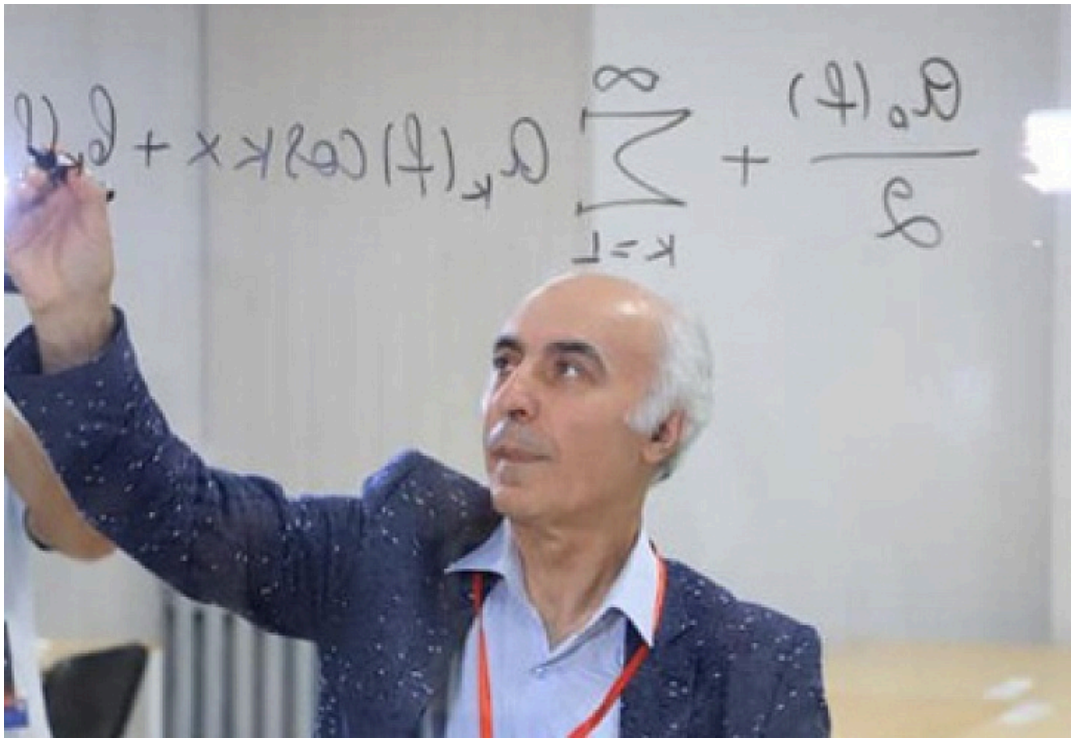
YSU-Krisp AI Lab opens at Yerevan State University

28.06.2022, 14:13

A unique research and educational center "YSU-Krisp AI Lab" has opened at Yerevan State University (YSU), which may have an important role in the development of the artificial intelligence (AI).



YEREVAN, June 28. /ARKA/. A unique research and educational center "YSU-Krisp AI Lab" has opened at Yerevan

State University (YSU), which may have an important role in the development of the artificial intelligence (AI).

The opening of the center was followed by a conference "AI Conf Armenia 2022". It was attended by representatives of the Ministry of Hi-Tech Industry, other state structures, industry companies, as well as students, interested in artificial intelligence and young researchers.

During the conference, there was also a panel discussion on scientific innovations in artificial intelligence.

Krisp was founded in 2016, registered as a startup in the United States, but the team is based in Yerevan. Krisp uses machine learning to remove background noise from audio in real time during calls via Skype, Slack, Viber, WhatsApp, Zoom, Webex or other services. It was named winner in the “Best Use of AI and Machine Leaning Apps and Software” category, alongside Adobe’s Photoshop Neural Filters.-0-
