Our Services

- > CLEAN FLEET (ELECTRIC)
- > CONVENTIONAL FLEET (DIESEL)

Conventional Fleet Diesel Engine Powered

With some of the newest fleets in the country, we provide industry-leading well stimulation services for our clients by offering safe, cost-effective, state-of-the-art hydraulic fracturing equipment and experienced personnel.

[Read More](#)

Clean Fleet® Electric Powered

Our patented Clean Fleet® technology, the first fully electric, mobile well stimulation system, will successfully decrease harmful emissions by 99%, dramatically decrease sound pollution and well head vibrations and generate operational cost savings on fuel of up to 80%.

Testimonials

“Clean Fleet® is the most environmentally responsible completion solution in the oil and gas industry.”
Antero Resources

About U.S. Well Services

Based in Houston, Texas, U.S. Well Services is an experienced provider of hydraulic fracturing services in unconventional oil and natural gas basins.

Our diesel and revolutionary electric hydraulic fracturing fleets (known as Clean Fleet®) are among the most reliable and highest performing fleets in the industry, with the capability to meet the demanding pressure and pump rate requirements associated with unconventional reservoirs.
