FIRE WALL HANGERS

FWH

REFERENCE SERIES: DGHF

2015, 2018 & 2021 IBC/IRC Code Compliant

The FWH Fire Wall Hanger is designed for attaching truss, I-joist, solid sawn lumber, or engineered wood floor framing members to double wall top plates or minimum 2-ply 2x solid sawn header fire rated wood frame walls. The advanced design allows the installation of the FWH **before** the 5/8" gypsum wallboard (drywall) is attached and permits the building project to be completely framed-up, and weather-tight before the gypsum wallboard sheathing work starts.

2 Hour Fire Rating: FWH hangers are tested per ASTM E814 standards. When installed on one side of a maximum 2 hour fire-rated wall assembly, the penetration of the MiTek FWH Fire Wall Hanger through the gypsum wallboard will not reduce the fire resistive rating of the 2 hour fire resistive assembly.

Patents: U.S. No. 11,649,626

Materials: 14 gauge

Finish: G90 galvanizing

INSTALLATION

Install the face of hanger flanges tight to stud wall framing.

For wall framing, hangers do NOT need to be installed at stud locations for full design values.

The end of the truss/joist should measure 1-5/8" from the face of the supporting wall. **See Figure 1.**

The truss/joist should bear fully on the FWH seat with a gap no greater than 1/8" between the end of the supported member and the hanger. **See Figure 1.**

Gypsum Wallboard Installation – Use the FWH-T template to slot cut the gypsum wallboard. See FWH-T Template Sequence image. Slide the gypsum wallboard into position and fasten to the framing members meeting minimum requirements specified by code.

1) Uplift Loads have been increased 60% for wind or seismic loads; no further increase shall be permitted.

2) Allowable downloads require at least one 2x stud at each hanger location and 4 face nails into 2-ply top plate.

3) Web stiffeners are required on I-Joist applications. Install per I-Joist manufacturer specifications.

4) NAILS: 10d x 1-1/2 nails are 0.148" dia. x 1-1/2" long. 10d nails are 0.148" dia. x 3" long.

WELDED TOP FLANGE INSTALLATION

- Weld sizes and lengths shown on chart.
- Weld-on applications produce maximum allowable load listed. **Uplift loads do not apply to this application.**
- All welding should be done in accordance with the American Welding Society (AWS) Standard by a certified welder.
Caution: Welding galvanized steel may produce harmful fumes and should only be performed in well-ventilated environments.

Top Angle Weld Length Chart

MiTek Welded Hanger Series	Weld Length
