Nothing Beats a Beatbot

Beatbot is a global leader of Smart Pool Robotics.
Through constant innovation,
we empower people to perfect pool living and enrich their everyday life.

The Dream of an Engineer

"Users won't tell you what they want, but their frustrations will."

—— Siler Wang, Founder & CEO

Siler Wang has spent his life building robots. After more than a decade creating some of the smartest machines for the home, one thought kept returning: the industry had long settled for "good enough."

He couldn't accept that.

He wanted to build something better — a robot with no compromises, designed for people, not for short-term gains.

But what problem is everyone else ignoring?

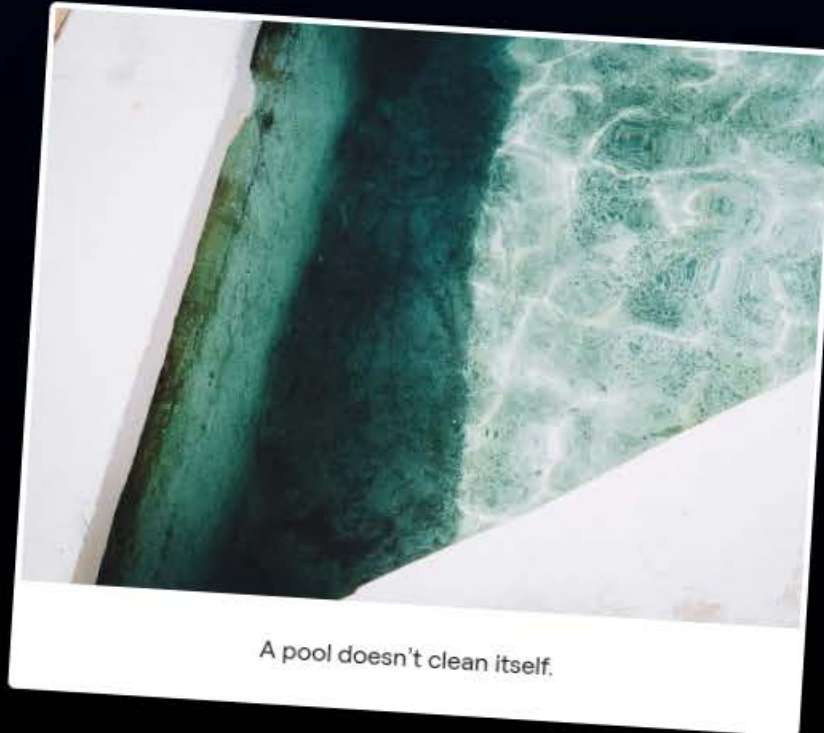

The Unexpected Corner: Pool

The answer came from an unexpected place — the backyard pool.

A pool is more than just water — it's where life happens. However, owning a pool has been both a pride and a burden.

For too long, pool care has been compromised by outdated tools and incomplete solutions.

Most pool robots are clunky, complicated and uninspired. Even the best robots couldn't tackle floating debris — a detail most dismissed as too small to matter.

The Unexpected Corner: Pool

The answer came from an unexpected place — the backyard pool.

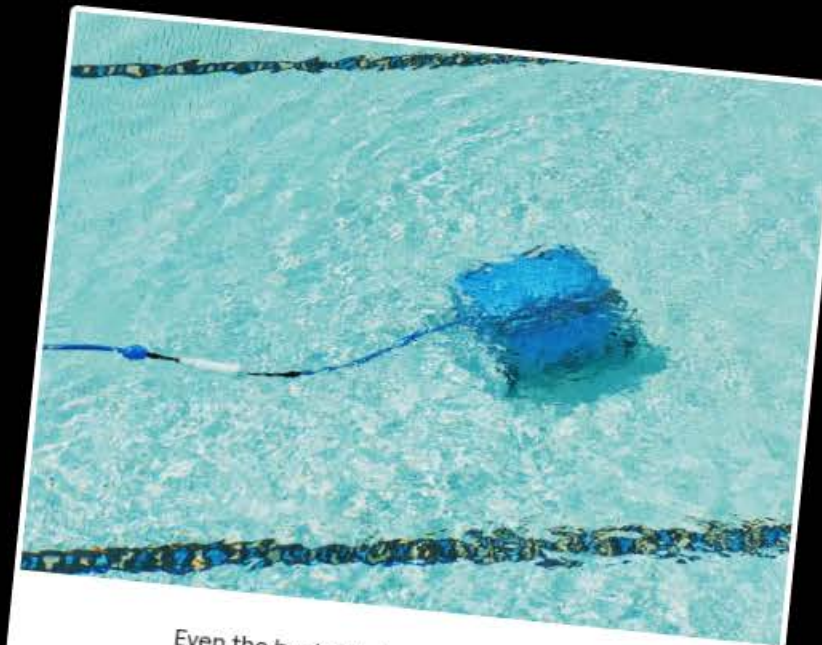

A pool is more than just water — it's where life happens. However, owning a pool has been both a pride and a burden.

For too long, pool care has been compromised by outdated tools and incomplete solutions.

Most pool robots are clunky, complicated and uninspired. Even the best robots couldn't tackle floating debris — a detail most dismissed as too small to matter.

An entire system built around inconvenience.

Even the best robots missed what floats.

When Others Stop, We Begin

Beatbot was born from one belief: real innovation begins where others stop looking. We believe pool care should be effortless, intelligent, and beautifully designed.

In 2024, after years of relentless R&D, we introduced the world's first 5-in-1 robotic pool cleaner — AquaSense Pro — a breakthrough that redefined what "clean" truly means and set a new benchmark for the industry.

When innovation restores your time, your confidence, and your pride, life opens up.

With Beatbot, everyday living becomes richer, calmer, and more human.

Jan. 2024

The first-generation products AquaSense Pro and AquaSense were officially launched at CES.

Aug. 2024

Made a debut at Splash Australia, marking a new chapter of global expansion; iSkim Ultra officially launched.

Jan. 2026

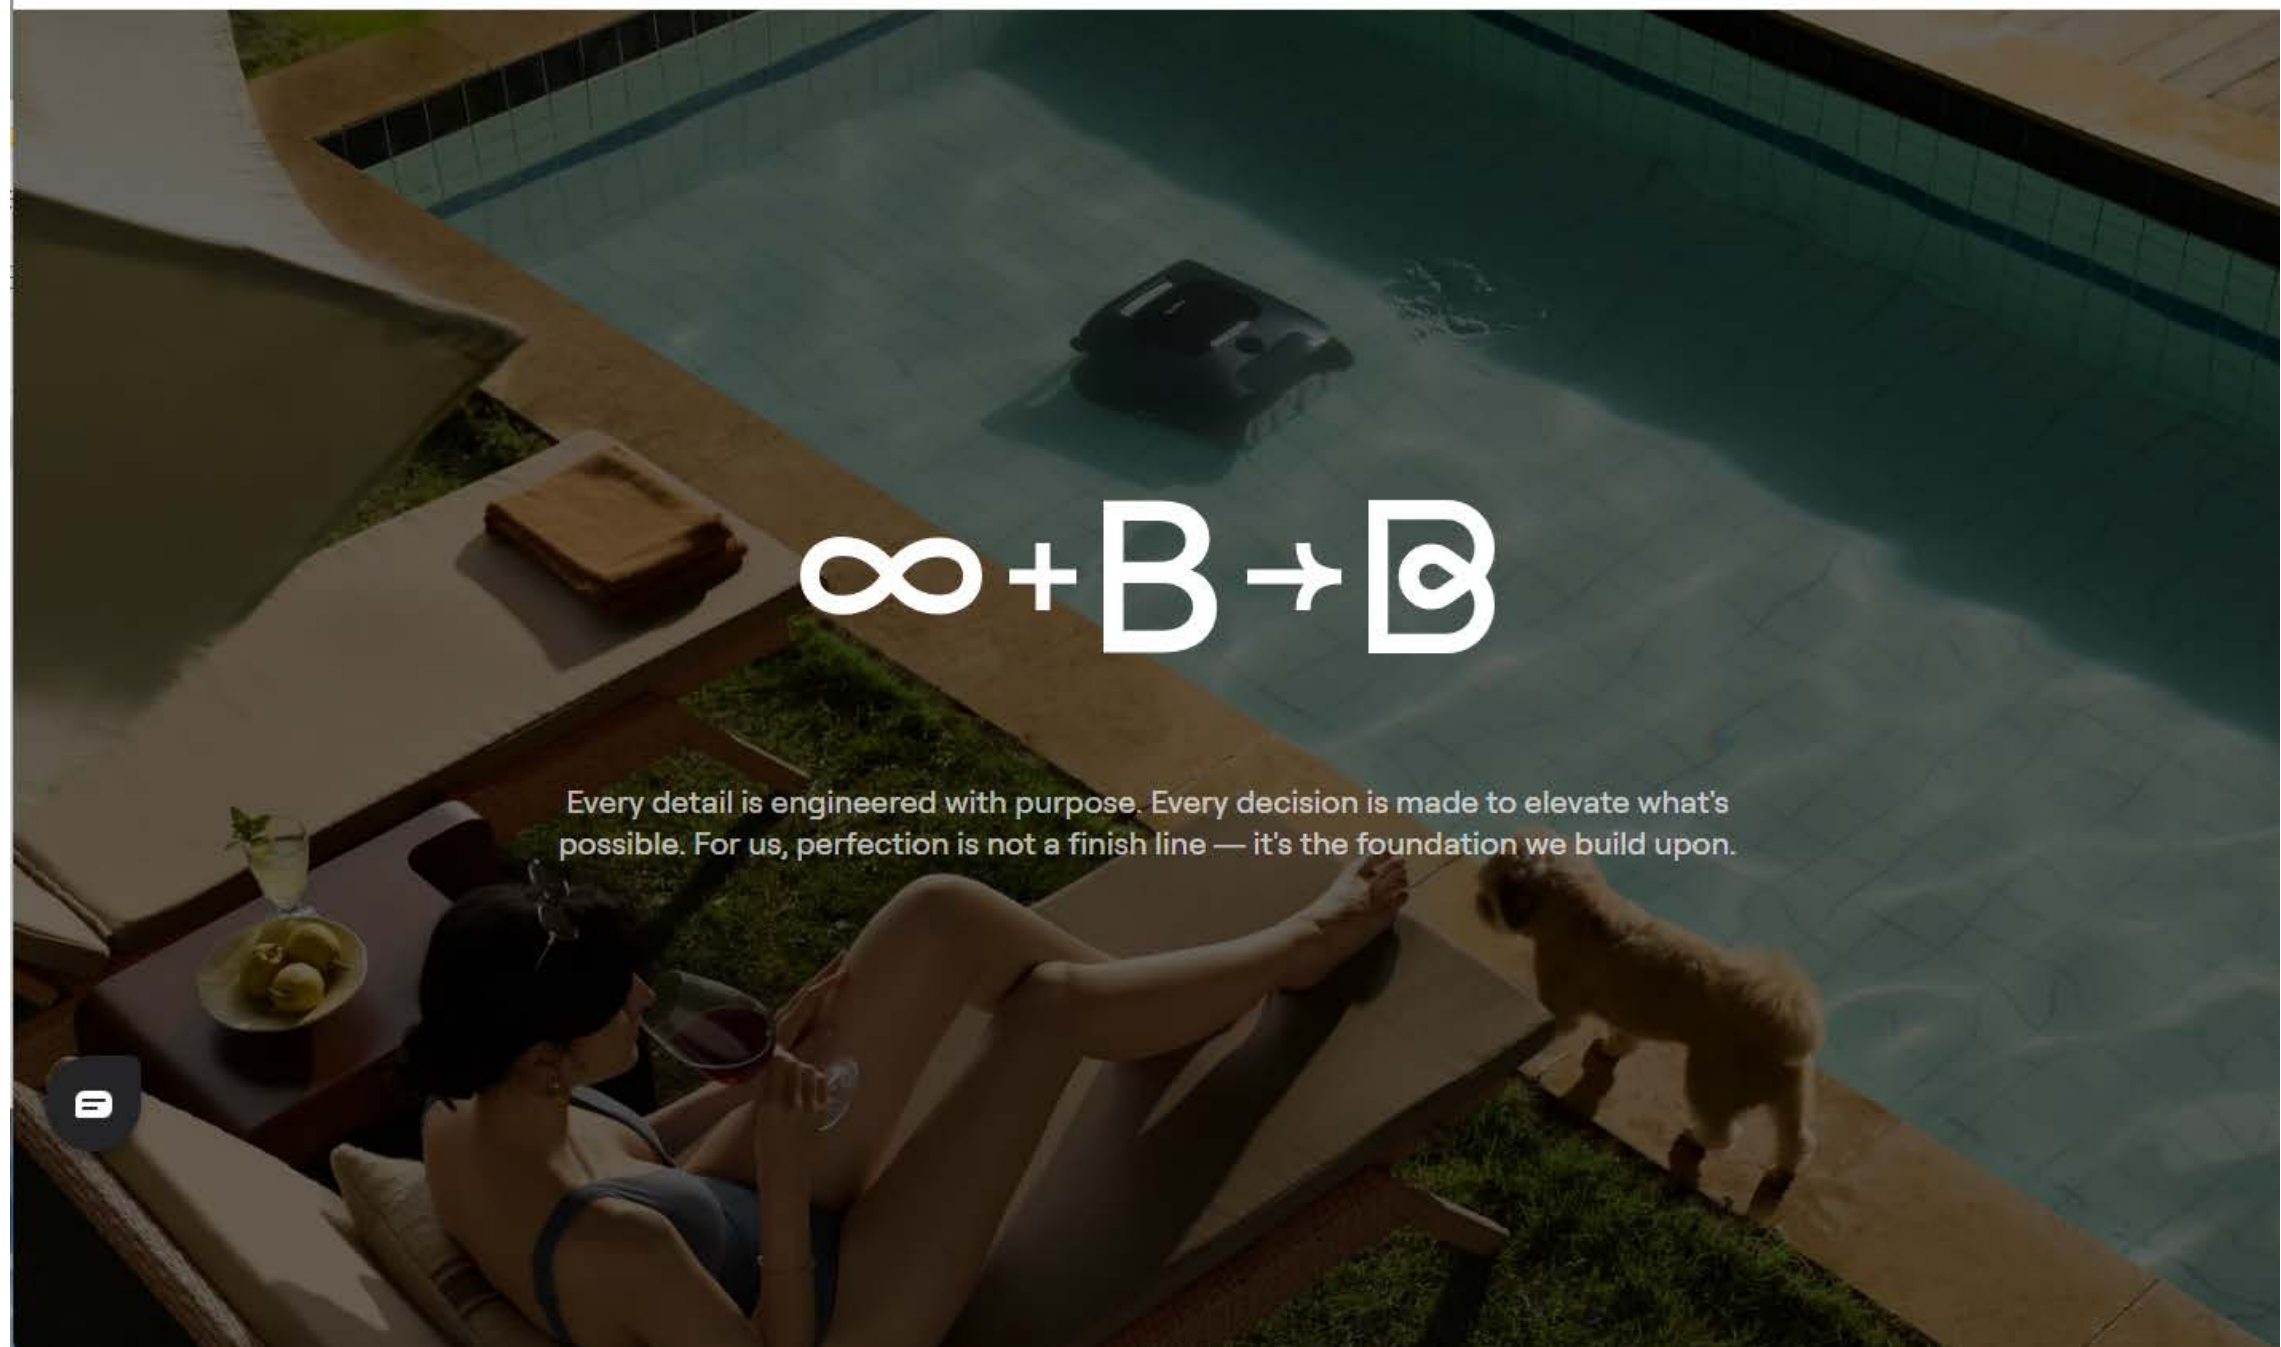

Launched the world's first pool cleaner with an auto-filter-cleaning station, AquaSense X.

The Pursuit of Perfection

Beatbot is built on a mindset of perfection by design — an unrelenting commitment to precision, performance, and aesthetic excellence.

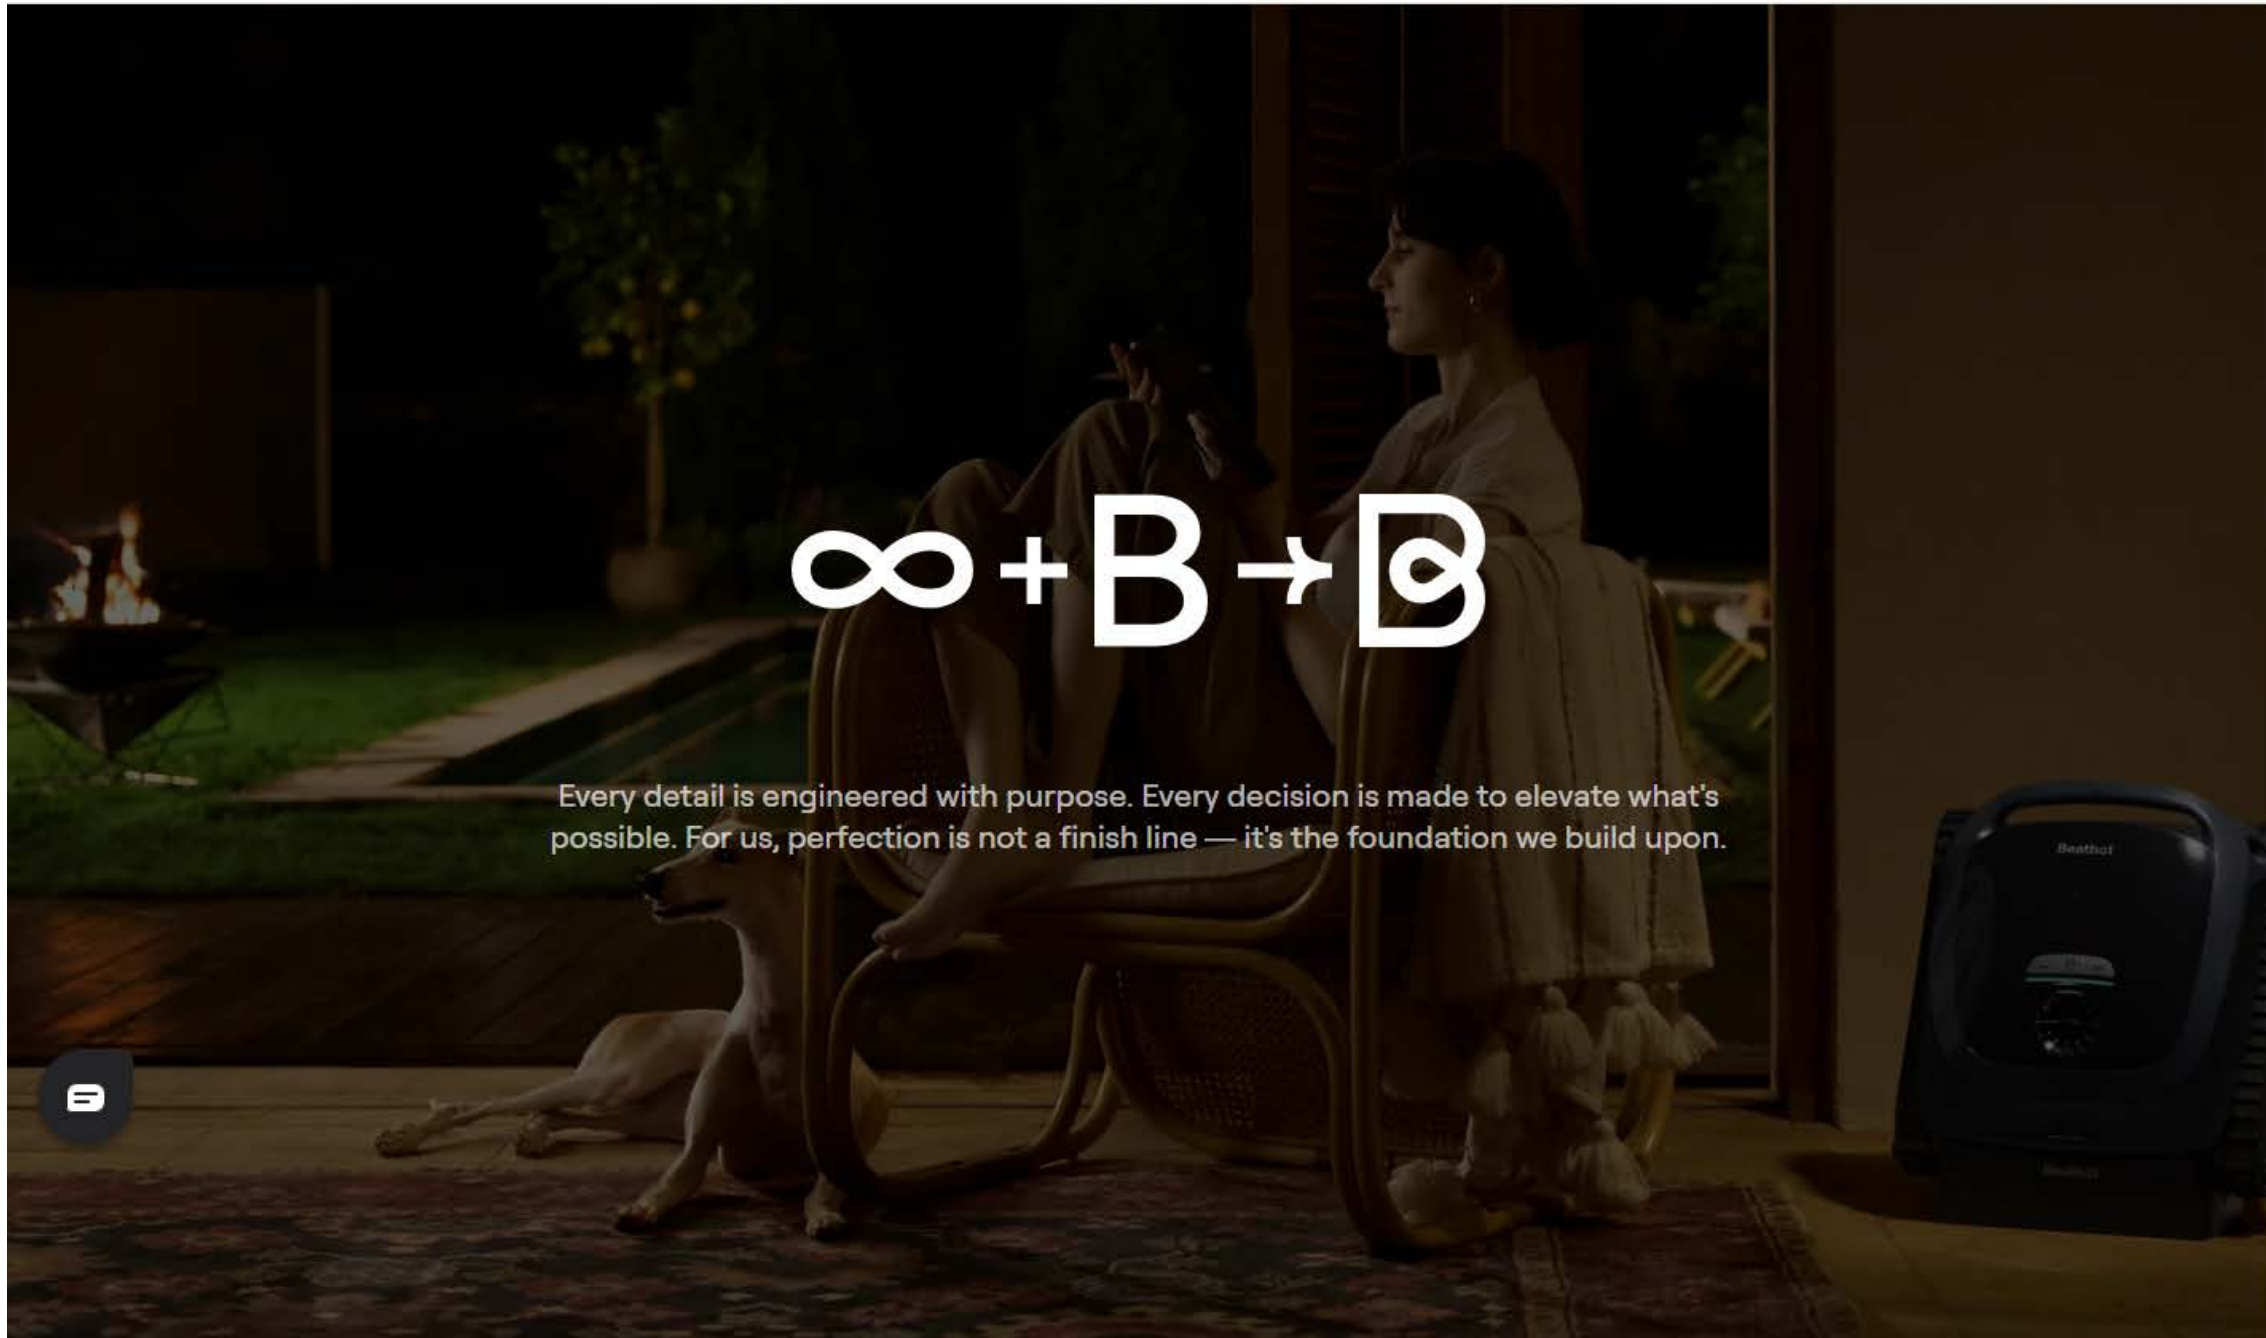

∞ + B → B

Every detail is engineered with purpose. Every decision is made to elevate what's possible. For us, perfection is not a finish line — it's the foundation we build upon.

The Values Behind Everything

Smart Innovation

Relentless R&D that takes on the toughest problems first.

Trusted Performance

Proven engineering that delivers consistent results over time.

The Values Behind Everything

Smart Innovation

Relentless R&D that takes on the toughest problems first.

Trusted Performance

Proven engineering that delivers consistent results over time.

Intuitive Simplicity

Thoughtful design that makes every interaction effortless to understand and use.

Perfected Living

Elevated experiences that turn everyday pool care into perfect living.

Beats On,

We are building an integrated ecosystem that doesn't just innovate for today but redefines what's possible for tomorrow. Every milestone reflects the shared ambition of our teams, partners, and communities worldwide.

Together for Better

The real measure of progress is the impact we create together. With partners who share our vision, we're shaping a future where technology serves people, communities, and the planet.

At Beatbot, every collaboration is more than a partnership. It's a shared belief in pushing boundaries, redefining standards, and creating positive change that resonates far beyond the pool.
