Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

mailroom@dreschiplaw.com
jdresch@dreschiplaw.com
john_dresch@hotmail.com

Office Action Summary	Application No. 13/418,335	Applicant(s) MOSKOWITZ ET AL.	
	Examiner PEDRO PHILOGENE	Art Unit 3733	AIA (First Inventor to File) Status No

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 March 2012.
☐ A declaration(s)/affidavit(s) under **37 CFR 1.130(b)** was/were filed on _____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ An election was made by the applicant in response to a restriction requirement set forth during the interview on _____; the restriction requirement and election have been incorporated into this action.
- 4) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 5) ☒ Claim(s) 1-88 is/are pending in the application.
5a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 6) ☐ Claim(s) _____ is/are allowed.
- 7) ☒ Claim(s) 1-88 is/are rejected.
- 8) ☐ Claim(s) _____ is/are objected to.
- 9) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

* If any claims have been determined allowable, you may be eligible to benefit from the **Patent Prosecution Highway** program at a participating intellectual property office for the corresponding application. For more information, please see http://www.uspto.gov/patents/init_events/pph/index.jsp or send an inquiry to PPHfeedback@uspto.gov.

Application Papers

- 10) ☐ The specification is objected to by the Examiner.
- 11) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

Certified copies:

- a) ☐ All b) ☐ Some c) ☐ None of the:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Interim copies:

- a) ☐ All b) ☐ Some c) ☐ None of the: Interim copies of the priority documents have been received.

Attachment(s)

- | | |
|--|---|
| 1) ☒ Notice of References Cited (PTO-892) | 3) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____ |

Paper No(s)/Mail Date _____ | 4) ☐ Other: _____ |

Specification

The disclosure is objected to because of the following informalities: the Attorney Docket Numbers in the specification must be removed. Appropriate correction is required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to

Art Unit: 3733

be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-88 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-42 of U.S. Patent No. 7,972,363.

Although the conflicting claims are not identical, they are not patentably distinct from each other because it is clear that all the elements of claims of the application are to be found in claims of the patent. The difference between claims of the application and claims of the patent lies in the fact that the patent claims includes many more elements and are thus much more specific. Thus the invention of claims of the patent is in effect a "species" of the "generic" invention of claims of the application. It has been held that the generic invention is "anticipated" by the "species". See *in re Goodman*, 29 USPQ2d 2010 (Fed. Cir. 1993). Since claims of the application are anticipated by claims of the patent, they are not patentably distinct.

Claims 1-88 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 41-117 of copending Application No. 13/103,994. Although the conflicting claims are not identical, they are not patentably distinct from each other because it is clear that all the elements of claims of the application are to be found in claims of the copending application. The difference between claims of the application and claims of the copending application lies

Art Unit: 3733

in the fact that the copending application claims includes many more elements and are thus much more specific. Thus the invention of claims of the copending application is in effect a "species" of the "generic" invention of claims of the application. It has been held that the generic invention is "anticipated" by the "species". See *in re Goodman*, 29 USPQ2d 2010 (Fed. Cir. 1993). Since claims of the application are anticipated by claims of the copending application, they are not patentably distinct.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 1-88 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-87 of copending Application No. 13/401,829. Although the conflicting claims are not identical, they are not patentably distinct from each other because it is clear that all the elements of claims of the application are to be found in claims of the copending application. The difference between claims of the application and claims of the copending application lies in the fact that the copending application claims includes many more elements and are thus much more specific. Thus the invention of claims of the copending application is in effect a "species" of the "generic" invention of claims of the application. It has been held that the generic invention is "anticipated" by the "species". See *in re Goodman*, 29 USPQ2d 2010 (Fed. Cir. 1993). Since claims of the application are anticipated by claims of the copending application, they are not patentably distinct.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 1-88 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-5, 21-86, 88 of copending Application No. 13/418,323. Although the conflicting claims are not identical, they are not patentably distinct from each other because it is clear that all the elements of claims of the application are to be found in claims of the copending application. The difference between claims of the application and claims of the copending application lies in the fact that the copending application claims includes many more elements and are thus much more specific. Thus the invention of claims of the copending application is in effect a "species" of the "generic" invention of claims of the application. It has been held that the generic invention is "anticipated" by the "species". See *in re Goodman*, 29 USPQ2d 2010 (Fed. Cir. 1993). Since claims of the application are anticipated by claims of the copending application, they are not patentably distinct.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-8, 15, 19, 20-57, 75-86, 88 are rejected under 35 U.S.C. 102(e) as being anticipated by Waugh et al. (2008/0249569).

With respect to claims 1, 19, 85, 86, Waugh et al disclose a universal, intervertebral combination bone fusion spacer and self-drilling screw apparatus (100) for insertion into a disc between a first vertebral body and a second vertebral body and fusion of the first vertebral body to the second vertebral body via biological bone fusion and screw fusion, the apparatus comprising an intervertebral cage (102) including a first integral screw guide (126) having a first predetermined angle and a second integral screw guide (126) having a second predetermined angle; a first screw member (106) disposed in the first integral screw guide at the first predetermined angle and at least partially within the intervertebral cage; as best seen in at least FIGS.1-14; a second screw member (106) disposed in the second integral screw guide at the second predetermined angle and at least partially within the intervertebral cage; as best seen in FIGS.1-14; and a screw locking mechanism (104) that secures at least one of the first screw member and the second screw member in one of the first integral screw guide and the second integral screw guide, wherein each of the first integral screw guide and the second integral screw guide is angled to orient the first screw member and the second screw member bi-directionally in opposite direction; as best seen in at least Fig.3; wherein the screw member includes a screw head and a threaded body, as best seen in Fig.3, wherein the second screw member includes a screw head and a threaded body, as best seen in Fig.3.

With respect to the method claims, the method steps, as set forth would have been inherently carried out in the operation of the device, as set forth above, and as set forth in para[0055-0060].

With respect to claims 2-8, 15, 20-57, 75-84, 88, Waugh et al discloses all the limitations, as set forth in at least para[0026, 0028-0040, 0044-0054]; and as best seen in FIGS.1-14.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9-18, 58-74, 87 are rejected under 35 U.S.C. 103(a) as being unpatentable over Waugh et al. (2008/0249569) in view of waugh et al. (2008/0249575).

It is noted that Waugh'569 discloses all the limitations, except for a fourth screw member and a fourth internal screw guide and a wall forming four quadrants wherein the first quadrant and the fourth quadrant are opposed to the second quadrant and the third quadrant with respect to the first axis, and the first quadrant and the second quadrant are opposed to the third quadrant and the fourth quadrant with respect to the second axis, the first quadrant is diagonally opposed to the third quadrant, and the second quadrant is diagonally opposed to the fourth quadrant; as claimed by applicant. However, in a similar art, Waugh'575 provides the evidences of the use of a cage having a fourth screw member and a fourth internal screw guide and a wall forming four

Art Unit: 3733

quadrants wherein the first quadrant and the fourth quadrant are opposed to the second quadrant and the third quadrant with respect to the first axis, and the first quadrant and the second quadrant are opposed to the third quadrant and the fourth quadrant with respect to the second axis, the first quadrant is diagonally opposed to the third quadrant, and the second quadrant is diagonally opposed to the fourth quadrant so as to permit the cage to better secure to the vertebral bodies.

Therefore, given the teaching of waufg'575, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the device of Waugh'569, as taught by Waugh'575, by incorporating a fourth screw member and guide and a wall with four quadrants so as to permit the cage to better secure to the vertebral bodies.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

2009/0105830	4-2009	Jones et al.
