10 virtualization companies to watch

Feature

Aug 20, 2007 • 1 min

These technology innovators promise products that boost performance, make management easier or otherwise enhance your virtualization experience

These 10 technology companies — 3Leaf Systems, Attune Systems, InovaWave, Insystek, Kidaro, Marathon Technologies, Provision Networks, Scalent Systems, ToutVirtual and XDS — offer innovative virtualization products that improve performance and make management easier.

Everybody knows virtualization isn't just about VMware anymore. Many users are past the rush to server virtualization and now need to increase the benefits of the move. They need not only to improve efficiency, performance and management, but also to find ways to extend the technology to their desktop, storage and mobile environments. That's a heavy burden. Product choices can be overwhelming, and a starting point difficult to find. Get on your way with promising products from these 10 companies:
