

IMMANUEL FREEDMAN, Ph. D, SMIEEE, MInstP, CPhys, FRSM

942 Clubhouse Drive
Harleysville, PA 19438
215-527-1779

SUMMARY OF EXPERIENCE

Systems, Signals and Algorithms Consultant with over 30 years experience of video, imaging, modeling, simulation, and systems analysis, design, development, and testing. He has served as an expert consultant providing technical analysis related to patent infringement, patent validity, and research tax credit.

EDUCATION

Ph. D., Physics, University of Durham, England, 1986
B.Sc. (Honors), Physics, University of Durham, England, 1979

LICENSES

Registered Patent Agent #51,704

EXPERIENCE

Freedman Patent	Harleysville, PA	Oct '21-present
------------------------	-------------------------	------------------------

Sole Proprietor

He provides consulting and expert witness services to industry and the legal profession.

Dr. Freedman was also Vice-Chair of IEEE P2673, a standard for digital biomedical data files with 3D anatomical mapping for big data and augmented intelligence systems and Secretary for IEEE 1900.8, a standard for the storage format of RFML datasets and the interfaces that connect stages of the RFML model training pipeline with use cases for RF signal detection, classification, and characterization, as well as identification of RF emitters.

He also serves as a member of IEEE P2795. This standard defines metadata and frameworks that support interactions between nodes involved in a trusted multipart handshake. This includes discovering data models and processing aspects available at a remote location, configuring analytics appropriately, and exchanging vetted critical analytic results.

As a member of the American Association of Pharmaceutical Scientists, he served as Former Chair, Pharmaco-Imaging Community, Former Chair, Predictive Modeling Community, and 2017 Member, Predictive Modeling Task Force.

State University of New York at Buffalo	Buffalo, NY	Jun '17-present
Volunteer Researcher		

Dr. Freedman serves as a Senior Author and mentor to doctoral candidates, supporting the analysis of chaotic and non-chaotic biological systems utilizing chaos synchronization methodology.

**Media Logic Systems Ltd.
Chief Systems Engineer****Fleet, England UK****Jan '00-Oct '02**

Dr. Freedman designed and developed a novel live interactive television system (iSeeTV) in which served as a User Interface for customer communication with human sales agents in video-enabled call centers implemented via television and telephone, deployed to 50,000 subscribers of Telewest, UK.

He researched and developed tools and encoder systems to optimize image quality at prescribed latency and bit rate for distributing live video and audio streams encoded via low latency methods including MPEG-2 Simple Profile at Main Level (CATV), MPEG-4 Visual Profile with background sprite coding, and H.263+ (now known as H.264).

Dr. Freedman investigated the feasibility of wavelet-based software encoding schemes with motion compensation and perceptual quantization described by the MPEG Standards Committee Interframe Wavelet Ad Hoc Group. He interfaced video streams via ATM transport to Telewest, UK regional CATV head-ends switched via Harmonic Narrowcast Gateways for distribution via Video On Demand or Near Video On Demand systems to customers' homes.

**Replay Networks, Inc.
Contractor****Mountain View, CA****Dec'99-Jan '00**

Dr. Freedman researched and developed a method of porting an application developed for a Digital Video Recorder in the embedded C software language to standard set top box (STB) middleware to eliminate high development and maintenance costs associated with developing custom STBs. He optimized bit rate and encoder chip parameters to yield high-quality time-shifted MPEG-2 streams controlled by VCR-like consumer controls.

**Sun Microsystems, Inc.
Software Engineer (Contractor)****Cupertino, CA****Mar '99-Nov '99**

Dr. Freedman researched and developed a Distributed Component Object Model (DCOM) software interface between a TV Control Graphical User Interface and the Microsoft Broadcast Application Programming Interface (API) to improve the visual quality of interactive TV displays derived from UDP/IP datagrams synchronized with MPEG-2 audio/video packet data.

The software interface additionally resolved discontinuities in Presentation Timestamp according to a Normal Play Time defined by a Digital Storage Media –Command and Control standard.

He designed and implemented an API written in the pJava and Visual C++ software languages under the Windows CE operating system for the Motorola DCT 5000+ DTV Set Top Box based on the Advanced Television Systems Committee digital television standard.

**Rockwell Collins, Inc.
Lead Systems Engineer (Contractor)****Pomona, CA****Oct '98-Mar '99**

As Lead Systems Engineer with a two-engineer span of control, Dr. Freedman timely delivered harmonized requirements for an MPEG-2 in-flight entertainment system similar to a cable television system based on an advanced intranet implemented on an aircraft.

He trained his team to use a Rational Unified software development process based on a Spiral Development Model implemented in the Universal Modeling Language using the Rational/Rose 98i Computer Aided Software Engineering tool.

Stratagene, Inc. La Jolla, CA Aug '98-Oct '98
Engineer (Contractor to Permanent)

Dr. Freedman evaluated frame grabber hardware for resolution and quality of time-integrated imagery and specified algorithms, including cluster analysis and trending, further developing a user interface for a digital image processing system supporting gene-cloning science.

United Advanced Technologies, Inc. Long Beach, CA Feb '98-Aug '98
Firmware Engineer (Contractor)

Dr. Freedman analyzed and developed a nine-camera remote surveillance system with a Graphical User Interface developed in the Visual C++ software language under a Microsoft Windows operating system host and firmware developed in the embedded C software language implemented on Analog Devices' ADV601 wavelet video hardware.

He researched and developed Video for Windows parameters and on-chip settings for video quality control to deliver full-frame video over Plain Old Telephone Service telephone lines at a quality acceptable to retail store security services.

KeyInfo Services, Inc. Spring Valley, CA Mar '98-May '98
Database Consultant

Dr. Freedman administered a database for providing web-based information developed in the Sybase SQL software language.

Mitek Systems, Inc. San Diego, CA Aug '97-Jan '98
Engineer (Contractor)

Dr. Freedman researched and developed an Intelligent Character Recognition digital image processing system based on neural nets implemented in the C software language to read handwritten checks and paper forms with about 80% accuracy on a real-time system deployed throughout the banking industry.

He researched and developed algorithms based on mathematical morphology implemented via neural nets to verify handwritten signatures on printed checks.

Symbionics Ltd. Cambridge, England UK Aug '97
Principal Engineer (Temporary)

Dr. Freedman analyzed manpower estimates for design, development and testing of an MPEG-2 interactive television set-top box based on an OpenTV interactive television standard implemented for the "Open...." television commerce system deployed Spring 1999 in the United Kingdom.

VideoActive/HCR, Inc. Yorba Linda, CA Jan '97-Dec '97
Contractor

Dr. Freedman reviewed, analyzed and developed proprietary disk layout software coded in the Visual C++ software language for a Near Video on Demand system delivering movies over telephone systems such as Asymmetric Digital Subscriber Lines (ADSL).

Dr. Immanuel Freedman, Inc. **Harleysville, PA** **Mar '96-Jan '16**
President

He provided technical consulting services to industry.

Anugraha **La Jolla, CA** **Jan '96-Jan '97**
Sole Proprietor

Dr. Freedman researched and developed algorithms and processes to compress fine art photography at image quality acceptable to artists based on the JPEG imaging standard implemented with image pre-processing and adaptive quantization.

Armor Safe Technologies, Inc. **Vista, CA** **Sep '95-Mar '96**
Firmware Engineer (Contractor)

Dr. Freedman developed an ARINC RS422/RS485 serial link communications software component written in the embedded C software language for a major confidential client specialized in retail store security. His timely software delivery enabled the client to capture a firm order with additional future potential.

Comstream, Inc. **San Diego, CA** **Jul '96-Aug '96**
Firmware Engineer (Contractor)

Dr. Freedman integrated an MPEG-2 set-top box with OpenTV interactive television middleware programmed in the Microtec C language, ported to a Motorola 68340 processor under the pSOS operating system. He implemented native bindings of the middleware for the On-Screen Display (Graphical User Interface) and communications stack.

General Instrument, Inc. **San Diego, CA** **Dec '95-May '96**
Senior Staff Engineer

Dr. Freedman reviewed and evaluated methodologies, design and development and performance models for the DigiCipher 2 cable television conditional access system. He migrated a subscriber authorization system written in the C++ language from a DEC Alpha computing platform under the OpenVMS operating system to a Sun SPARCstation computing platform under the Solaris operating system.

Optivision, Inc. **Davis, CA** **Mar '95-Sep '95**
Consultant

Dr. Freedman researched and developed rate control algorithms and software based on MPEG -2 Test Model 5 for the OPTIVideo MPEG-2 video encoder written in the Visual C++ and C software languages.

He researched and developed adaptive quantization algorithms based on a JPEG-3 draft standard for possible inclusion in the draft National Imagery Transmission Format imaging standard.

He researched and developed algorithms to improve the quality of gray scale image compression for the medical imaging DICOM Standard by providing a lossless hybrid algorithm encoding image residuals with a diagonal Golomb code based on an Enhanced Universal Trellis Coded Quantization algorithm.

**Federal National Mortgage Association Washington, DC
Software Engineer (Contractor)****Jul '94-Jan '95**

Dr. Freedman designed and developed a Graphical User Interface to monitor and validate loan servicer input for the Loss Mitigation Project. He developed the software in the C software language for a Sun SPARCstation 2 platform under a UNIX operating system.

**Hughes STX Corporation Greenbelt, MD
Senior Systems Engineer****Sep '88-Jun '94**

As Spacecraft and Attitude Analyst for a mission to map the relict radiation from the Big Bang at near infrared, far infrared and microwave wavelengths, Dr. Freedman developed, simulated and calibrated the Cosmic Background Explorer (COBE) Attitude Determination System to yield a stable solution for the spacecraft orientation at a quality factor of 2 above customer's expectation. This solution included a quaternion estimator implemented via an Extended Kalman Filter.

He developed, calibrated and simulated the COBE spacecraft subsystem and provided graphical and statistical analysis of the spacecraft telemetry-word database. When a gyroscope failed during the Launch and Early orbit mission phase, he responded rapidly by plotting graphs of the thermal subsystem telemetry until he found a possible cause of failure.

Dr. Freedman developed a spatially referenced database based on a quad-tree data structure, which stored scientific data for comparison of sky maps from COBE with sky maps from other missions that served as a diagnostic user interface for the Diffuse Infrared Background Experiment.

For the COBE mission, he led the systems engineering and end-to-end development of a novel system for compressing data that combined scientific modeling with statistical data compression. He proposed the system concept and prepared the system level specification, design and project schedule. With a team of two engineers, Dr. Freedman tuned the compression system performance to yield a throughput greater than uncompressed data processing with a compression factor of 22-90%. He further designed and developed evaluation tools to ensure the user-transparent system-wide compression of a 380GB dynamic data base at image quality acceptable to scientists.

**University of Maryland College Park, MD
Research Associate****Jun '87-Sep '88**

Dr. Freedman researched and developed digital image methods to process terrain models for a combat information processor sponsored by Battelle. It was developed in the C software language on Sun Microsystems workstation for porting to a supercomputer under a UNIX operating system.

He designed low-complexity algorithms for filtering, segmenting, clustering, and path planning based on digital images organized by quad-tree data structures.

**University College London London, England UK
Research Assistant****Sep '86-Jun '87**

Dr. Freedman developed digital image processing algorithms to improve image and stereo-matching quality for a digital terrain modeling system based on satellite data.

As part of a UK Government Fifth Generation computing project (Alvey MMI-237) in collaboration with Thorn EMI, Royal Signals and Radar Establishment, and Laser Scan Ltd., he developed software and algorithms for affine transformation, edge filtering, kriging interpolation and image stereo matching with sub-pixel acuity.

**Laser-Scan Ltd.
Software Engineer****Cambridge, England UK Sep '85-Sep '86**

Dr. Freedman researched and developed algorithms based on the mathematics of tessellation for efficient manipulation of spatially referenced data on serial computers and transputer arrays for a UK Government Fifth Generation computing project (Alvey MMI-237) in collaboration with Thorn EMI, Royal Signals and Radar Establishment, and Laser Scan Ltd.

**National Coal Board
Scientist (Management Grade 7)****Nuneaton, England UK Nov '82-Sep '84**

For a Health and Safety project, Dr. Freedman developed and validated a microcomputer system to detect coalmine fires and heatings. Based on stochastic and temporal analysis of infrared data obtained via a tube bundle system, and telemetry data from underground thermocouples, the system detected growing trends of carbon monoxide concentration in the presence of noise from underground events such as blasting, diesel engine fumes, ventilation changes, and seismic activity.
