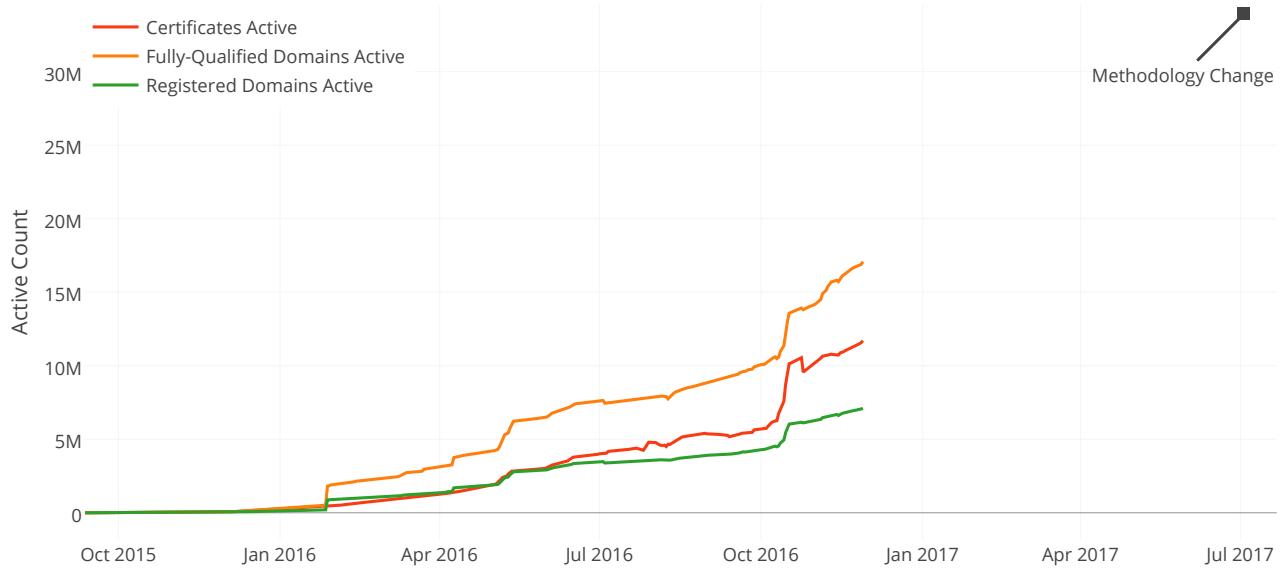
Let's Encrypt Stats

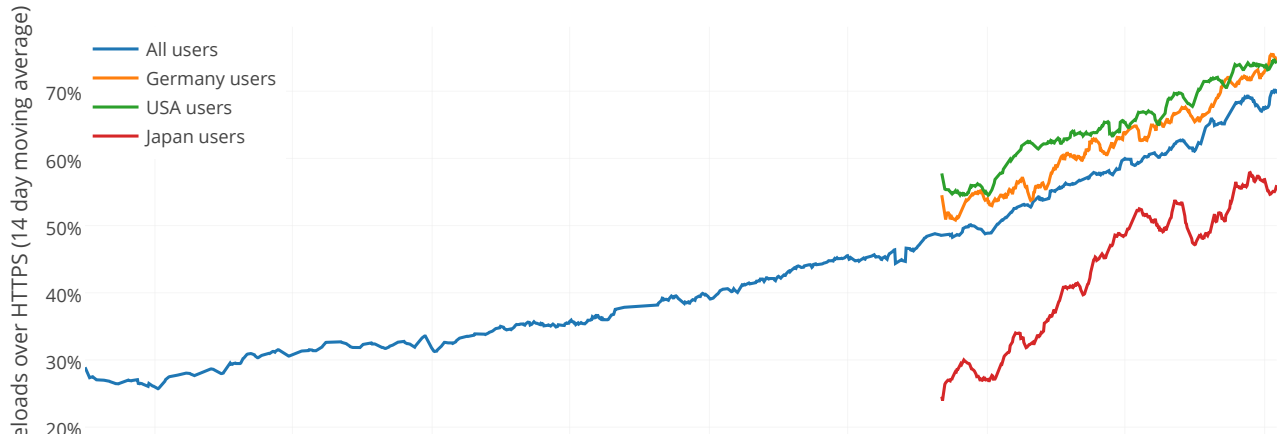
At present, the “Percentage of Web Pages Loaded by Firefox Using HTTPS” graph is current. There is maintenance work underway and the “Let’s Encrypt Growth” and “Let’s Encrypt Certificates Issued Per Day” statistics are not up-to-date. We hope to have these graphs back up and running soon.

Let's Encrypt Growth

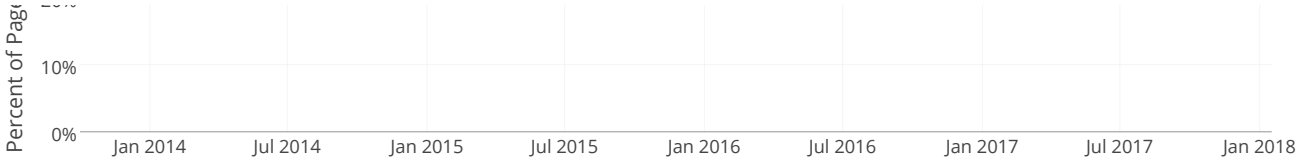


Percentage of Web Pages Loaded by Firefox Using HTTPS

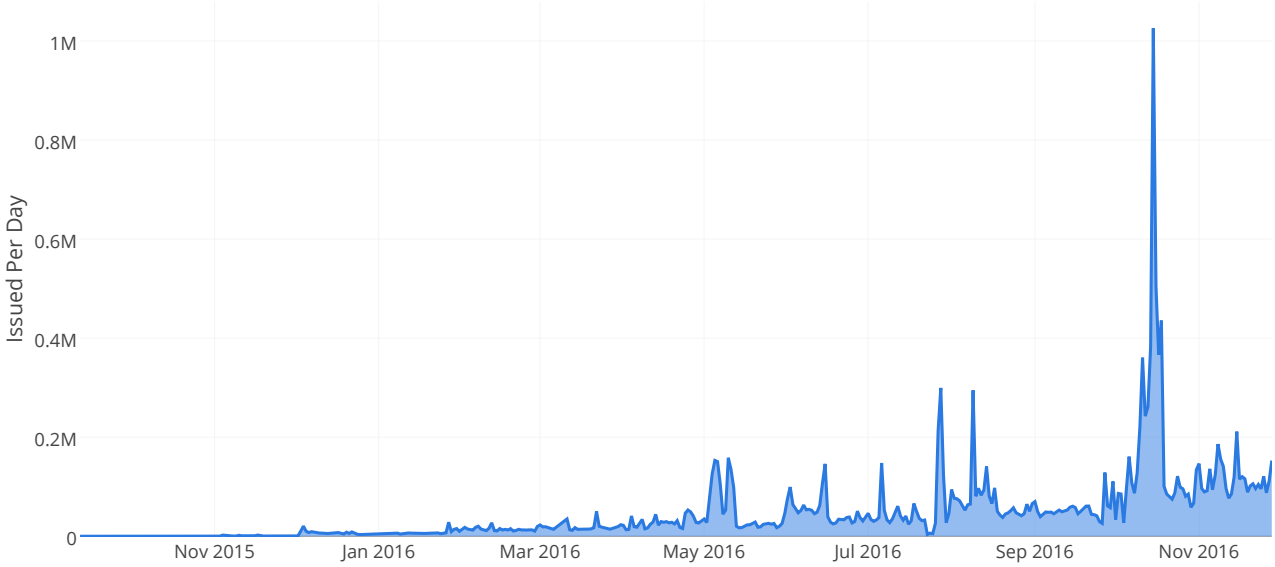
(14-day moving average, source: Firefox Telemetry)



OKTA, INC. 1061



Let's Encrypt Certificates Issued Per Day



Code

Since the 2017-07-03 methodology change:

- ct-mapreduce ingests data from CT logs and produces statistics about Let's Encrypt.
- HTTPS adoption comes from Mozilla's Telemetry SSL Ratios dataset.

Before 2017-07-03:

- ct-sql ingests data from Censys.io, CT logs, and Firefox Telemetry.
- ct-sql-queries contains the SQL queries run periodically to construct the data.

Support a more secure and privacy-respecting Web.
