

PTAB Appeals data at a glance March 2026

The PTAB Appeals Dashboard provides important data on the USPTO's PTAB operations. Access average appeal pendency information, as well as other critical indicators, such as the number of appeals in inventory, the number of appeals filed, and the appeals outcome all by both fiscal year and technology. This tool provides the intellectual property community with a better understanding of the USPTO's PTAB appeals process and enables applicants to make more informed decisions when deciding whether to appeal their applications.

The data on this page is updated monthly following the completion of data collection. Updates are typically finalized by the end of the subsequent month (e.g., January data is typically available by the end of February).

If you have any questions, comments, or feedback, email PTABStatisticsQuestions@USPTO.GOV.
