Celebrating 30 years

We are one of the largest and most advanced semiconductor manufacturing facilities in the world

US Fab / Company

History

Austin

Taylor

Awards & Certificates

Governance

**February 1996**

Arrival in Austin: the first fabrication plant opens one year later

**June 2007**

Second fabrication unit opens to manage increased product demands

**August 2017**

Expansion to provide additional space for office, production and amenity needs

**February 1996**

Arrival in Austin, plans begin for first fabrication (Fab) unit

July 1997

Completed construction on Cu (Copper) Fab on Parmer Lane in Austin, Texas

January 1998

Production begins on 64Kb DRAM memory chips

April 2006

Groundbreaking for second fabrication unit

**June 2007**

Completed construction on second

US Fab / Company

HistoryAustinTaylorAwards & CertificatesGovernance

August 2009

Fab converts to 300mm copper process

December 2007

Production begins on NAND Flash technology

June 2010

Investment of \$3.6 billion in System LSI technology

June 2011

System LSI Mobile SOC production begins

August 2012

Transitioned out of flash memory production

June 2013

Beginning of 28nm (nanometer) production

January 2015

World's first Fab to produce 14nm technology

February 2016

20th anniversary in Austin
