

Europe / Americas

CVC's Europe / Americas private equity strategy is focused on control or co-control investments in market-leading businesses across these regions

CVC has the most geographically diverse and long-established pan-regional office network of any private equity firm in Europe. 21 of CVC's 29 offices are located in EMEA and the Americas, providing a deep and local knowledge of the markets in which it operates.

The Europe / Americas funds have invested through multiple economic, industry and market cycles. The long-term nature of these investments, the ability to react quickly to adverse market conditions, and the experience gained from successfully navigating previous macroeconomic crises, have allowed the returns on the funds to deliver consistent performance.

Fundamentally sound, well-managed and cash-generative businesses

CVC invests in high-quality, cash-generative and growing businesses with:

Defendable and leading market positions

Significant and predictable cash flows

Diverse products and services that customers require in good and bad times

Competitive leadership in terms of products, innovations, know-how and cost structures

Well-diversified customer bases, diverse products and broad geographic footprints

CVC-PE

CVC-PE is an open-ended, private equity investment vehicle investing directly into companies and other private assets alongside CVC's private equity funds.
