Re: Request for Collaboration Related to BK Technologies Inc.'s Patents
U.S. Patent Nos. 11,997,568 and 12,375,890

Dear Mr. Blumstein,

This firm represents BK Technologies Inc. ("BK") in intellectual property matters. BK is a company that has invested significantly in innovation and technology development in the field of land mobile radios, particularly for use by emergency first responders. In connection with its research and development efforts, BK has developed groundbreaking inventions related specifically to systems and methods for adding non-subscribers to talkgroups for a Push-To-Talk-over-Cellular (PTToC) system. These patents are a testament to BK's commitment to advancing technology and safeguarding its intellectual property.

At the recent International Association of Chiefs of Police (IACP) conference held on October 18-21 in Denver, Colorado, AT&T showcased its FirstNet Fusion™ solution related to push-to-talk communication for first responders. We were excited to see your emerging interest in PTToC non-subscriber technology, particularly in light of BK's discussions with Bob Fowler commencing on July 2, 2024, where BK specifically disclosed its innovations to AT&T and discussed its relationship with StreamWide. We understand that AT&T's FirstNet Fusion™ system is also supported by StreamWide.

To foster a collaborative and respectful industry environment, we would like to invite you to review BK's portfolio of patents, which includes U.S. Patent Nos. 11,997,568 and 12,375,890 (copies attached for your reference). We believe that understanding each other's intellectual property can lead to a more innovative and cooperative industry atmosphere where we jointly improve first responder interoperability, a critical tenant of the FirstNet mission.

We are keen to maintain a positive working relationship with your company and are open to discussions about our respective innovations and potential collaborations. Our client would very much like to discuss this matter further and asks that you contact me directly via email at lisa.moyles@wbd-us.com or telephone at (919) 755-2144, once you have had a chance to review the attached patents. We would appreciate hearing from you by Monday, December 1, 2025.

Thank you for your attention to this matter, and we look forward to the possibility of future cooperation.

Best regards,

Lisa Moyles
