

# AirSense 10 Series

AutoSet CPAP

AirSense™ 10 is the world's most widely used series of CPAP and APAP machines, each designed to deliver high-quality therapy for a better night's sleep.

Each machine<sup>1</sup> gives you access to myAir™ – a free online support program and app<sup>2</sup> that syncs with your mobile or web-based device to provide a nightly sleep score, coaching and more to help you stay on track.

[How can I help?](#)

*\*Please note, the only model available for direct purchase is the AirSense 10 Card-to-Cloud machine.*

# Product highlights

Every AirSense 10 machine includes a wide range of features designed to deliver comfortable therapy, as well as myAir access to help you stay on track throughout your sleep apnea treatment journey.

- The AirSense 10 series includes **two different models**: CPAP and AutoSet.
- **Built-in humidifier and Climate Control Auto setting** provide breathing comfort.
- **User-friendly controls** and an intuitive interface make it simple to navigate settings and the nightly sleep report.
- **AutoRamp™** feature delivers a low airflow pressure to help you fall asleep, then steadily increases to your prescribed level.
- **Expiratory pressure relief (EPR)™** maintains regular airflow pressure while you inhale and reduces pressure to make it easier when exhaling.
- **myAir** is an online support program and app that automatically sends your therapy data to your computer or smartphone. It lets you know how you slept the night before and provides personalized coaching tips and encouragement to help you stay on track with your therapy.

## Here's how it all works together

1. Machine pushes air through the tubing to the mask
2. Mask (frame, cushion and headgear) allows pressurized air to enter the airway
3. Humidifier adds moisture to the air you breathe
4. 90w power supply unit provides continuous power
5. Filters are used to keep allergens out of the airflow

## Understanding the AirSense 10 models

## CONSISTENT PRESSURE

### AirSense 10 CPAP

These are fixed-pressure machines, meaning they deliver a consistent pressure that is set by your doctor.

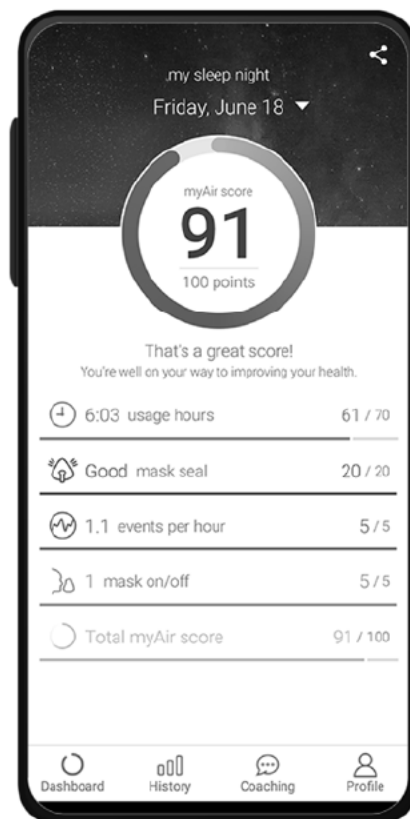

## AUTO-ADJUSTING PRESSURE

### AirSense 10 AutoSet

Auto-adjusting machines change airflow pressure levels throughout the night based on your needs.

# Would you like an extra hour of sleep every night?

**Millions of people** who use myAir to track their CPAP treatment consistently sleep 1 hour longer than other CPAP users.<sup>3</sup>
