Smart Soda Launches a Revolutionary B2B Program, "Introducing Juli Touch" The Ultimate Total Beverage Solution For Offices.

Juli Touch is a state-of-the-art beverage platform that includes a large, dynamic touch screen for a maximum user experience. The system provides unlimited alkaline, sparkling mineral water and up to 10 types of vitamin-infused flavored sparkling waters and sodas.

All our beverages are natural, sugar free (or) made with organic cane sugar, vegan, kosher, antioxidant rich, gluten free and can also be CBD infused.

Smart Soda targets over 3,500,000 US businesses with 25 employees or more. We are offering not only the highest quality products, but the most competitive pricing per serving.

We trust that the combination between the Juli Touch capabilities, limited competition and high demand for healthy drinks in workplaces, will significantly increase Smart Soda's revenue in 2020.
