ToutVirtual to Offer Product Suite via BT Engage IT

Delivers single view to manage virtualization and cloud computing infrastructure.

[Get Email Alert](#)[RSS](#)

Carlsbad, CA, June 01, 2012 --

([PR.com](#))-- ToutVirtual, an emerging leader in virtualization intelligence and system optimization software for cloud computing infrastructures, today announced that it will offer its product suite through BT Engage IT, the IT services division of BT Business.

The VirtualIQ suite of products is designed to support virtual server room operations through three stages of virtualization — design, deployment, and delivery — helping users make correct decisions for virtualization optimization.

The VirtualIQ dashboard provides decision-making information in a single, integrated web console that is simple to install and use. VirtualIQ provides a "single pane of glass" across physical and virtual infrastructure, including support for all leading hypervisors from Citrix, Microsoft, Oracle and VMware.

a "single pane of glass" across physical and virtual infrastructure, including support for all leading hypervisors from Citrix, Microsoft, Oracle and VMware.

"Hypervisors have become a commodity," said Andy Nabbs, business manager for virtualization and end-user computing, BT Engage IT. "The key challenges faced by customers are around management processes for virtualization and cloud. ToutVirtual's VirtualIQ products help by offering a 'single pane of glass' to give holistic visibility and control of their infrastructure."

"The signing of the agreement with BT Engage IT is an important milestone for our company," said Jess Marinez, president of ToutVirtual. "As we are increasingly gaining market recognition and sales traction, BT Engage IT's wide reach to customers in the UK provides us with the ideal sales channel for our VirtualIQ line of products."

About ToutVirtual

ToutVirtual, Inc. is an emerging leader in virtualization intelligence and system optimization software to manage and automate cloud computing processes and ease the transition from design to deployment to delivering services. VirtualIQ, the company's flagship product suite, allows organizations to obtain a holistic view and control of their virtual infrastructure including servers, applications, storage, and clients independently of the underlying cloud computing platform through a single pane of glass web console. ToutVirtual's unique patent-pending software operates across multiple platforms and is multi-tier to prolong product life, protect IT investments, and maximize ROI. Additional information about the company and its products is available at <http://www.toutvirtual.com>
