Hardware Reviews

Small, Medium Businesses Gain Link To Inexpensive IP Telephony May 26, 2006
 D-Link has always been a company that provided SMBs with a variety of networking and connectivity products. Recently, the company launched the xStack IP Telephony DVX-1000 IP PBX—an IP device that aims to cut telephony costs.

Review: Casio EX-Z850 Camera May 24, 2006
 The new 8.1-megapixel \$399 Casio Exilim camera isn't perfect, but it takes great shots and has plenty of cool features.

Review: Linksys Wireless-N Equipment Isn't Quite There Yet May 23, 2006
 Results were poor at best in our testing of new Linksys 802.11n gear, which showed no real benefit over current 802.11g technology.

Samsung Launches PCs With Solid State Disks May 23, 2006
 The PCs will have 32 Gbyte disks based on flash storage.

Palm Treo 700p: A PDA For Work And Play May 22, 2006
 Palm's new Treo has the business pro in mind with new PDF file support and its ability to turn into a modem—but it takes video and plays music, too.

Review: Sony SDM-S205 LCD Monitor May 17, 2006
 This 20.1-inch LCD display is big and bright enough for presentations and DVDs, but beware—some assembly is required.

Review: Apple iPod Hi-Fi May 17, 2006
 Apple's largest-yet iPod accessory is a mixed bag. It's easy to use and sounds pretty good, but a lack of features and its premium price makes this boom box a mediocre offering.

Review: Mio C310 Portable Car Navigation System May 16, 2006
 This generic yet full-featured GPS won't win design awards, but it costs only \$650.

Analysis: AGP Versus PCI-e Graphics May 16, 2006
 It can be difficult to believe that AGP is still viable when almost every new graphics card makes its debut with PCI-e support. So should we all just throw in our AGP towels and make the switch? Truth is, it depends.

Review: Dual-Band Car Cell Extender May 10, 2006
 Boost your cell phone signal while driving with this device.
