IPinvestments Group has been exclusively retained by Zugara, Inc. to implement a monetization program for U.S. Patent No. 10,200,654. The '654 Patent relates to augmented reality (AR) collaboration, specifically providing real-time manipulation of objects within multiple dynamic and augmented video streams. The patented technology supports simultaneously synchronizing an augmented video stream with the video streams from other users. In other words, a participant of an AR collaboration system would be able to connect with users of a second AR system and share their augmented video streams with those users to enhance the AR experience from one participant to many. This approach allows real time manipulation of objects within multiple dynamic and augmented video stream in an AR space.

At this time, the patent is being offered to select operating companies interested in *acquiring the patent and/or exploring a strategic partnership with Zugara*. The patent is also being offered to patent acquisition, enforcement, and financing organizations. We are providing interested parties with a 60-day due diligence period to evaluate the patent, which is summarized in the table below and described further in the attached information document.

Patent No.	Title	Serial No.	Filing Date	Issue Date
10,200,654	Systems and methods for real time manipulation and interaction with multiple dynamic and synchronized video streams in an augmented or multi-dimensional space	13/778,430	02/27/2013	02/05/2019
Pending	Systems and methods for real time manipulation and interaction with multiple dynamic and synchronized video streams in an augmented or multi-dimensional space	16/232,703	12/26/2018	TBD
