JOINT CLAIM CONSTRUCTION CHART

Pursuant to Paragraph 8 of the Amended Scheduling Order (D.I. 34), the parties hereby submit their Joint Claim Chart (Ex. A) for claim construction proceedings for U.S. Patent Nos. 10,585,959 (the “’959 Patent”); 10,867,001 (the “’001 Patent”); 11,100,184 (the “’184 Patent”); and 11, 971,937 (the “’937 Patent”) (collectively, “Asserted Patents”). The Joint Claim Chart identifies the disputed claim terms and the parties’ proposed constructions of those terms and supporting intrinsic evidence. Each citation to a figure incorporates by reference, as if fully set out herein, any associated description or discussion of the figure. Similarly, each citation to a description or discussion of any figure incorporates by reference each figure described or discussed as if fully set out herein.

Each party reserves the right to rely on other portions of the intrinsic record to refute positions taken by the other party during the Markman proceedings.

The parties will exchange extrinsic evidence on which they intend to rely on or before Monday, June 1, 2026.

The citation to any portion of the intrinsic record is not to be construed as an admission by that party that the cited portion defines the term. Moreover, the parties further agree that any party may argue that the cited portions are exemplary, and thus indicate that no special definition governs, and that the ordinary meaning should thus govern.

Additionally, each party reserves the right to assert that its proposed construction is supported by the ordinary meaning of the term, and to introduce extrinsic evidence to the extent the Court permits such evidence.

¹ Dependent claims not expressly including the Claim Term are not separately listed.

² During the parties' exchanges of Claim Terms, AccuSearch objected to combining Claim Terms in the manner Google did. AccuSearch believes that it fails to properly account for the differences among the various claims and leads to grammatical inconsistencies. Nonetheless, AccuSearch includes intrinsic evidence to address what it believes to be the common issue raised by Google's proposed constructions. AccuSearch reserves the right to address the problems with forcing a single construction across differing patents and claims in its briefs.

³ Because the '959, '001, '184, and '937 patents are members of a common patent family sharing a common specification, citations to the specification herein are made only to the '959 patent. Corresponding disclosures appear in each of the other Asserted Patents. Citations to the “Abstract,” however, will refer to the abstract of the applicable patent.

⁴ Google provides cites to the '937 patent for convenience and incorporates by reference citations the corresponding text and figures of other asserted patents, which share a specification with the '937 patent.
