deciding this issue.

Petitioner has conferred with Patent Owner, and Patent Owner opposes this request. Should the Director grant Petitioner's request, Patent Owner requests a sur-reply of equal length..

If the Director needs additional information to grant this request, Petitioner requests a conference call, and the parties will confer and provide times of mutual availability.

Best regards,

Jessica Kaiser
