Subject: Re: Carma United States Patent 7,840,427 Carma - Uber

Hi Carma team,

We are following up from our last conversation to close the loop on USP 7,840,427. Based on our thorough review of the claims and the specification, the patent has a number of requirements that Uber's services simply do not perform.

As an example, claim 1, which you highlighted for consideration, requires:

- establishing a network of nodes in said computer network representing a plurality of pick-up points and a plurality of drop-off points;
- abstracting a geographic representation of a predetermined transport vehicle journey by calculating places where the predetermined transport vehicle journey intersects said nodes.

In contrast, Uber's services are dynamic in nature and do not use a "predetermined transport vehicle journey" as required by claim 1.

If you have any questions or want to discuss this matter further, please don't hesitate to contact us.

Jay

Hi Jay

I'll check with the team and get back to you later today.

Thanks

Hi Lawrence,

We are available April 17 3-5pm PT and April 19 9-10am PT, 12-1pm PT. Do any of these times work for you?

Thanks,
Jay

Hi Jay

Week of April 16th is good for me. Can you give us a few dates and times and we will see what we can make work

Hi Lawrence,

Bill is out next week. How about this Thursday morning or afternoon? If not, perhaps the following week of April 16?
