SKECHERS U.S.A., INC.,

Case No. 2:25-cv-00744-JRG

**PLAINTIFFS' DISCLOSURE OF ASSERTED
CLAIMS AND INFRINGEMENT CONTENTIONS**

Pursuant to the Court's October 20, 2025, Order and Local Patent Rules 3-1 and 3-2, Plaintiffs make the following Disclosure of Asserted Claims and Infringement Contentions and Accompanying Document Production as to Defendant Skechers U.S.A., Inc. ("Skechers"). This document collectively refers to Plaintiffs as either "Plaintiffs" or "HFL."

HFL waives no claim, contention, or argument regarding the factual and/or legal details of the following preliminary infringement contentions. The following should not be construed as HFL's preliminary construction of any asserted claim or claim term. HFL reserves the right to change, amend, supplement, or otherwise alter these contentions based on receipt of further information that will be provided by, produced by, or otherwise made available by Skechers through discovery that is not available at the time of these disclosures. For example, HFL does not have available to it, and Skechers has not yet produced, Skechers documents describing all of its products with designs and functionality similar to what is described in this document. The claim charts in the attached Exhibits are not designed to represent the entire scope of infringement but

are merely intended to illustrate examples of manners in which the Accused Products infringe the identified claims of HFL's Patents. Further, the division of claim elements in the attached claim charts is neither intended to be a modification of the claim language itself nor an admission that the claims should be construed by the division. Rather, the division of claim elements is provided for convenience and clarity. HFL's contentions apply to Skechers' products and any other similar past, present, or future products with the same or substantially similar features. HFL reserves all rights to rely on additional evidence in its possession and evidence yet to be discovered.
