Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

Related Application (Priority Claim)

This application claims the benefit of United States Provisional Application Serial No. 61/882,915, filed on September 26, 2013, which is hereby incorporated herein by reference in its entirety.

Background

The present invention generally relates to Universal Serial Bus (“USB”) connectivity between, for example, mobile consumer devices and vehicle electronic systems. More specifically, the present invention relates to a system which is configured to provide that consumer devices that act as either USB host or USB device can connect to a vehicle’s embedded USB host that does not have On the Go (“OTG”) capability through an embedded USB hub in the vehicle.

Historically, mobile consumer devices such as media players, smart phones, tablets and the like have relied on connections to other devices, such as laptop or desktop personal computers (“PC’s”) to acquire content, exchange data, and charge the device’s internal battery.

For many years now, that has been accomplished through USB ports on each device. The use of USB technology is suitable for such needs since it is commonly available, familiar to the end user, cost effective and ubiquitous. USB protocols require a point-to-point connection in which one end is the USB Host or master, and the other end is a USB Device or slave. In this way, the flow of messages between the two devices is managed and controlled, whereby the USB Device responds to messages initiated by the USB Host. Historically, PC's have provided USB Host ports for connection to simpler USB Devices such as printers, memory sticks, mobile phones, etc. The USB Host has a greater burden of software and hardware requirements than a USB Device, so it has made sense to designate the PC as the USB Host in such systems.

In vehicle systems that employ USB connections, the same concepts apply. In such systems, the vehicle is typically the USB Host. The USB Host function is often embedded into a component of the vehicle infotainment system, such as into the radio or other control module. Typically, multiple USB ports are strategically designed into the vehicle in locations convenient for the driver and passengers to connect their consumer devices. Once a consumer device is connected to one of the ports, the device begins charging and the vehicle infotainment system can access content on the consumer device. This is useful to enable features such as streaming music, video and other services the device may provide.

Such a system requires that each of the USB ports be physically connected to the vehicle's USB Host in a manner suitable for USB data flow. This is accomplished through electrical cabling which is embedded in the vehicle, and which connects each of the ports to the

USB Host. Since there can be many USB ports in a vehicle, and each port requires a cable to connect the port to the USB Host, it is desirable to share cabling when possible to minimize cost and mass of the vehicle. This is accomplished through the use of USB Hubs. USB Hubs allow a single USB Host to connect to multiple USB Devices over a single cable between the USB Host and the USB Hub. As shown in Figures 1 and 2, a single USB Hub can connect one USB Host to several USB Devices. Specifically, Figure 1 illustrates a system wherein a self-powered USB Hub having a plurality of USB ports connects to a plurality of USB Devices (via a plurality of consumer-facing USB ports), while Figure 2 illustrates a system wherein a self-powered USB Hub provides not only a plurality of USB ports which are in communication with a plurality of consumer-facing USB ports, but also a Secure Digital (“SD”) card reader which is connected to a consumer-facing SD card connector. Other portions of Figures 1 and 2, such as Power Management, are standard in the industry and self-explanatory upon viewing Figures 1 and 2.

Furthermore, as shown in Figure 3, multiple USB Hubs can be tiered, such that USB Hubs connect to other USB Hubs. Specifically, Figure 3 illustrates a vehicle system architecture that includes a central vehicle microcontroller (also referred to as the Head Unit or “HU”). Connected to the Head Unit are components or systems such as displays, the audio system, entertainment system and the driver controls. The Head Unit may be architected as a single module encompassing all functions or distributed such that various functions are managed by individual modules. The Head Unit includes a Root USB Hub which is typically connected to one or more downstream USB Hubs distributed throughout the vehicle. Each USB Hub has a plurality of downstream ports (at least one of which may be an SD reader or USB audio device),

thereby effectively providing that each USB port in the vehicle has a connection to the USB Host or Head Unit. In Figure 3, for example, the Root Hub is embedded in the radio, and is connected to four (4) self-powered USB Hubs, wherein one is in the vehicle's center console, one is in the vehicle's center stack, and two are in the vehicle's rear seats.

5 Recently, mobile devices such as smart phones have gained in popularity. This is, in part, due to their usefulness as standalone computing devices. With advances in consumer electronic technology and increases in the speed of mobile networks, these devices are no longer
10 reliant on being connected to PCs to access content. These smart mobile devices now have many of the same hardware resources, connectivity and software operating systems that only PCs had in past years. As has been the case with desktop PCs, accessories for these mobile devices have become available to aid in their ease of use. These accessories have included devices such as keyboards, mice, displays, touchscreen, audio systems, and other interface devices. These accessories commonly connect via a USB connection. By way of established convention in the consumer electronics market, these accessories are typically low cost and limited in USB
15 capability to act only as a USB Device. To connect them to a smart phone, the smart phone must be the USB Host. Therefore, leading mobile device manufacturers and system designers have begun designing their mobile device products (ie smart phones, tablets,etc) to support both USB Host and USB Device roles. In other words, the phone may configure itself such that it can function as a USB Device when it needs to be, or as a USB Host when it needs to be. Recently,
20 the system level design thinking has shifted towards viewing smart phones as the USB Host, and any device connecting thereto as the USB Device. Again, this is not surprising since this is

exactly how laptops and PCs work today. Extending this trend into the future, it can be predicted that the smart phone will act primarily as the USB Host, and will rarely or never act as a USB device. This presents some problems for automotive systems.

As explained previously, automotive systems have a USB Host and require USB Devices
5 to connect to it. If a phone acts as a USB Host, then the system will not function since by USB convention, two USB Hosts cannot directly connect with each other. Automotive manufacturers desire compatibility with smart phones and are therefore motivated to adapt to this changing technology. A redesign of the USB architecture in the vehicle is thus necessary such that the vehicle can act either as the USB Host (when necessary to connect to USB Devices such as
10 memory sticks, thumb drives, etc.) or USB Device (when necessary to connect to USB Hosts, such as a smart phone which demands to be USB Host rather than USB Device.

The USB organization has added a standard that addresses the need for devices to act as either USB Host or USB Device and as such can be considered a “dual role” USB controller. It is referred to in USB nomenclature as “On The Go” or “OTG” for short. Any device that meets
15 the OTG standard can act as either USB Host or USB Device and can change roles dynamically. Therefore, one possible approach to modifying the vehicle USB architecture to support all use cases is to upgrade the vehicle’s USB Host to USB OTG. This solution addresses the issue but has some disadvantages. First, USB Hubs do not support OTG and can no longer be used in the system. Each consumer accessible USB port that supports OTG must have a dedicated wire link
20 to a dedicated OTG controller in the Head Unit thus negating the wiring savings associated with

use of USB Hubs. As a result several costly cables may need to be added to the vehicle's electrical system. Second, there may not be enough OTG controllers available in the Head Unit to connect to each of the vehicle's user accessible USB ports. This then forces the vehicle designer to choose a limited number of the many USB ports in the vehicle to support the OTG function and run dedicated USB cables to them. This can lead to user confusion and dissatisfaction since only certain consumer ports support the required functionality. Also, ports that support OTG may be co-located with other physically identical ports that do not. If the user chooses the wrong one, the applications they desire to run from the consumer device that requires USB Host mode won't work.

Another possible solution is to implement custom USB hubs wherein the USB Hub is able to dynamically swap its upstream port with one of its downstream ports when commanded to do so. System solutions built with this concept still require OTG controllers in the head unit but benefit from the fact that no additional wires need to be installed in the car. The existing USB cable between the USB OTG Host and the USB Hub can facilitate the necessary USB communications between the USB OTG controller in the Head Unit (HU) and a consumer device in USB Host (such as a smart phone). This solution also has some disadvantages however. For example, when the USB Hub is commanded to swap its upstream port with a downstream port, all other downstream ports of the USB Hubs lose their data connection with the Head Unit. While in this mode the Head Unit access to the other downstream ports of the hub ceases. This may prevent use of certain vehicle system functions such as navigation or audio playback that may need consistent access to the other downstream ports of the hub to function. Furthermore, it

requires the HU to have an available USB OTG port and a signaling path to control the hub upstream/downstream port configuration.

Summary

5 An object of an embodiment of the present invention is to provide a system which is configured to enable a vehicle's embedded USB Host system to connect to mobile devices through a USB Hub, regardless of whether the mobile devices are configured to act as USB Hosts or USB Devices, without the need to provide OTG or dual role controllers in the headunit and without the need to provide additional cabling in the vehicle. Preferably, no hardware changes are required to be made to the USB Host circuits in the HU.

10 An embodiment of the present invention provides a system which can be employed between a vehicle's embedded USB Host and at least one, but preferably multiple, consumer facing USB ports provided in the vehicle for connection to consumer devices. The system is configured to recognize and control whether the consumer device is required to be connected to each USB port as a USB Host or as a USB Device. Further, the system is able to dynamically
15 switch the device connection between USB Device mode and USB Host mode when desired. In the case where the consumer device is acting as a USB Device, signals are routed normally through a USB Hub to the Head Unit. In the case where the consumer device is acting as a USB Host, signals between the consumer device and the vehicle's embedded USB Host are routed and processed through a USB Host to Host Bridge which is connected to the USB Hub, thereby
20 rendering the consumer device compatible with the vehicle's embedded USB Host.

The present invention is capable of being implemented in several different embodiments. For example, an embodiment of the present invention comprises a USB Hub Module having a USB Hub, USB Bridge, and USB routing switches implemented as discrete devices. The USB Hub upstream port is configured to be connected to a vehicle's embedded USB Host (such as a USB Host in a Head Unit). The USB Hub Module also includes a switching device (such as USB analog multiplexing switches for example) that is configured to route each consumer port to either the Bridge or the Hub. The USB Bridge is configured to effectively control the switching device. The USB Bridge is configured, based on signals from the Head Unit, whether the consumer device which is connected to the USB port is acting as USB Host or USB Device. In the case where the consumer device is acting as USB Host, the USB Bridge controls the switching device to route the USB port to the Bridge. The Bridge processes the signals from the consumer device and provides them to the USB Hub, thereby rendering the consumer device compatible with the vehicle's embedded USB Host. In the case where the consumer device is acting as USB Device, the USB Bridge controls the switching device such that the switching device provides the signals to the USB Hub, effectively bypassing the Bridge.

Still another embodiment of the present invention provides that the USB routing logic, USB Bridge, and USB Hub are integrated in a single combination USB Hub/USB Bridge Integrated Circuit (IC).

Still other embodiments are entirely possible, some of which are described and illustrated herein. For example, the concept can be extended to include additional embedded USB Device functions such as USB HID and USB Audio. Further it is also envisioned that all consumer facing USB ports of the Hub Module can emulate or otherwise support dual role USB capability provided that each downstream port has a Bridge to support USB Host mode for the connected device and a direct connection to the USB Hub to support USB Device mode. In all cases, compliance to USB protocols and architectures is preferably maintained.

Brief Description of the Drawings

The organization and manner of the structure and operation of the invention, together with further objects and advantages thereof, may best be understood by reference to the following description taken in connection with the accompanying drawings wherein like

5 reference numerals identify like elements in which:

Figure 1 illustrates a system wherein a multiple port self-powered USB Hub functions to connect a single USB Host to a plurality of USB ports;

Figure 2 illustrates a system wherein a self-powered USB Hub provides not only a plurality of USB ports, but also a Secure Digital (“SD”) card reader;

10 Figure 3 illustrates a vehicle infotainment system structure wherein multiple USB Hubs are connected together or tiered, such that USB Hubs feed other USB Hubs;

Figure 4 illustrates a system which is in accordance with an embodiment of the present invention, wherein a USB Hub, USB Bridge and a switching device are provided as discrete components;

15 Figure 5 illustrates a system which is in accordance with an alternative embodiment of the present invention, wherein USB routing/switching logic and a USB Bridge are integrated with a USB Hub in a combination USB Hub/USB Bridge Integrated Circuit (IC);

Figure 6 illustrates the different components of the combination USB Hub/Bridge IC shown in Figure 5;

20 Figure 7 illustrates one possible endpoint configuration of the USB Bridge shown in Figures 5 and 6; and

Figure 8 illustrates an example implementation of a Head Unit Software Architecture.

Description of Illustrated Embodiments

While this invention may be susceptible to embodiment in different forms, there are specific embodiments shown in the drawings and will be described herein in detail, with the understanding that the present disclosure is to be considered an exemplification of the principles of the invention, and is not intended to limit the invention to that as illustrated.

Figure 4 illustrates a system which is in accordance with an embodiment of the present invention. The system is configured to effectively render a vehicle's embedded USB Host compatible with consumer devices which are configured to also act as USB Host or USB Device. The system is in the form of a self-powered USB Hub Module having a USB, a USB Bridge, and a switching device implemented as discrete devices. The USB Hub is preferably provided in the form of an integrated circuit (IC), and is configured (via an upstream USB port) connected to a vehicle's embedded USB Host (such as a USB Host in a Head Unit) via vehicle internal wiring, such as, in one embodiment, via a single USB data cable between the Head Unit and USB Hub. The USB Hub also includes a plurality of downstream USB ports, at least one of which is connected to a USB Bridge (which also is preferably provided in the form of an integrated circuit (IC)). At least one downstream USB port of the USB Hub is connected to a switching device (such as USB analog multiplexing switches, for example). The switching device is configured to be connected to at least one USB port in the vehicle for connection to a consumer device. The USB Bridge is configured to effectively control the switching device although other control mechanisms are envisioned. The USB Hub Module is configured such that signals received from at least one USB port are received by the switching device, and the switching device routes

the signals to the USB Bridge or the USB Hub. In the case where the consumer device is acting as USB Host, the USB Bridge processes the USB packets from the consumer port and provides them to the USB Hub, thereby rendering the consumer device compatible with the vehicle's embedded USB Host. In the case where the consumer device is acting as USB Device, the USB
5 Bridge controls the switching device such that the switching device provides the USB signaling directly to the USB Hub, bypassing the Bridge.

As shown in Figure 4, the system also includes Power Management structure, as well as some other conventional structure not specifically shown in Figure 4, but which would be readily assumed to be present by one having ordinary skill in the art.

10 In use, the Head Unit controls the switching device via the USB Bridge hardware or any other convenient means of control. The HU software application may choose to enable, for example, a phone on any one of the consumer USB ports, by requesting, commanding or otherwise knowing the phone is required to be in USB Host mode and commanding the routing of the specific USB port the phone is attached to the USB Bridge. Once routed to the USB
15 Bridge, the phone will detect a USB Device is connected and the phone will begin the standard USB enumeration sequence. The detection and enumeration processes are defined by USB standards and not explained here in detail. However, for purposes of describing the operation of the invention, a general understanding is provided herein. The enumeration process follows a strict sequence of USB descriptor requests from the USB Host and USB descriptor responses
20 from the USB Device that allow the Host to determine the capabilities and functions of the Device and configure the USB Device for operation. Once the complete set of device descriptors

are known the USB Host will then load the appropriate USB driver(s) and applications to support in the functionality that the USB Device provides. In the scope of this invention it is envisioned that the responses to the descriptor requests made by the phone (USB Host) are either answered locally by the Bridge or preferably, the requests are forwarded through the Bridge to the Head
5 Unit where its device drivers process the request and return the response. The descriptor responses from the device driver are conveyed to the USB Bridge, which then, in turn, passes them to the phone. By passing descriptor request to the HeadUnit drivers and returning the responses from the Head Unit drivers back to the consumer device, the Bridge appears as a transparent component in the USB system architecture. The system capabilities are controlled by
10 the Head Unit and the system remains flexible without need for changes to the Bridge firmware or hardware when the system designer requires changes to the descriptor responses. Once the consumer device completes the enumeration process, the Head Unit's USB functional capabilities are known to the consumer device and the consumer device may enable use of those functions over USB communication. At this point, the consumer device or the Head Unit may
15 begin activating any number of supported services such as data connections, streaming audio and streaming video to and from the vehicle via the USB Bridge.

Another embodiment of the present invention can be provided, wherein the bridge is configured to act as an OTG port thus negating the need for switches and/or routing logic. In this case there would exist one Bridge functional block for each downstream port. This
20 embodiment would effectively be a more generalized case of the example illustrated in Figure 4. Figure 4 shows just one Bridge that any one of the consumer USB ports can be routed to. With

just one bridge, only one consumer USB port can be connected to a USB host at a time.

However, if each downstream port of the Hub has a dedicated Bridge, then multiple consumer ports can support connection to USB Host devices at the same time. Thus, any consumer port can be in either USB Host or USB Device mode at any time independently of the others.

5 Figure 5 illustrates an alternative embodiment wherein the switching device comprises USB routing logic, and both the USB routing logic and the USB Bridge are integrated with the USB Hub in a combination USB Hub/USB Bridge Integrated Circuit (IC). This configuration has cost and size advantages over building it with discrete components connected together on a printed circuit board.

10 Figure 6 illustrates the internal components of the USB Hub/USB Bridge Integrated Circuit (IC) shown in Figure 5. As shown, preferably the components of the USB Bridge include a bridge controller as well as endpoint buffers. While the exact configuration of endpoints is effectively up to the system designer to choose for a particular need, a specific example of one possible endpoint configuration is shown in Figure 7; however, many others are possible.

15 As shown in Figure 7, the endpoints of the Bridge may be designed to support multiple pipes of Bulk USB data connections between the Host A (Head Unit) and Host B (consumer device). In the Bridge, the IN endpoints of Device A are connected to the OUT endpoints of Device B and the OUT endpoints of Device A are connected to the IN endpoints of Device B. The design of the Bridge may be such that the data flow between the endpoints may be direct or
20 buffered. For example, in the case of direct connection, once a USB packet is received from

Host A on a Device A OUT endpoint, the internal logic of the Bridge moves to packet to the Device B IN endpoint if it is available. If Device B IN endpoint is full or otherwise not available then subsequent attempts of Host A to send more packets to Device A in the Bridge will be rejected until such time that the Device B IN endpoint is clear and the contents of the Device A OUT buffer is moved to it. Alternatively, there may exist a local buffer in the Bridge between the endpoints of Device A and B. For example, packets received on an OUT endpoint of Device A are placed in a local memory device for temporary storage until Device B IN endpoint is ready for them. The OUT endpoints are thus capable of receiving multiple packets from the Host until the buffer is full. Likewise the IN endpoints may, at times, transmit multiple packets until the buffer is empty. Such buffers are not required, but are envisioned, to improve system throughput performance in certain circumstances where one of the USB Hosts is occasionally busy and not keeping up with USB transactions at the same rate as the other USB Host. Regardless of the buffer configuration, the Bridge hardware has IN and OUT endpoints on Device A mapped to OUT and IN endpoints respectively on Device B, thus forming a bidirectional bridge that passes USB traffic between two USB Hosts with bandwidth sufficient to support the application requirements of the system.

Also shown in Figure 7, Device A and Device B provide a bidirectional Control endpoint connected to their respective USB Hosts. Control endpoints are required per USB standard to support USB defined control messages between the Host and Device both during and after the enumeration sequence. Optionally, USB endpoints may also be utilized per USB standard to employ messages intended to control user defined custom device specific behavior, referred to as

Vendor Specific messages. As can be seen in Figure 7, the Control endpoints are mapped to the Bridge Controller (BC). The BC logic may be implemented in hardware or preferably software. The BC provides the capability to send, receive and process USB standard Control endpoint messages as well as vendor specific messages essential to the control and operation of the

5 Bridge. At system startup, the A Host requests and receives descriptors from the BC via the Control endpoint. Once complete, Host A then loads the Bridge Driver in its software stack and configures the custom Bridge hardware for operation. Host A can then control the functions of the Bridge, such as USB switch routing control. The system is now ready to accept connection with USB Host mode consumer devices on the B Device of the Bridge. When such a connection

10 is made, the BC will notify the Bridge Driver in Host A by sending a message on the control endpoint to Host A. Further, Host B will begin sending descriptor requests on the control endpoint to Device B in Bridge. The BC receives these requests, encapsulates them with information that identifies them as descriptor requests from Host B and passes them to the Bridge Driver on Host using the control endpoint. Host A Bridge Driver receives these requests,

15 identifies them as descriptor requests and passes the requests on to other software components in Host A system and waits for the descriptor responses. The descriptor responses are encapsulated by the Bridge driver to indicate they are descriptor responses that are to be forwarded to Host B. The response is then sent to the BC via the control endpoint. The BC receives them, identifies them as descriptor responses that should be forwarded to Device B and places them on the

20 control endpoint for Device B. This process of receiving and forwarding messages back and forth between the two hosts continues until the enumeration process is complete with Host B.

From that point on the two hosts may begin to use the IN and OUT endpoints to transfer application data and services over the bulk endpoints.

Figure 8 illustrates one possible configuration of the system architecture including software components in the Head Unit interfacing with the Bridge/Hub. There are multiple ways that the operating system and software architecture can be constructed to support the functions of the USB Bridge/Hub. In Figure 8, a typical Linux implementation is shown including the Bridge/Hub Module and the Head Unit. The system design utilizes standard Linux Kernel components and configurations and should be familiar to those skilled in the art. The Head Unit USB Host Controller hardware is driven by the Host Controller Driver. The Host Controller Driver is connected to the USB Core. The USB Core connects the HCD with the standard USB Linux Device Drivers and the custom Bridge Driver. The Bridge Driver is configured to optionally connect directly to the User Space Application software or to the USB Gadget Driver depending on system architecture. The custom Bridge Driver plays a dual role of both controlling the functions of the Bridge hardware as well as providing a data path between the gadget device drivers and applications running on the Head Unit. The architecture illustrated is capable of handling both the operation and data paths associated with the Bridge and the Hub at the same time, thus allowing concurrent operation of consumer devices operating in USB Device mode with consumer devices operating in USB Host mode. In one embodiment, the Hub/Bridge supports simultaneous active USB data connections between the Head Unit and multiple consumer devices, at least one of which being in host mode while the others are in device mode. In another embodiment, the Hub/Bridge supports simultaneous active USB data connections

between the Head Unit and some combination of embedded and consumer USB devices along with at least one device being in host mode. While it is understood that the software functions of the head unit are essential to building a complete system, the designs of which can vary significantly and this example is provided only as a means of demonstrating one way to utilize

5 the functionality of the present invention.

What is claimed is:

1. A system which is configured to enable a vehicle's embedded USB Host system to connect to consumer devices through a USB Hub, regardless of whether the consumer devices are configured to act as USB Hosts or USB Devices.
- 5 2. A system as recited in claim 1, wherein the system is configured to be employed between the vehicle's embedded USB Host system and at least one USB port provided in the vehicle for connection to consumer devices.
3. A system as recited in claim 1, wherein the system is configured to recognize and control whether the consumer device is required to be connected to each USB port as a USB
10 Host or as a USB Device.
4. A system as recited in claim 1, wherein the system is configured to dynamically switch the device connection between USB Device mode and USB Host mode.
5. A system as recited in claim 1, wherein the system is configured to route signals through the USB Hub to a Head Unit in a case where the consumer device is acting as a USB
15 Device.
6. A system as recited in claim 1, wherein the system is configured to route and process signals through a USB Bridge, which is connected to the USB Hub, in the case where the

consumer device is acting as a USB Host, thereby rendering the consumer device compatible with the vehicle's embedded USB Host system.

7. A system as recited in claim 1, wherein the system comprises a USB Hub Module comprising the USB Hub, a USB Bridge, and at least one USB routing switch.

5 8. A system as recited in claim 7, wherein the USB Hub is configured to be connected to the embedded USB Host system of the vehicle.

9. A system as recited in claim 7, wherein the at least one USB routing switch is configured to route each consumer port to either the USB Bridge or USB Hub.

10 10. A system as recited in claim 9, wherein the at least one USB routing switch comprises a plurality of USB analog multiplexing switches.

11. A system as recited in claim 7, wherein the USB Bridge is configured to control the at least one USB routing switch.

12. A system as recited in claim 11, wherein the USB Bridge is configured to control the at least one USB routing switch to route signals from the USB port to the USB Bridge in the
15 case where the consumer device is acting as USB Host.

13. A system as recited in claim 12, wherein the USB Bridge is configured to process the signals from the consumer device and provide the signals to the USB Hub, thereby rendering the consumer device compatible with the embedded USB Host system of the vehicle.

14. A system as recited in claim 11, wherein the USB Bridge is configured to control the at least one USB routing switch to route signals from the USB port to the USB Bridge in the case where the consumer device is acting as USB Host.

15. A system as recited in claim 11, wherein the USB Bridge is configured to control the at least one USB routing switch to provide signals to the USB Hub, bypassing the USB Bridge in the case where the consumer device is acting as USB Device.

16. A system as recited in claim 1, wherein the system comprises a USB Hub Module comprising the USB Hub and a USB Bridge which is configured to function as an OTG port.

17. A system as recited in claim 7, wherein the at least one USB routing switch comprises USB routing logic, and both the USB routing logic and the USB Bridge are integrated with the USB Hub in a combination USB Hub/USB Bridge Integrated Circuit (IC).

18. A system as recited in claim 7, wherein the USB Bridge comprises a bridge controller as well as endpoint buffers.

19. A system as recited in claim 18, wherein the endpoint buffers are configured to support one or more pipes of Bulk USB data connections between a Head Unit and the consumer devices.

20. A system as recited in claim 1, wherein the system comprises a Head Unit which is electrically connected to the USB Hub via a single USB data cable.

21. A system as recited in claim 1, wherein the system comprises a Head Unit, wherein the system is configured to support simultaneous active USB data connections between the Head Unit and multiple consumer devices, at least one of which being in host mode while the others are in device mode.

5 22. A system as recited in claim 1, wherein the system comprises a Head Unit, wherein the system is configured to support simultaneous active USB data connections between the Head Unit and some combination of embedded and consumer USB devices along with at least one device being in host mode.

Abstract

A system which is configured to enable a vehicle's embedded USB Host system to connect to multiple mobile devices through a USB Hub, regardless of whether the mobile devices are configured to act as USB Hosts or USB Devices, without the need to add or provide

5 OTG controllers in the system or additional vehicle wiring, or inhibiting the functionality of any consumer devices operating in USB Device mode connected to a vehicle system Hub while another consumer device connected to the same Hub operates in USB Host mode. Preferably, the system is configured to provide that no additional cabling is required, and no hardware changes are required to be made to the HU. The system can be employed between a vehicle's

10 embedded USB Host, USB Hub and at least one consumer accessible USB port. In the case where the consumer device is acting as a USB Host, signals between the consumer device and the vehicle's embedded USB Host are processed through a bridge, thereby rendering the consumer device compatible with the vehicle's embedded USB Host.

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

**DECLARATION (37 CFR 1.63) FOR UTILITY OR DESIGN APPLICATION USING AN
APPLICATION DATA SHEET (37 CFR 1.76)**

Title of Invention	FLEXIBLE MOBILE DEVICE CONNECTIVITY TO AUTOMOTIVE SYSTEMS WITH USB HUBS
As the below named inventor, I hereby declare that:	
This declaration is directed to: ☐ The attached application, or	
☒ United States application or PCT international application number <u>14/487,947</u>	
filed on <u>September 16, 2014</u>	
The above-identified application was made or authorized to be made by me.	
I believe that I am the original inventor or an original joint inventor of a claimed invention in the application.	
I hereby acknowledge that any willful false statement made in this declaration is punishable under 18 U.S.C. 1001 by fine or imprisonment of not more than five (5) years, or both.	
WARNING:	
Petitioner/applicant is cautioned to avoid submitting personal information in documents filed in a patent application that may contribute to identity theft. Personal information such as social security numbers, bank account numbers, or credit card numbers (other than a check or credit card authorization form PTO-2038 submitted for payment purposes) is never required by the USPTO to support a petition or an application. If this type of personal information is included in documents submitted to the USPTO, petitioners/applicants should consider redacting such personal information from the documents before submitting them to the USPTO. Petitioner/applicant is advised that the record of a patent application is available to the public after publication of the application (unless a non-publication request in compliance with 37 CFR 1.213(a) is made in the application) or issuance of a patent. Furthermore, the record from an abandoned application may also be available to the public if the application is referenced in a published application or an issued patent (see 37 CFR 1.14). Checks and credit card authorization forms PTO-2038 submitted for payment purposes are not retained in the application file and therefore are not publicly available.

Information:					

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

FILING RECEIPT

0000000070919006

Date Mailed: 09/23/2014

Receipt is acknowledged of this non-provisional patent application. The application will be taken up for examination in due course. Applicant will be notified as to the results of the examination. Any correspondence concerning the application must include the following identification information: the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. **If an error is noted on this Filing Receipt, please submit a written request for a Filing Receipt Correction. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections**

Statement under 37 CFR 1.55 or 1.78 for AIA (First Inventor to File) Transition Applications: No

PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at <http://www.uspto.gov/web/offices/pac/doc/general/index.html>.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, <http://www.stopfakes.gov>. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4258).

LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

SelectUSA

The United States represents the largest, most dynamic marketplace in the world and is an unparalleled location for business investment, innovation, and commercialization of new technologies. The U.S. offers tremendous resources and advantages for those who invest and manufacture goods here. Through SelectUSA, our nation works to promote and facilitate business investment. SelectUSA provides information assistance to the international investor community; serves as an ombudsman for existing and potential investors; advocates on behalf of U.S. cities, states, and regions competing for global investment; and counsels U.S. economic development organizations on investment attraction best practices. To learn more about why the United States is the best country in the world to develop technology, manufacture products, deliver services, and grow your business, visit <http://www.SelectUSA.gov> or call +1-202-482-6800.

POWER OF ATTORNEY BY APPLICANT

I hereby revoke all previous powers of attorney given in the application identified in either the attached transmittal letter or the boxes below.

Application Number	Filing Date
14/487,947	September 16, 2014

(Note: The boxes above may be left blank if information is provided on form PTO/AIA/82A.)

☒ I hereby appoint the Patent Practitioner(s) associated with the following Customer Number as my/our attorney(s) or agent(s), and to transact all business in the United States Patent and Trademark Office connected therewith for the application referenced in the attached transmittal letter (form PTO/AIA/82A) or identified above:

00279

OR

☐ I hereby appoint Practitioner(s) named in the attached list (form PTO/AIA/82C) as my/our attorney(s) or agent(s), and to transact all business in the United States Patent and Trademark Office connected therewith for the patent application referenced in the attached transmittal letter (form PTO/AIA/82A) or identified above. (Note: Complete form PTO/AIA/82C.)

Please recognize or change the correspondence address for the application identified in the attached transmittal letter or the boxes above to:

☒ The address associated with the above-mentioned Customer Number

OR

☐ The address associated with Customer Number:

OR

Firm or Individual Name			
Address			
City	State	Zip	
Country			
Telephone	Email		

I am the Applicant (if the Applicant is a juristic entity, list the Applicant name in the box):

Unwired Technology LLC

- ☐ Inventor or Joint Inventor (title not required below)
- ☐ Legal Representative of a Deceased or Legally Incapacitated Inventor (title not required below)
- ☒ Assignee or Person to Whom the Inventor is Under an Obligation to Assign (provide signer's title if applicant is a juristic entity)
- ☐ Person Who Otherwise Shows Sufficient Proprietary Interest (e.g., a petition under 37 CFR 1.46(b)(2) was granted in the application or is concurrently being filed with this document) (provide signer's title if applicant is a juristic entity)

SIGNATURE of Applicant for Patent

The undersigned (whose title is supplied below) is authorized to act on behalf of the applicant (e.g., where the applicant is a juristic entity)

Signature		Date (Optional)	
Name	Mark A. Gullerson		
Title	Finance Director		

NOTE: Signature - This form must be signed by the applicant in accordance with 37 CFR 1.33. See 37 CFR 1.4 for signature requirements and certifications. If more than one applicant, use multiple forms.

☒ Total of 1 forms are submitted

This collection of information is required by 37 CFR 1.331, 1.32, and 1.33. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 3 minutes to complete including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the burden of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing this form, call 1-800-PTO-0198 and select option 2

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

CERTIFICATION STATEMENT

Please see 37 CFR 1.97 and 1.98 to make the appropriate selection(s):

☐ That each item of information contained in the information disclosure statement was first cited in any communication from a foreign patent office in a counterpart foreign application not more than three months prior to the filing of the information disclosure statement. See 37 CFR 1.97(e)(1).

OR

☐ That no item of information contained in the information disclosure statement was cited in a communication from a foreign patent office in a counterpart foreign application, and, to the knowledge of the person signing the certification after making reasonable inquiry, no item of information contained in the information disclosure statement was known to any individual designated in 37 CFR 1.56(c) more than three months prior to the filing of the information disclosure statement. See 37 CFR 1.97(e)(2).

☐ See attached certification statement.

☐ The fee set forth in 37 CFR 1.17 (p) has been submitted herewith.

☒ A certification statement is not submitted herewith.

SIGNATURE

A signature of the applicant or representative is required in accordance with CFR 1.33, 10.18. Please see CFR 1.4(d) for the form of the signature.

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

CERTIFICATION STATEMENT

Please see 37 CFR 1.97 and 1.98 to make the appropriate selection(s):

☐ That each item of information contained in the information disclosure statement was first cited in any communication from a foreign patent office in a counterpart foreign application not more than three months prior to the filing of the information disclosure statement. See 37 CFR 1.97(e)(1).

OR

☐ That no item of information contained in the information disclosure statement was cited in a communication from a foreign patent office in a counterpart foreign application, and, to the knowledge of the person signing the certification after making reasonable inquiry, no item of information contained in the information disclosure statement was known to any individual designated in 37 CFR 1.56(c) more than three months prior to the filing of the information disclosure statement. See 37 CFR 1.97(e)(2).

☐ See attached certification statement.

☐ The fee set forth in 37 CFR 1.17 (p) has been submitted herewith.

☒ A certification statement is not submitted herewith.

SIGNATURE

A signature of the applicant or representative is required in accordance with CFR 1.33, 10.18. Please see CFR 1.4(d) for the form of the signature.

Signature	/James R. Foley/	Date (YYYY-MM-DD)	2015-01-05
Name/Print	James R. Foley	Registration Number	39979

This collection of information is required by 37 CFR 1.97 and 1.98. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 1 hour to complete, including gathering, preparing and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. **SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

Warnings:

Information:

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

Publication Date: 03/26/2015

NOTICE OF PUBLICATION OF APPLICATION

The above-identified application will be electronically published as a patent application publication pursuant to 37 CFR 1.211, et seq. The patent application publication number and publication date are set forth above.

The publication may be accessed through the USPTO's publicly available Searchable Databases via the Internet at www.uspto.gov. The direct link to access the publication is currently <http://www.uspto.gov/patft/>.

The publication process established by the Office does not provide for mailing a copy of the publication to applicant. A copy of the publication may be obtained from the Office upon payment of the appropriate fee set forth in 37 CFR 1.19(a)(1). Orders for copies of patent application publications are handled by the USPTO's Office of Public Records. The Office of Public Records can be reached by telephone at (703) 308-9726 or (800) 972-6382, by facsimile at (703) 305-8759, by mail addressed to the United States Patent and Trademark Office, Office of Public Records, Alexandria, VA 22313-1450 or via the Internet.

In addition, information on the status of the application, including the mailing date of Office actions and the dates of receipt of correspondence filed in the Office, may also be accessed via the Internet through the Patent Electronic Business Center at www.uspto.gov using the public side of the Patent Application Information and Retrieval (PAIR) system. The direct link to access this status information is currently <http://pair.uspto.gov/>. Prior to publication, such status information is confidential and may only be obtained by applicant using the private side of PAIR.

Further assistance in electronically accessing the publication, or about PAIR, is available by calling the Patent Electronic Business Center at 1-866-217-9197.

Office Action Summary	Application No. 14/487,947	Applicant(s) VOTO ET AL.	
	Examiner ERNEST UNELUS	Art Unit 2181	AIA (First Inventor to File) Status Yes

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTHS FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) ☒ Responsive to communication(s) filed on 09/16/2014.
☐ A declaration(s)/affidavit(s) under **37 CFR 1.130(b)** was/were filed on _____.

2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

3) ☐ An election was made by the applicant in response to a restriction requirement set forth during the interview on _____; the restriction requirement and election have been incorporated into this action.

4) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims*

5) ☒ Claim(s) 1-22 is/are pending in the application.
5a) Of the above claim(s) _____ is/are withdrawn from consideration.

6) ☐ Claim(s) _____ is/are allowed.

7) ☒ Claim(s) 1-22 is/are rejected.

8) ☒ Claim(s) 1 and 16 is/are objected to.

9) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

* If any claims have been determined allowable, you may be eligible to benefit from the **Patent Prosecution Highway** program at a participating intellectual property office for the corresponding application. For more information, please see http://www.uspto.gov/patents/init_events/pph/index.jsp or send an inquiry to PPHfeedback@uspto.gov.

Application Papers

10) ☐ The specification is objected to by the Examiner.

11) ☒ The drawing(s) filed on 09/16/2014 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

Priority under 35 U.S.C. § 119

12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

Certified copies:

a) ☐ All b) ☐ Some** c) ☐ None of the:

1. ☐ Certified copies of the priority documents have been received.

2. ☐ Certified copies of the priority documents have been received in Application No. _____.

3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

** See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) ☒ Notice of References Cited (PTO-892)

2) ☒ Information Disclosure Statement(s) (PTO/SB/08a and/or PTO/SB/08b)
Paper No(s)/Mail Date 12/16/2014 and 01/22/2015.

3) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.

4) ☐ Other: _____.

DETAILED ACTION

The present application, filed on or after March 16, 2013, is being examined under the first inventor to file provisions of the AIA.

The instant application having Application No. 14/487,947 has a total of 22 claims pending in the application; there's one independent claim and 21 dependent claims, all of which are ready for examination by the examiner.

INFORMATION CONCERNING OATH/DECLARATION

Oath/Declaration

The applicant's oath/declaration has been reviewed by the examiner and is found to conform to the requirements prescribed in **37 C.F.R. 1.63**.

INFORMATION CONCERNING DRAWINGS

Drawings

The applicant's drawings submitted are acceptable for examination purposes.

ACKNOWLEDGEMENT OF REFERENCES CITED BY APPLICANT

As required by **M.P.E.P. 609(C)**, the applicant's submissions of the Information Disclosure Statements December 16, 2014 and January 22, 2015 are acknowledged by the examiner and the cited references have been considered in the examination of the claims now

pending. As required by **M.P.E.P 609 C(2)**, a copy of the PTOL-1449 initialed and dated by the examiner is attached to the instant office action.

OBJECTIONS TO THE CLAIMS

Claim 1 is objected to as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per **claim 1**, there is not a clear separation between a preamble and a body of the claim. Also, because of the phrase, ‘to enable’, it seems like the claimed limitation is intended use. Correction is needed.

Claims 1 and 16 are objected to because of the following informalities:

As per **claim 1**, please provide definition for acronym USB when first mentioned, for example, “Universal Serial Bus (USB)”; the same problem for acronym OTG of claim 16. Correction is needed

REJECTIONS BASED ON PRIOR ART

Claim Rejections - 35 USC § 102

In the event the determination of the status of the application as subject to AIA 35 U.S.C. 102 and 103 (or as subject to pre-AIA 35 U.S.C. 102 and 103) is incorrect, any correction of the statutory basis for the rejection will not be considered a new ground of rejection if the prior art relied upon, and the rationale supporting the rejection, would be the same under either status.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2181

(a)(1) the claimed invention was patented, described in a printed publication, or in public use, on sale or otherwise available to the public before the effective filing date of the claimed invention.

1. **Claims 1-22** are rejected under 35 U.S.C. 102(a)(1) as being anticipated by Kellzi et al. (US pub. 2007/0156293), hereinafter, “Kellzi”.

At the outset, Applicant is reminded that claims subject to examination will be given their broadest reasonable interpretation in light of the supporting disclosure. In re Morris, 127 F.3d 1048, 1054-55, 44 USPQ2d 1023,1027-28 (Fed. Cir. 1997). With this in mind, the discussion will focus on how the terms and relationships between the terms in the claims are met by the references.

2. As per **claim 1**, Kellzi discloses a system which is configured to enable a vehicle's embedded USB Host system (**interface unit 50 of fig. 1, as discloses in paragraph 0008**) to connect to consumer devices (**USB peripheral devices 80**) through a USB Hub (**USB controller 70**), regardless of whether the consumer devices are configured to act as USB Hosts or USB Devices (**see paragraph 0008**).

3. As per **claim 2**, Kellzi discloses “A system as recited in claim 1” [**See rejection to claim 1 above**], wherein the system is configured to be employed between the vehicle's embedded USB Host system and at least one USB port provided in the vehicle for connection to consumer devices (**see paragraph 0008 and fig. 1**).

4. As per **claim 3**, Kellzi discloses, wherein the system is configured to recognize and control whether the consumer device is required to be connected to each USB port as a USB Host or as a USB Device (**see paragraph 0008 and fig. 1**).

5. As per **claim 4**, Kellzi discloses wherein the system is configured to dynamically switch the device connection between USB Device mode and USB Host mode (see **paragraph 0008 and fig. 1**).

6. As per **claim 5**, Kellzi discloses wherein the system is configured to route signals through the USB Hub to a Head Unit in a case where the consumer device is acting as a USB Device (see **paragraph 0008 and fig. 1, which teaches a USB peripheral device in communication with interface unit 50, which also equates to having a ‘Head Unit’**).

7. As per **claim 6**, Kellzi discloses wherein the system is configured to route and process signals through a USB Bridge, which is connected to the USB Hub, in the case where the consumer device is acting as a USB Host, thereby rendering the consumer device compatible with the vehicle's embedded USB Host system (see **paragraph 0008 and fig. 1, which teaches a USB peripheral device in a bidirectional communication with interface unit 50, the function of a host device, which also equates to having a USB Bridge**).

8. As per **claim 7**, Kellzi discloses wherein the system comprises a USB Hub Module comprising the USB Hub, a USB Bridge, and at least one USB routing switch (see **fig. 4**).

9. As per **claim 8**, Kellzi discloses wherein the USB Hub is configured to be connected to the embedded USB Host system of the vehicle (see **paragraph 0008 and fig. 1. Note, it doesn't**

seem like this claim is further limiting the independent claim; see 112th fourth paragraph).

10. As per **claim 9**, Kellzi discloses wherein the at least one USB routing switch is configured to route each consumer port to either the USB Bridge or USB Hub (see **paragraph 0008 and fig. 1, which disclose routing data through USB controller 70, being equated to claimed USB Hub**).

11. As per **claim 10**, Kellzi discloses wherein the at least one USB routing switch comprises a plurality of USB analog multiplexing switches (see **paragraph 0013, which discloses an input signal conditioning circuitry 24-4 with multiple inputs and one output, same function of a multiplexing switch**).

12. As per **claim 11**, Kellzi discloses wherein the USB Bridge is configured to control the at least one USB routing switch (see **paragraph 0013**).

13. As per **claim 12**, Kellzi discloses wherein the USB Bridge is configured to control the at least one USB routing switch to route signals from the USB port to the USB Bridge in the case where the consumer device is acting as USB Host (see **paragraph 0008 and fig. 1, which teaches a USB peripheral device in a bidirectional communication with interface unit 50, the function of a host device, which, according to the claimed language, equates to a USB routing switch to route signals from the USB port to the USB Bridge**).

Art Unit: 2181

14. As per **claim 13**, Kellzi discloses wherein the USB Bridge is configured to process the signals from the consumer device and provide the signals to the USB Hub, thereby rendering the consumer device compatible with the embedded USB Host system of the vehicle (see **paragraph 0008 and fig. 1**).

15. As per **claim 14**, Kellzi discloses wherein the USB Bridge is configured to control the at least one USB routing switch to route signals from the USB port to the USB Bridge in the case where the consumer device is acting as USB Host (see **paragraph 0008 and fig. 1, which teaches a USB peripheral device in a bidirectional communication with interface unit 50, the function of a host device, which, according to the claimed language, equates to a USB routing switch to route signals from the USB port to the USB Bridge**).

16. As per **claim 15**, Kellzi discloses wherein the USB Bridge is configured to control the at least one USB routing switch to provide signals to the USB Hub, bypassing the USB Bridge in the case where the consumer device is acting as USB Device (see **paragraph 0008 and fig. 1, which teaches a USB peripheral device in communication with interface unit 50, the function of a USB device, which, according to the claimed language, equates to a USB routing switch to provide signals to the USB Hub, bypassing the USB Bridge**).

17. As per **claim 16**, Kellzi discloses wherein the system comprises a USB Hub Module comprising the USB Hub and a USB Bridge which is configured to function as an OTG port (see **paragraph 0008**).

18. As per **claim 17**, Kellzi discloses wherein the at least one USB routing switch comprises USB routing logic, and both the USB routing logic and the USB Bridge are integrated with the USB Hub in a combination USB Hub/USB Bridge Integrated Circuit (IC) (**see paragraph 0011**).

19. As per **claim 18**, Kellzi discloses wherein the USB Bridge comprises a bridge controller as well as endpoint buffers (**see paragraph 0013 and fig. 4, which disclose non-volatile memory 24-3, functioning as buffers**).

20. As per **claim 19**, Kellzi discloses wherein the endpoint buffers are configured to support one or more pipes of Bulk USB data connections between a Head Unit and the consumer devices (**see paragraph 0013**).

21. As per **claim 20**, Kellzi discloses wherein the system comprises a Head Unit which is electrically connected to the USB Hub via a single USB data cable (**see fig. 1**).

22. As per **claim 21**, Kellzi discloses wherein the system comprises a Head Unit, wherein the system is configured to support simultaneous active USB data connections between the Head Unit and multiple consumer devices, at least one of which being in host mode while the others are in device mode (**see fig. 1 and paragraph 0008**).

Art Unit: 2181

23. As per **claim 22**, Kellzi discloses wherein the system comprises a Head Unit, wherein the system is configured to support simultaneous active USB data connections between the Head Unit and some combination of embedded and consumer USB devices along with at least one device being in host mode (see **fig. 1 and paragraph 0008**).

CLOSING COMMENTS

CONCLUSION

a. STATUS OF CLAIMS IN THE APPLICATION

The following is a summary of the treatment and status of all claims in the application as recommended by **M.P.E.P. 707.07(i)**:

a (1) CLAIMS REJECTED IN THE APPLICATION

Per the instant office action, claims 1-22 have received a first action on the merits and are subject of a first action non-final.

b. DIRECTION OF FUTURE CORRESPONDENCES

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ernest Unelus whose telephone number is (571) 272-8596. The examiner can normally be reached on Monday to Friday 9:00 AM to 5:00PM.

IMPORTANT NOTE

If attempts to reach the above noted Examiner by telephone are unsuccessful, the Examiner's supervisor, Mr. Idriss Alrobye, can be reached at the following telephone number: Area Code (571) 270-1023.

The fax phone number for the organization where this application or proceeding

is assigned is 571-273-8300. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through private PAIR only. For more information about the PMR system, see [her//pair-direct.uspto.gov](http://pair-direct.uspto.gov). Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217- 91 97 (toll-free).

CERTIFICATION STATEMENT

Please see 37 CFR 1.97 and 1.98 to make the appropriate selection(s):

☐ That each item of information contained in the information disclosure statement was first cited in any communication from a foreign patent office in a counterpart foreign application not more than three months prior to the filing of the information disclosure statement. See 37 CFR 1.97(e)(1).

OR

☐ That no item of information contained in the information disclosure statement was cited in a communication from a foreign patent office in a counterpart foreign application, and, to the knowledge of the person signing the certification after making reasonable inquiry, no item of information contained in the information disclosure statement was known to any individual designated in 37 CFR 1.56(c) more than three months prior to the filing of the information disclosure statement. See 37 CFR 1.97(e)(2).

☐ See attached certification statement.

☐ The fee set forth in 37 CFR 1.17 (p) has been submitted herewith.

☒ A certification statement is not submitted herewith.

SIGNATURE

A signature of the applicant or representative is required in accordance with CFR 1.33, 10.18. Please see CFR 1.4(d) for the form of the signature.

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

RESPONSE TO THE OFFICE ACTION DATED AUGUST 19, 2015

Commissioner For Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

In the matter of the above-identified application and in response to the Office Action dated August 19, 2015, kindly enter the following amendments and consider the following remarks toward reconsideration of the present application.

Serial No.: 14/487,947
Art Unit: 2181
Page 1
203569295.1 43589/163154

IN THE CLAIMS:

1. (Currently amended) A system ~~which is configured to enable disposed within a vehicle's~~ vehicle, comprising:

an embedded Universal Serial Bus (USB) Host system;

a USB Hub interconnected to the embedded USB Host system;

a USB Bridge interconnected to the USB Hub; and

a USB routing switch interconnected to the USB Bridge, the USB Hub, and a USB Port,

wherein the USB routing switch is configured to connect the USB Port to consumer devices the USB Hub through a USB Hub, regardless of whether the consumer devices are configured to act as USB Hosts or USB Devices the USB Bridge when a consumer device connected to the USB Port is acting as a USB Host, and wherein the USB routing switch is configured to connect the USB Port directly to the USB Hub when the consumer device connected to the USB Port is acting as a USB Device, thereby rendering the consumer device compatible with the embedded USB Host system.

2. (Currently amended) A system as recited in claim 1, wherein the system USB routing switch is configured to ~~be employed between the vehicle's~~ connect a first USB Port of a plurality of USB Ports to USB Hub through the USB Bridge when a first consumer device connected to the first USB Port is acting as a USB Host, and wherein the USB routing switch is configured to simultaneously connect a second USB Port of the plurality of USB Ports directly to the USB Hub when a second consumer device connected to the second USB Port is acting as a USB Device, thereby rendering the first and second consumer devices compatible to function simultaneously with the embedded USB Host system and at least one USB port provided in the vehicle for connection to consumer devices.

3. (Currently amended) A system as recited in claim 1, wherein the system is configured to recognize whether the consumer device connected to the USB Port is configured to act as a USB Host or as a USB Device and control whether the consumer device is required to be connected to each USB port as a USB Host or as a USB Device the USB routing switch accordingly.

Serial No.: 14/487,947

Art Unit: 2181

Page 2

203569295.1 43589/163154

4. (Currently amended) A system as recited in claim ~~[[1]]~~ 7, wherein the system is configured to dynamically switch ~~the device connection~~ operation of USB Ports connected to the USB Hub Module between USB Device mode and USB Host mode.

5. (Currently amended) A system as recited in claim 1, wherein the system ~~is configured to route signals through the USB Hub to a Head Unit in a case where the consumer device is acting as a USB Device~~ further comprises an infotainment system containing the embedded USB Host system.

6. (Cancelled)

7. (Currently amended) A system as recited in claim 1, wherein the system ~~comprises a USB Hub Module comprising the USB Hub, a the USB Bridge, and at least one the USB routing switch~~ are disposed within a USB Hub Module.

8. (Currently amended) A system as recited in claim 7, wherein the USB Hub ~~is configured to be~~ Module is connected to the embedded USB Host system and a plurality of USB Ports connected to the embedded USB Host system of the vehicle a plurality of consumer devices.

9. (Currently amended) A system as recited in claim ~~[[7]]~~ 8, wherein the ~~at least one~~ USB routing switch is configured to ~~route~~ connect each consumer port device of the plurality of consumer devices to either the USB Bridge or the USB Hub based on whether each consumer device attached to each USB Port in the plurality of USB Ports is configured to act as a USB Host or a USB Device.

10. (Currently amended) A system as recited in claim ~~[[9]]~~ 1, wherein the ~~at least one~~ USB routing switch comprises a plurality of USB analog multiplexing switches.

11. (Currently amended) A system as recited in claim ~~[[7]]~~ 1, wherein the USB Bridge is configured to control the ~~at least one~~ USB routing switch.

12. – 16. (Cancelled)

Serial No.: 14/487,947

Art Unit: 2181

Page 3

203569295.1 43589/163154

17. (Currently amended) A system as recited in claim ~~[[7]]~~ 23, wherein the ~~at least one~~ USB routing switch comprises Hub, the USB routing logic Bridge, and both the USB routing logic and the USB Bridge switch system are integrated with the USB Hub in a combination USB Hub/USB Bridge in an Integrated Circuit (IC).

18. (Currently amended) A system as recited in claim ~~[[7]]~~ 1, wherein the USB Bridge comprises a bridge controller as well as endpoint buffers.

19. (Currently amended) A system as recited in claim 18, wherein the endpoint buffers are configured to support ~~one or more pipes of Bulk~~ a USB data connections connection pipe between a Head Unit an infotainment system and the consumer ~~devices~~ device.

20. (Currently amended) A system as recited in claim 1, wherein the system further comprises a Head Unit an infotainment system with a single USB host which is electrically connected to the USB Hub via a single USB data cable connection.

21. (Currently amended) A system as recited in claim 1, wherein the system further comprises a Head Unit an infotainment system, wherein the system is configured to support simultaneous active USB data connections between the Head Unit infotainment system and multiple consumer devices, at least one of which ~~being in host mode~~ is a USB Host while the others are ~~in device mode~~ USB Devices.

22. (Currently amended) A system as recited in claim 1, wherein the system further comprises a Head Unit an infotainment system, wherein the system is configured to support simultaneous active USB data connections between the Head Unit infotainment system and some combination of embedded devices and consumer ~~USB devices~~ that are USB Devices along with at least one ~~device being in host mode~~ that is a USB Host.

23. (New) A system as recited in claim 1, wherein the USB routing switch comprises digital routing logic.

Serial No.: 14/487,947

Art Unit: 2181

203569295.1 43589/163154

REMARKS

In response to the Office Action, Applicant has amended claims 1-5, 7-11, and 16-22 and cancelled claims 5 and 12-15. In addition, Applicant has added a new claim 23 in order to overcome the rejection of these claims.

Please consider the following remarks supporting the amendments to the claims.

Claim 1 is amended to more particularly point out that the claim is directed to a system disposed within a vehicle and to point out that this system includes an embedded Universal Serial Bus (USB) Host system, a USB Hub interconnected to the embedded USB Host system, a USB Bridge interconnected to the USB Hub, and a USB routing switch interconnected to the USB Bridge, the USB Hub, and a USB Port. The USB routing switch is configured to connect the USB Port to the USB Hub through the USB Bridge when a consumer device connected to the USB Port is acting as a USB Host. The USB routing switch is configured to connect the USB Port directly to the USB Hub when the consumer device connected to the USB Port is acting as a USB Device, thereby rendering the consumer device compatible with the embedded USB Host system. Support for these amendments may be found, *inter alia*, in Fig. 4 of the drawings and paragraph 0026-0028 of the specification.

Claim 2 is amended to more particularly point out that the USB routing switch is configured to connect a first USB Port of a plurality of USB Ports to USB Hub through the USB Bridge when a first consumer device connected to the first USB Port is acting as a USB Host. Claim 2 is also amended to more particularly point out that the USB routing switch is configured to simultaneously connect a second USB Port of the plurality of USB Ports directly to the USB Hub when a second consumer device connected to the second USB Port is acting as a USB Device, thereby rendering the first and second consumer devices compatible to function simultaneously with the embedded USB Host system. Support for these amendments may be found, *inter alia*, in Fig. 4 of the drawings and paragraph 0034 of the specification.

Claim 3 is amended to more particularly point out that the system is configured to recognize whether the consumer device connected to the USB Port is configured to act as a USB Host or as a USB Device and control the USB routing switch accordingly. Support for this amendment may be found, *inter alia*, in paragraph 0033 of the specification.

Serial No.: 14/487,947

Art Unit: 2181

Page 5

203569295.1 43589/163154

Claim 4 is amended to be dependent on claim 7 and to more particularly point out that the system is configured to dynamically switch operation of USB Ports connected to the USB Hub Module between USB Device mode and USB Host mode. Support for this amendment may be found, *inter alia*, in paragraph 0012 of the specification.

Claim 5 is amended to more particularly point out that the system further comprises an infotainment system containing the embedded USB Host system. Support for this amendment may be found, *inter alia*, in Fig. 3 of the drawings.

Claim 6 is cancelled because the limitations it contained were amended to claim 1.

Claim 7 is amended to more particularly point out that the USB Hub, the USB Bridge, and the USB routing switch system are disposed within a USB Hub Module. Support for this amendment may be found, *inter alia*, in Fig 4 of the drawings and paragraph 0013 of the specification.

Claim 8 is amended to more particularly point out that the USB Hub Module is connected to the embedded USB Host system and a plurality of USB Ports connected to a plurality of consumer devices. Support for this amendment may be found, *inter alia*, in Fig 4 of the drawings and paragraph 0013 of the specification.

Claim 9 is amended to be dependent on claim 8 and to more particularly point out that the USB routing switch is configured to connect each consumer device of the plurality of consumer devices to either the USB Bridge or the USB Hub based on whether each consumer device attached to each USB Port in the plurality of USB Ports is configured to act as a USB Host or a USB Device. Support for this amendment may be found, *inter alia*, in paragraph 0013 of the specification.

Claims 10 and 11 is amended to be dependent on claim 1.

Claims 12-16 are cancelled without disclaimer or prejudice. Please reserve the right to present these claims in a later filed amendment or continuation application.

Claim 17 is amended to be dependent on new claim 23 and to more particularly point out that the USB Hub, the USB Bridge, and the USB routing switch system are integrated in an Integrated Circuit (IC). Support for this amendment may be found, *inter alia*, in Fig. 5 of the drawings and paragraph 0020 of the specification.

Claim 18 is amended to be dependent on claim 1.

Serial No.: 14/487,947

Art Unit: 2181

Page 6

203569295.1 43589/163154

Claim 19 is amended to more particularly point out that the endpoint buffers are configured to support a USB data connection pipe between an infotainment system and the consumer device. Support for this amendment may be found, *inter alia*, in paragraph 0032 of the specification.

Claim 20 is amended to more particularly point out that the system further comprises an infotainment system with a single USB host which is electrically connected to the USB Hub via a single USB data connection. Support for this amendment may be found, *inter alia*, in paragraph 0026.

Claim 21 is amended to more particularly point out that the system further comprises an infotainment system, wherein the system is configured to support simultaneous active USB data connections between the infotainment system and multiple consumer devices, at least one of which is a USB Host while others are USB Devices. Support for this amendment may be found, *inter alia*, in Fig. 5 of the drawings and paragraph 0034 of the specification.

Claim 22 is amended to more particularly point out that the system further comprises an infotainment system, wherein the system is configured to support simultaneous active USB data connections between the infotainment system and some combination of embedded devices and consumer devices that are USB Devices along with at least one that is a USB Host. Support for this amendment may be found, *inter alia*, in Fig. 5 of the drawings and paragraph 0034 of the specification.

New claim 23 is dependent on claim 1 and is added to more particularly point out that the USB routing switch comprises digital routing logic. Support for this claim may be found, *inter alia*, in paragraph 0030 of the specification.

Claim Objections

Please consider these arguments in response to the Examiner's objection to and rejection of the claims.

Claim 1 stands objected to as being indefinite because there is not a clear separation between the preamble and body of the claim. Claim 1, as amended, provides a clear separation between the preamble and the body of the claim using the transitional phrase "comprising". Claim 1 also stands objected to because the phrase "to enable" seems like the claimed limitation is intended use. Claim 1, as amended, eliminates the use of the phrase "to enable". Claim 1

Serial No.: 14/487,947

Art Unit: 2181

Page 7

203569295.1 43589/163154

stands objected to for failing to define an acronym on first use. Claim 1, as amended, defines the acronym USB as “Universal Serial Bus (USB)”.

Claim Rejections based on pre-AIA 35 USC § 102(b)

Claims 1-5, 7-11, and 17-22 stand rejected under 35 USC § 102(a)(1) as being anticipated by Kellzi, et al. [U.S. Patent Publication No. 2007/0156293], hereinafter referred to as Kellzi.

In Item 2, Examiner points to paragraph 0008 to show that an embedded USB Host system is configured to connect to consumer devices through a USB Hub, regardless of whether the consumer devices are configured to act as USB Hosts or USB Devices.

Paragraph 0008 states that “The devices 80 may also be compliant with the USB On-the-Go (OTG) protocol, e.g. as described in the On-The-Go Supplement to the USB 2.0 Specification, Revision 1.0a, Jun. 24, 2003, and may be a OTG dual-role device, which can act as either a host to certain USB or OTG peripherals or as a peripheral to standard USB or dual-role hosts.”

Following is the description of the Host Negotiation Protocol (HNP) from USB 2.0 Specification, Revision 1.0a (emphasis added):

6.3 HNP Overview

HNP is used to transfer control of a connection from the default Host (A-device) to the default Peripheral (B-device). This is accomplished by having the A-device condition the B-device to be able to take control of the bus, and then having the A-device present an opportunity for the B-device to take control.

The B-device is conditioned when the A-device sends a SetFeature(b_hnp_enable) command. After sending this command, the A-device may suspend the bus to signal the B-device that it may now take control of the bus. If the B-device wants to use the bus at that time, it signals a disconnect to the A-device. If the A-device has enabled the B-device to become Host, then the A-device will interpret this disconnect during suspend as a request from the B-device to become Host. The A-device will complete the handoff by turning on its pull-up resistor on D+.

When the B-device has finished using the bus, it starts the process of returning control to the A-device simply by stopping all bus activity and turning on its D+ pull-up resistor

Serial No.: 14/487,947

Art Unit: 2181

Page 8

203569295.1 43589/163154

when the bus is in FS idle. The A-device will detect this lack of activity and turn off its pull-up resistor. When the A-device detects the connection from the B-device, it will resume bus operation as Host.

6.5.1 b_hnp_enable

Setting this feature indicates to the B-device that it has been enabled to perform HNP.

An A-device may set this feature if, and only if, the B-device is connected directly to an A-device port that supports HNP (i.e. no intervening hub between the Host and the B-device).

The b_hnp_enable feature takes precedence over either the a_hnp_support or a_alt_hnp_support features. Thus, if b_hnp_enable is set, then HNP is enabled in the B-device, regardless of whether or not the a_hnp_support or a_alt_hnp_support bits are set.

This feature is only cleared on a bus reset or at the end of a session. It cannot be cleared with a ClearFeature(b_hnp_enable) command.

It is clear from the USB 2.0 Specification that devices compliant with the USB On-the-Go (OTG) protocol will not transfer control of a connection from the default Host (A-device) to the default Peripheral (B-device) if there is an intervening hub between the Host and the B-device. Therefore, an OTG dual-role device such as that shown by Kellzi cannot act as either a host to certain USB or OTG peripherals or as a peripheral to standard USB or dual-role hosts if there is an intervening hub between them.

In contrast to the system shown by Kellzi, Applicants' system includes an embedded Universal Serial Bus (USB) Host system. A USB Hub is interconnected to this embedded USB Host system. The system also includes a USB Bridge that is interconnected to the USB Hub. The system further includes a USB routing switch that interconnected to the USB Bridge, the USB Hub, and at least one USB Port. The USB routing switch is configured to connect the USB Port to the USB Hub through the USB Bridge when a consumer device connected to the USB Port is acting as a USB Host. The USB routing switch is configured to connect the USB Port directly to the USB Hub when the consumer device connected to the USB Port is acting as a

Serial No.: 14/487,947

Art Unit: 2181

Page 9

203569295.1 43589/163154

USB Device. Therefore, Applicants' system includes an intervening USB Hub between the embedded USB Host system and the consumer device.

Claim 1, as amended, is directed to a system disposed within a vehicle that includes an embedded Universal Serial Bus (USB) Host system, a USB Hub interconnected to the embedded USB Host system, a USB Bridge interconnected to the USB Hub, and a USB routing switch interconnected to the USB Bridge, the USB Hub, and a USB Port. The USB routing switch is configured to connect the USB Port to the USB Hub through the USB Bridge when a consumer device connected to the USB Port is acting as a USB Host. The USB routing switch is configured to connect the USB Port directly to the USB Hub when the consumer device connected to the USB Port is acting as a USB Device, thereby rendering the consumer device compatible with the embedded USB Host system.

As discussed above, the system shown by Kellzi cannot act as either a host to certain USB or OTG peripherals or as a peripheral to standard USB or dual-role hosts if there is an intervening hub between them. Therefore, Kellzi does not show the features of a USB Hub interconnected to the embedded USB Host system, a USB Bridge interconnected to the USB Hub, and a USB routing switch interconnected to the USB Bridge, the USB Hub, and a USB Port. The USB routing switch is configured to connect the USB Port to the USB Hub through the USB Bridge when a consumer device connected to the USB Port is acting as a USB Host. The USB routing switch is configured to connect the USB Port directly to the USB Hub when the consumer device connected to the USB Port is acting as a USB Device, thereby rendering the consumer device compatible with the embedded USB Host system as recited in claim 1.

In addition, in Item 7, the examiner points to paragraph 0008 and Fig. 1, which teaches a USB peripheral device in a bidirectional communication with interface unit 50, the function of a host device, alleging that this equates to having a USB Bridge.

As stated in paragraph 0028 of the specification, "it is envisioned that the responses to the descriptor requests made by the phone (USB Host) are either answered locally by the Bridge or preferably, the requests are forwarded through the Bridge to the Head Unit where its device drivers process the request and return the response." The descriptor responses from the device driver are conveyed to the USB Bridge, which then, in turn, passes them to the phone. By passing descriptor request to the Head Unit drivers and returning the responses from the Head

Serial No.: 14/487,947

Art Unit: 2181

Page 10

203569295.1 43589/163154

Unit drivers back to the consumer device, the Bridge appears as a transparent component in the USB system architecture". Applicants respectfully point out that the function of the USB Bridge described here exceeds mere bidirectional communication between a peripheral device and host.

Therefore, Applicants submit that Kellzi does not show the features of a USB Bridge that is interconnected to the USB Hub, a USB routing switch interconnected to the USB Bridge, and the USB routing switch being configured to connect the USB Port to the USB Hub through the USB Bridge when a consumer device connected to the USB Port is acting as a USB Host as recited in claim 1.

The preceding is not an exhaustive list of all of the features of claim 1 that are not shown by Kellzi. However, the examples listed here are sufficient to support an argument against anticipation of claim 1 by Kellzi.

Therefore, Applicants submit that Kellzi does not show each and every element in Applicants' claim 1 or of claims 2-5, 7-11, and 16-22 dependent thereon, therefore claims 1-5, 7-11, and 16-22 are not anticipated by Kellzi.

In addition, claim 2, which is dependent on claim 1 recites "the USB routing switch is configured to connect a first USB Port of a plurality of USB Ports to the USB Hub through the USB Bridge when a first consumer device connected to the first USB Port is acting as a USB Host, and wherein the USB routing switch is configured to simultaneously connect a second USB Port of the plurality of USB Ports directly to the USB Hub when a second consumer device connected to the second USB Port is acting as a USB Device, thereby rendering the first and second consumer devices compatible to function simultaneously with the embedded USB Host system".

As described in the On-The-Go Supplement to the USB 2.0 Specification, Revision 1.0a, "the b_hnp_enable feature takes precedence over either the a_hnp_support or a_alt_hnp_support features. Thus, if b_hnp_enable is set, then HNP is enabled in the B-device, regardless of whether or not the a_hnp_support or a_alt_hnp_support bits are set. The b_hnp_enable feature is only cleared on a bus reset or at the end of a session. It cannot be cleared with a ClearFeature(b_hnp_enable) command". Therefore, a USB OTG device cannot support simultaneous connection of the USB host to another USB host and connection of the USB Host to a USB Device. Since the system of Kellzi is implementing USB OTG, the system shown

Serial No.: 14/487,947

Art Unit: 2181

Page 11

203569295.1 43589/163154

cannot connect a first USB Port of a plurality of USB Ports to the USB Hub through the USB Bridge when a first consumer device connected to the first USB Port is acting as a USB Host, and simultaneously connect a second USB Port of the plurality of USB Ports directly to the USB Hub when a second consumer device connected to the second USB Port is acting as a USB Device, thereby rendering the first and second consumer devices compatible to function simultaneously with the embedded USB Host system.

Therefore, Applicants submit that Kellzi does not show each and every element in Applicants' claim 2, therefore claim 2 is not anticipated by Kellzi.

For these reasons, Applicants respectfully request that the rejection of claims 1-5, 7-11, and 16-22 under 35 USC § 102(a)(1) be reconsidered and withdrawn and that the claims be allowed.

New Claim 23

Applicants submit that claim 23 is allowable at least due to its dependence on claim 1 which is believed to be allowable.

Conclusion

Should the present claims not be deemed adequate to effectively define the patentable subject matter, the Examiner is respectfully urged to call the undersigned attorney of record to discuss the claims in an effort to reach an agreement toward allowance of the present application.

Respectfully submitted,

Date: October 27, 2015

Office Action Summary	Application No. 14/487,947	Applicant(s) VOTO ET AL.	
	Examiner ERNEST UNELUS	Art Unit 2181	AIA (First Inventor to File) Status Yes

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTHS FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) ☒ Responsive to communication(s) filed on 10/27/2015.
☐ A declaration(s)/affidavit(s) under **37 CFR 1.130(b)** was/were filed on _____.

2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

3) ☐ An election was made by the applicant in response to a restriction requirement set forth during the interview on _____; the restriction requirement and election have been incorporated into this action.

4) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims*

5) ☒ Claim(s) 1-5, 7-11 and 17-23 is/are pending in the application.
5a) Of the above claim(s) _____ is/are withdrawn from consideration.

6) ☐ Claim(s) _____ is/are allowed.

7) ☒ Claim(s) 1-5, 7-11 and 17-23 is/are rejected.

8) ☐ Claim(s) _____ is/are objected to.

9) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

* If any claims have been determined allowable, you may be eligible to benefit from the **Patent Prosecution Highway** program at a participating intellectual property office for the corresponding application. For more information, please see http://www.uspto.gov/patents/init_events/pph/index.jsp or send an inquiry to PPHfeedback@uspto.gov.

Application Papers

10) ☐ The specification is objected to by the Examiner.

11) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

Priority under 35 U.S.C. § 119

12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

Certified copies:

a) ☐ All b) ☐ Some** c) ☐ None of the:

1. ☐ Certified copies of the priority documents have been received.

2. ☐ Certified copies of the priority documents have been received in Application No. _____.

3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

** See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

The present application, filed on or after March 16, 2013, is being examined under the first inventor to file provisions of the AIA.

RESPONSE TO AMENDMENT

Claim rejections based on prior art

Applicant's arguments filed 10/27/2015 with respect to claims 1-5, 7-11 and 17-23 have been fully considered and are moot in view of newly cited reference.

INFORMATION CONCERNING OATH/DECLARATION

Oath/Declaration

The applicant's oath/declaration has been reviewed by the examiner and is found to conform to the requirements prescribed in **37 C.F.R. 1.63**.

INFORMATION CONCERNING DRAWINGS

Drawings

The applicant's drawings submitted are acceptable for examination purposes.

REJECTIONS BASED ON PRIOR ART

Claim Rejections - 35 USC § 102

In the event the determination of the status of the application as subject to AIA 35 U.S.C. 102 and 103 (or as subject to pre-AIA 35 U.S.C. 102 and 103) is incorrect, any correction of the

Art Unit: 2181

statutory basis for the rejection will not be considered a new ground of rejection if the prior art relied upon, and the rationale supporting the rejection, would be the same under either status.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a)(1) the claimed invention was patented, described in a printed publication, or in public use, on sale or otherwise available to the public before the effective filing date of the claimed invention.

1. **Claims 1-5, 7-9, 11 and 18-23**, are rejected under 35 U.S.C. 102(a)(1) as being anticipated by Bohm et al. (US pub. 2006/0227759), hereinafter, “Bohm”.
2. As per **claim 1**, Bohm discloses a system disposed within a vehicle, comprising: an embedded Universal Serial Bus (USB) Host system (**computer system 101, as disclose in fig. 3 and paragraph 0037**); a USB Hub (**USB switching hub 119**) interconnected to the embedded USB Host system (**see fig. 3**); a USB Bridge (**hub controller 203**) interconnected to the USB Hub (**see fig. 3**); and a USB routing switch (**downstream switching logic 201**) interconnected to the USB Bridge, the USB Hub, and a USB Port (**downstream port 121**) (**see fig. 3 and paragraph 0037**), wherein the USB routing switch is configured to connect the USB Port to the USB Hub through the USB Bridge when a consumer device (**peripheral device 125**) connected to the USB Port is acting as a USB Host (**see paragraph 0040, which discloses peripheral device 125 to transmit data and receive data, a host function**), and wherein the USB routing switch is configured to connect the USB Port directly to the USB Hub when the consumer device connected to the USB Port is acting as a USB Device, thereby rendering the consumer device compatible with the embedded USB Host system (**see fig. 3 and paragraph 0040**).

3. As per **claim 2**, Bohm discloses “A system as recited in claim 1” [See rejection to claim **1 above**], wherein the USB routing switch is configured to connect a first USB Port of a plurality of USB Ports to USB Hub through the USB Bridge when a first consumer device connected to the first USB Port is acting as a USB Host, and wherein the USB routing switch is configured to simultaneously connect a second USB Port of the plurality of USB Ports directly to the USB Hub when a second consumer device connected to the second USB Port is acting as a USB Device, thereby rendering the first and second consumer devices compatible to function simultaneously with the embedded USB Host system (see **paragraph 0041**).

4. As per **claim 3**, Bohm discloses wherein the system is configured to recognize whether the consumer device connected to the USB Port is configured to act as a USB Host or as a USB Device and control the USB routing switch accordingly (see **paragraph 0041**).

5. As per **claim 4**, Bohm discloses wherein the system is configured to dynamically switch operation of USB Ports connected to the USB Hub Module between USB Device mode and USB Host mode (see **paragraph 0041**).

6. As per **claim 5**, Bohm discloses wherein the system further comprises an infotainment system containing the embedded USB Host system (see **paragraph 0035**).

7. As per **claim 7**, Bohm discloses wherein the USB Hub, the USB Bridge, and the USB routing switch system are disposed within a USB Hub Module (**see fig. 3**).
8. As per **claim 8**, Bohm discloses wherein the USB Hub Module is connected to the embedded USB Host system and a plurality of USB Ports connected to a plurality of consumer devices (**see fig. 3**).
9. As per **claim 9**, Bohm discloses wherein the USB routing switch is configured to connect each consumer device of the plurality of consumer devices to either the USB Bridge or the USB Hub based on whether each consumer device attached to each USB Port in the plurality of USB Ports is configured to act as a USB Host or a USB Device (**see paragraph 0041**).
10. As per **claim 11**, Bohm discloses wherein the USB Bridge is configured to control the USB routing switch (**see paragraph 0041**).
11. As per **claim 18**, Bohm discloses wherein the USB Bridge comprises a bridge controller as well as endpoint buffers (**see paragraph 0070**).
12. As per **claim 19**, Bohm discloses wherein the endpoint buffers are configured to support a USB data connection pipe between an infotainment system and the consumer device (**see paragraph 0035**).

13. As per **claim 20**, Bohm discloses wherein the system further comprises an infotainment system with a single USB host which is electrically connected to the USB Hub via a single USB data connection (see **fig. 3 and paragraph 0035**).

14. As per **claim 21**, Bohm discloses wherein the system further comprises an infotainment system, wherein the system is configured to support simultaneous active USB data connections between the infotainment system and multiple consumer devices, at least one of which is a USB Host while others are USB Devices (see **paragraphs 0035 and 041**).

15. As per **claim 22**, Bohm discloses wherein the system further comprises an infotainment system, wherein the system is configured to support simultaneous active USB data connections between the infotainment system and some combination of embedded devices and consumer devices that are USB Devices along with at least one that is a USB Host (see **fig. 17 and paragraph 0035**).

16. As per **claim 23**, Bohm discloses wherein the USB routing switch comprises digital routing logic (see **paragraph 0068**).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103 which forms the basis for all obviousness rejections set forth in this Office action:

A patent for a claimed invention may not be obtained, notwithstanding that the claimed invention is not identically disclosed as set forth in section 102 of this title, if the differences between the claimed invention and the prior art are such that the claimed invention as a whole would have been obvious

Art Unit: 2181

before the effective filing date of the claimed invention to a person having ordinary skill in the art to which the claimed invention pertains. Patentability shall not be negated by the manner in which the invention was made.

17. **Claims 10 and 17** are rejected under 35 U.S.C. 103 as being unpatentable over Bohm et al. (US pub. 2006/0227759) in view of Wright (US pat. 7,502,878).

18. As per **claim 10**, Bohm discloses “A system as recited in claim 1” [See rejection to **claim 1 above**], but fails to expressly disclose wherein the USB routing switch comprises a plurality of USB analog multiplexing switches.

Wright discloses wherein the USB routing switch comprises a plurality of USB analog multiplexing switches (**see col. 3, lines 54-64**).

Bohm et al. (US pub. 2006/0227759) and Wright (US pat. 7,502,878) are analogous art because they are from the same field of selecting a hub connecting a host and peripheral devices.

At the time of the invention it would have been obvious to a person of ordinary skill in the art to combine a Universal Serial Bus (USB) switching hub, as taught by Bohm, and an apparatus for switching USB devices between multiple USB hosts, as discloses by Wright.

The motivation for doing so would have been obvious because Wright teaches switching between multiple hosts and different USB devices.

Therefore, it would have been obvious to combine Wright (US pat. 7,502,878) with Bohm et al. (US pub. 2006/0227759) for the benefit of creating the system to obtain the invention as specified in claim 10.

19. As per **claim 17**, Bohm discloses “A system as recited in claim 23” [See rejection to **claim 23 above**], but fails to expressly disclose wherein the USB Hub, the USB Bridge, and the USB routing switch system are integrated in an Integrated Circuit (IC).

Wright discloses wherein the USB Hub, the USB Bridge, and the USB routing switch system are integrated in an Integrated Circuit (IC) (**see figs. 5 and 8 and col. 8, lines 19-30**).

Bohm et al. (US pub. 2006/0227759) and Wright (US pat. 7,502,878) are analogous art because they are from the same field of selecting a hub connecting a host and peripheral devices.

At the time of the invention it would have been obvious to a person of ordinary skill in the art to combine a Universal Serial Bus (USB) switching hub, as taught by Bohm, and an apparatus for switching USB devices between multiple USB hosts, as discloses by Wright.

The motivation for doing so would have been obvious because Wright teaches switching between multiple hosts and different USB devices.

Therefore, it would have been obvious to combine Wright (US pat. 7,502,878) with Bohm et al. (US pub. 2006/0227759) for the benefit of creating the system to obtain the invention as specified in claim 17.

CLOSING COMMENTS

Conclusion

a. STATUS OF CLAIMS IN THE APPLICATION

The following is a summary of the treatment and status of all claims in the application as recommended by **M.P.E.P. 707.07(i)**:

a(1) CLAIMS REJECTED IN THE APPLICATION

Per the instant office action, claims 1-5, 7-11 and 17-23 have received a final action on the merits.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

b. DIRECTION OF FUTURE CORRESPONDENCES

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ernest Unelus whose telephone number is (571) 272-8596. The examiner can normally be reached on Monday to Friday 9:00 AM to 5:00 PM.

IMPORTANT NOTE

If attempts to reach the above noted Examiner by telephone is unsuccessful, the Examiner's supervisor, Mr. Idriss N. Alrobaye, can be reached at the following telephone number: Area Code (571) 272-1023.

The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300. Information regarding the status of an application may be obtained

Art Unit: 2181

from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Appl. No. : 14/487,947 Confirmation No. 2147
Applicant : Unwired Technology LLC
Inventors : Robert Voto, et al.
Filed : 09/16/2014
TC/AU : 2181
Examiner : Ernest Unelus
Docket No. : DP-322037 (formerly 40651-163154)
Title : Flexible Mobile Device Connectivity to Automotive Systems with USB Hubs

RESPONSE UNDER 37 CFR § 1.116

Dear Examiner Unelus:

This paper is in response to the final office action mailed on February 9, 2016 for the above referenced application. Please consider the remarks and arguments presented herein.

I.	Listing of the Claims	Page 2
II.	Remarks and Arguments	Page 5
III.	Conclusion	Page 8

AMENDMENTS TO THE CLAIMS

A listing of the pending claims is presented here for the Examiner's convenience.

1. (Previously presented) A system disposed within a vehicle, comprising:
 - an embedded Universal Serial Bus (USB) Host system;
 - a USB Hub interconnected to the embedded USB Host system;
 - a USB Bridge interconnected to the USB Hub; and
 - a USB routing switch interconnected to the USB Bridge, the USB Hub, and a USB Port,wherein the USB routing switch is configured to connect the USB Port to the USB Hub through the USB Bridge when a consumer device connected to the USB Port is acting as a USB Host, and wherein the USB routing switch is configured to connect the USB Port directly to the USB Hub when the consumer device connected to the USB Port is acting as a USB Device, thereby rendering the consumer device compatible with the embedded USB Host system.
2. (Previously presented) A system as recited in claim 1, wherein the USB routing switch is configured to connect a first USB Port of a plurality of USB Ports to the USB Hub through the USB Bridge when a first consumer device connected to the first USB Port is acting as a USB Host, and wherein the USB routing switch is configured to simultaneously connect a second USB Port of the plurality of USB Ports directly to the USB Hub when a second consumer device connected to the second USB Port is acting as a USB Device, thereby rendering the first and second consumer devices compatible to function simultaneously with the embedded USB Host system.
3. (Previously presented) A system as recited in claim 1, wherein the system is configured to recognize whether the consumer device connected to the USB Port is configured to act as a USB Host or as a USB Device and control the USB routing switch accordingly.
4. (Previously presented) A system as recited in claim 7, wherein the system is configured to dynamically switch operation of USB Ports connected to the USB Hub Module between USB Device mode and USB Host mode.

5. (Previously presented) A system as recited in claim 1, wherein the system further comprises an infotainment system containing the embedded USB Host system.
6. (Cancelled)
7. (Previously presented) A system as recited in claim 1, wherein the USB Hub, the USB Bridge, and the USB routing switch system are disposed within a USB Hub Module.
8. (Previously presented) A system as recited in claim 7, wherein the USB Hub Module is connected to the embedded USB Host system and a plurality of USB Ports connected to a plurality of consumer devices.
9. (Previously presented) A system as recited in claim 8, wherein the USB routing switch is configured to connect each consumer device of the plurality of consumer devices to either the USB Bridge or the USB Hub based on whether each consumer device attached to each USB Port in the plurality of USB Ports is configured to act as a USB Host or a USB Device.
10. (Previously presented) A system as recited in claim 1, wherein the USB routing switch comprises a plurality of USB analog multiplexing switches.
11. (Previously presented) A system as recited in claim 1, wherein the USB Bridge is configured to control the USB routing switch.
12. – 16. (Cancelled)
17. (Previously presented) A system as recited in claim 23, wherein the USB Hub, the USB Bridge, and the USB routing switch system are integrated in an Integrated Circuit (IC).
18. (Previously presented) A system as recited in claim 1, wherein the USB Bridge comprises a bridge controller as well as endpoint buffers.
19. (Previously presented) A system as recited in claim 18, wherein the endpoint buffers are configured to support a USB data connection pipe between an infotainment system and the consumer device.

20. (Previously presented) A system as recited in claim 1, wherein the system further comprises an infotainment system with a single USB host which is electrically connected to the USB Hub via a single USB data connection.

21. (Previously presented) A system as recited in claim 1, wherein the system further comprises an infotainment system, wherein the system is configured to support simultaneous active USB data connections between the infotainment system and multiple consumer devices, at least one of which is a USB Host while others are USB Devices.

22. (Previously presented) A system as recited in claim 1, wherein the system further comprises an infotainment system, wherein the system is configured to support simultaneous active USB data connections between the infotainment system and some combination of embedded devices and consumer devices that are USB Devices along with at least one that is a USB Host.

23. (Previously presented) A system as recited in claim 1, wherein the USB routing switch comprises digital routing logic.

REMARKS AND ARGUMENTS

Claim Rejections based on 35 USC § 102(a)(1)

Claims 1-5, 7-9, and 18-23 stand rejected under 35 USC § 102(a)(1) as being anticipated by Bohm, et al. [U.S. Patent Publication No. 2006/0227759], hereinafter referred to as Bohm.

Pending claim 1 is directed to a system disposed within a vehicle that includes an embedded Universal Serial Bus (USB) Host system, a USB Hub interconnected to the embedded USB Host system, a USB Bridge interconnected to the USB Hub, and a USB routing switch interconnected to the USB Bridge, the USB Hub, and a USB Port. The USB routing switch is configured to connect the USB Port to the USB Hub through the USB Bridge when a consumer device connected to the USB Port is acting as a USB Host. The USB routing switch is configured to connect the USB Port directly to the USB Hub when the consumer device connected to the USB Port is acting as a USB Device, thereby rendering the consumer device compatible with the embedded USB Host system.

In Item 2, of the instant office action, Examiner asserts that Fig. 3 and paragraphs 0037 and 0040 of Bohm disclose all of the features of pending claim 1.

Particularly, Examiner asserts that the USB Hub interconnected to the USB Host system is shown by the USB switching hub 119 of Bohm and the USB Bridge interconnected to the USB Hub is shown by hub controller 203 of Bohm. Examiner also asserts that the USB routing switch is shown by the downstream switching logic 201 of Bohm.

Applicant respectfully points out the hub controller 203 and the downstream switching logic 201 are components of the USB switching hub 119, rather than a separate elements. Applicant submits that it not logical that the hub controller 203 and downstream switching logic 201 can be components of the USB switching hub 119 that are contained within USB switching hub 119 and at the very same time be interconnected to the same USB switching hub 119.

Applicant submits that the elements of Bohm have been improperly characterized in the rejection of claim 1. A person of ordinary skill in the art would recognize that a USB hub is used

to connect a USB Host system to one or more USB peripheral devices, as is shown in Fig. 3, and that the hub controller 203 and downstream switching logic 201 are typical components of such a USB hub. This person of ordinary skill in the art would not recognize that a USB bridge that is used to connect one USB host system to another USB host system is equivalent to a hub controller that is a component of a USB hub configured to interconnect a USB Host system to one or more USB peripheral devices. The person of ordinary skill in the art would also not recognize that a USB routing switch is equivalent to the downstream switching logic this is a component of a USB hub as described by Bohm. Therefore, Applicant submits that a person of ordinary skill in the art would not conclude that Bohm shows a USB Bridge interconnected to the USB Hub or a USB routing switch interconnected to the USB Bridge and the USB Hub as recited in Applicant's pending claim 1.

Consequently, Applicant submits that Bohm does not show the features of a USB Bridge that is interconnected to a USB Hub, a USB routing switch interconnected to the USB Bridge, and the USB routing switch being configured to connect the USB Port to the USB Hub through the USB Bridge when a consumer device connected to the USB Port is acting as a USB Host as recited in claim 1.

In Item 3 of the instant office action, Examiner asserts that paragraph 0041 of Bohm discloses the additionally claimed features of pending claim 2. Paragraph 0041 of Bohm states that the USB host 100 and the dual role peripheral device 207 acting as a USB host may communicate separately with different downstream devices 125a and 125b simultaneously through a first and second hub of the USB switching hub 119.

However, Bohm does not disclose that the USB host 100 may be connected directly to the dual role peripheral device 207 while acting as a USB host (first consumer device connected to the first USB Port acting as a USB Host) while simultaneously being connected to the downstream device 125a or 125b (second consumer device connected to the second USB Port acting as a USB Device).

Thus, Bohm does not show the features of the USB routing switch being configured to connect a first USB Port of a plurality of USB Ports to the USB Hub through the USB Bridge when a first consumer device connected to the first USB Port is acting as a USB Host, and wherein the USB routing switch is configured to simultaneously connect a second USB Port of the plurality of USB Ports directly to the USB Hub when a second consumer device connected to the second USB Port is acting as a USB Device, thereby rendering the first and second consumer devices compatible to function simultaneously with the embedded USB Host system as recited in pending claim 2.

Therefore, Applicant submits that Bohm does not show each and every element in Applicant's claim 1 or of claims 2-5, 7-9, and 18-23 dependent thereon, and so claims 1-5, 7-9, and 18-23 are not anticipated by Bohm and a rejection of these claims under 35 USC § 102(a)(1) is not proper. Applicant respectfully requests that the rejection of claims 1-5, 7-9, and 18-23 under 35 USC § 102(a)(1) be reconsidered and withdrawn and that the claims be allowed.

Claim Rejections based on 35 USC § 103(a)

Claims 10 and 17 stand rejected under 35 USC § 103(a) as being unpatentable over Bohm in view of Wright [U.S. Patent No. 7,502,878].

Though dependent claims 10 and 17 each contains their own allowable subject matter, these claims are allowable at least due to their dependence on claim 1 which is believed to be in condition for allowance.

CONCLUSION

It is believed that only allowable claims remain in the application. Applicant respectfully requests that a timely Notice of Allowance be issued in this case.

If it would further prosecution of the application, the Examiner is urged to contact the undersigned at the phone number provided.

The Commissioner is hereby authorized to charge any fees associated with this communication and/or credit any overpayments to Delphi Technologies, Inc., Deposit Account No. 50-0831.

Respectfully submitted,

/Robert J. Myers/

Information:					

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

Advisory Action Before the Filing of an Appeal Brief	Application No. 14/487,947	Applicant(s) VOTO ET AL.	
	Examiner ERNEST UNELUS	Art Unit 2181	AIA (First Inventor to File) Status Yes

--The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

THE REPLY FILED 11 April 2016 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.

NO NOTICE OF APPEAL FILED

1. ☒ The reply was filed after a final rejection. No Notice of Appeal has been filed. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114 if this is a utility or plant application. Note that RCEs are not permitted in design applications. The reply must be filed within one of the following time periods:

a) ☐ The period for reply expires _____ months from the mailing date of the final rejection.

b) ☒ The period for reply expires on: (1) the mailing date of this Advisory Action; or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.

c) ☐ A prior Advisory Action was mailed more than 3 months after the mailing date of the final rejection in response to a first after-final reply filed within 2 months of the mailing date of the final rejection. The current period for reply expires _____ months from the mailing date of the prior *Advisory Action* or SIX MONTHS from the mailing date of the final rejection, whichever is earlier.

Examiner Note: If box 1 is checked, check either box (a), (b) or (c). ONLY CHECK BOX (b) WHEN THIS ADVISORY ACTION IS THE FIRST RESPONSE TO APPLICANT'S FIRST AFTER-FINAL REPLY WHICH WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. ONLY CHECK BOX (c) IN THE LIMITED SITUATION SET FORTH UNDER BOX (c). See MPEP 706.07(f).

Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) or (c) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

NOTICE OF APPEAL

2. ☐ The Notice of Appeal was filed on _____. A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a).

AMENDMENTS

3. ☐ The proposed amendments filed after a final rejection, but prior to the date of filing a brief, will not be entered because

a) ☐ They raise new issues that would require further consideration and/or search (see NOTE below);

b) ☐ They raise the issue of new matter (see NOTE below);

c) ☐ They are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or

d) ☐ They present additional claims without canceling a corresponding number of finally rejected claims.

NOTE: _____. (See 37 CFR 1.116 and 41.33(a)).

4. ☐ The amendments are not in compliance with 37 CFR 1.121. See attached Notice of Non-Compliant Amendment (PTOL-324).

5. ☐ Applicant's reply has overcome the following rejection(s): _____.

6. ☐ Newly proposed or amended claim(s) _____ would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).

7. ☒ For purposes of appeal, the proposed amendment(s): (a) ☒ will not be entered, or (b) ☐ will be entered, and an explanation of how the new or amended claims would be rejected is provided below or appended.

AFFIDAVIT OR OTHER EVIDENCE

8. ☐ A declaration(s)/affidavit(s) under **37 CFR 1.130(b)** was/were filed on _____.

9. ☐ The affidavit or other evidence filed after final action, but before or on the date of filing a Notice of Appeal will not be entered because applicant failed to provide a showing of good and sufficient reasons why the affidavit or other evidence is necessary and was not earlier presented. See 37 CFR 1.116(e).

10. ☐ The affidavit or other evidence filed after the date of filing the Notice of Appeal, but prior to the date of filing a brief, will not be entered because the affidavit or other evidence failed to overcome all rejections under appeal and/or appellant fails to provide a showing of good and sufficient reasons why it is necessary and was not earlier presented. See 37 CFR 41.33(d)(1).

11. ☐ The affidavit or other evidence is entered. An explanation of the status of the claims after entry is below or attached.

REQUEST FOR RECONSIDERATION/OTHER

12. ☒ The request for reconsideration has been considered but does NOT place the application in condition for allowance because:
See Continuation Sheet.

13. ☐ Note the attached Information *Disclosure Statement*(s). (PTO/SB/08) Paper No(s). _____

14. ☐ Other: _____.

STATUS OF CLAIMS

15. The status of the claim(s) is (or will be) as follows:

Claim(s) allowed: 0.

Claim(s) objected to: 0.

Claim(s) rejected: 1-5, 7-11 and 17-23.

Claim(s) withdrawn from consideration: _____.

	/ERNEST UNELUS/ Primary Examiner, Art Unit 2181
--	--

Continuation of 12. does NOT place the application in condition for allowance because: Page 5 of applicant's remarks discloses "Applicant respectfully points out the hub controller 203 and the downstream switching logic 201 are components of the USB switching hub 119, rather than a separate elements. Applicant submits that it not logical that the hub controller 203 and downstream switching logic 201 can be components of the USB switching hub 119 that are contained within USB switching hub 119 and at the very same time be interconnected to the same USB switching hub 119."

This argument is not persuasive: note, the USB switching hub 119 of Bohm discloses the function of claimed hub; similarly, hub controller 203a of Bohm teaches the function of claimed bridge and switching logic 201 of Bohm teaches the claimed function of a switch. With respect to item 3, note, the claimed language only called for simultaneously connection.

Name	Craig A. Baldwin	Telephone	248-813-1214
Title and Company	Assistant Secretary, Delphi Technologies, Inc.		

NOTE: Signatures of all the inventors or assignees of record of the entire interest or their representative(s) are required. Submit multiple forms if more than one signature is required, see below*.

☒ *Total of 2 forms are submitted.

This collection of information is required by 37 CFR 1.31, 1.32 and 1.33. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 3 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

STATEMENT UNDER 37 CFR 3.73(c)Applicant/Patent Owner: Robert M. Voto, et al.Application No./Patent No.: 14/487,947Filed/Issue Date: 09-16-2014Titled: FLEXIBLE MOBILE DEVICE CONNECTIVITY TO AUTOMOTIVE SYSTEMS WITH USB HUBS

Delphi Technologies, Inc. _____, a corporation

(Name of Assignee)

(Type of Assignee, e.g., corporation, partnership, university, government agency, etc.)

states that, for the patent application/patent identified above, it is (choose one of options 1, 2, 3 or 4 below):1. ☒ The assignee of the entire right, title, and interest.2. ☐ An assignee of less than the entire right, title, and interest (check applicable box):☐ The extent (by percentage) of its ownership interest is ____%. Additional Statement(s) by the owners holding the balance of the interest must be submitted to account for 100% of the ownership interest.☐ There are unspecified percentages of ownership. The other parties, including inventors, who together own the entire right, title and interest are:Additional Statement(s) by the owner(s) holding the balance of the interest must be submitted to account for the entire right, title, and interest.3. ☐ The assignee of an undivided interest in the entirety (a complete assignment from one of the joint inventors was made). The other parties, including inventors, who together own the entire right, title, and interest are:Additional Statement(s) by the owner(s) holding the balance of the interest must be submitted to account for the entire right, title, and interest.4. ☐ The recipient, via a court proceeding or the like (e.g., bankruptcy, probate), of an undivided interest in the entirety (a complete transfer of ownership interest was made). The certified document(s) showing the transfer is attached.The interest identified in option 1, 2 or 3 above (not option 4) is evidenced by either (choose one of options A or B below):A. ☐ An assignment from the inventor(s) of the patent application/patent identified above. The assignment was recorded in the United States Patent and Trademark Office at Reel _____, Frame _____, or for which a copy thereof is attached.B. ☒ A chain of title from the inventor(s), of the patent application/patent identified above, to the current assignee as follows:1. From: Robert M. Voto, et al. To: Unwired Technology LLCThe document was recorded in the United States Patent and Trademark Office at
Reel 033785, Frame 0399, or for which a copy thereof is attached.2. From: Unwired Technology LLC To: Delphi Data connectivity US LLCThe document was recorded in the United States Patent and Trademark Office at
Reel 038014, Frame 0604, or for which a copy thereof is attached.

[Page 1 of 2]

This collection of information is required by 37 CFR 3.73(b). The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

**REQUEST FOR CONTINUED EXAMINATION(RCE)TRANSMITTAL
(Submitted Only via EFS-Web)**

Application Number	14487947	Filing Date	2014-09-16	Docket Number (if applicable)	DP-322037	Art Unit	2181
First Named Inventor	Robert Voto, et al.			Examiner Name	Ernest Unelus		

This is a Request for Continued Examination (RCE) under 37 CFR 1.114 of the above-identified application.
Request for Continued Examination (RCE) practice under 37 CFR 1.114 does not apply to any utility or plant application filed prior to June 8, 1995, or to any design application. The Instruction Sheet for this form is located at WWW.USPTO.GOV

SUBMISSION REQUIRED UNDER 37 CFR 1.114

Note: If the RCE is proper, any previously filed unentered amendments and amendments enclosed with the RCE will be entered in the order in which they were filed unless applicant instructs otherwise. If applicant does not wish to have any previously filed unentered amendment(s) entered, applicant must request non-entry of such amendment(s).

☐ Previously submitted. If a final Office action is outstanding, any amendments filed after the final Office action may be considered as a submission even if this box is not checked.

☐ Consider the arguments in the Appeal Brief or Reply Brief previously filed on _____

☐ Other _____

This collection of information is required by 37 CFR 1.114. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

AMENDMENT

Dear Examiner Unelus:

In conjunction with a **Request for Continued Examination** under 37 C.F.R § 1.114, filed concurrently with this Amendment, please amend the above identified application and consider the remarks and arguments set forth herein. The amendments, remarks, and arguments contained herein are responsive to a Final Office Action sent February 9, 2016 and an Advisory Action sent May 16, 2016.

II.	Remarks and Arguments	Page 5
III.	Conclusion	Page 9

PETITION FOR EXTENSION OF TIME

Applicant hereby petitions the Director of the United States Patent and Trademark Office under 37 C.F.R § 1.136(a) to extend the time for reply to the Office Action dated February 9, 2016 for one (1) month from May 9, 2016 to June 9, 2016. Please charge the fee for this extension according to 37 C.F.R § 1.17(a)(1) to Delphi Technologies, Inc. Deposit Account No. 50-0831, in accordance with the last paragraph of this Amendment.

LISTING OF THE CLAIMS

A listing of the pending claims is presented here for the Examiner's convenience.

1. (Previously presented) A system disposed within a vehicle, comprising:
 - an embedded Universal Serial Bus (USB) Host system;
 - a USB Hub interconnected to the embedded USB Host system;
 - a USB Bridge interconnected to the USB Hub; and
 - a USB routing switch interconnected to the USB Bridge, the USB Hub, and a USB Port,wherein the USB routing switch is configured to connect the USB Port to the USB Hub through the USB Bridge when a consumer device connected to the USB Port is acting as a USB Host, and wherein the USB routing switch is configured to connect the USB Port directly to the USB Hub when the consumer device connected to the USB Port is acting as a USB Device, thereby rendering the consumer device compatible with the embedded USB Host system.
2. (Previously presented) A system as recited in claim 1, wherein the USB routing switch is configured to connect a first USB Port of a plurality of USB Ports to the USB Hub through the USB Bridge when a first consumer device connected to the first USB Port is acting as a USB Host, and wherein the USB routing switch is configured to simultaneously connect a second USB Port of the plurality of USB Ports directly to the USB Hub when a second consumer device connected to the second USB Port is acting as a USB Device, thereby rendering the first and second consumer devices compatible to function simultaneously with the embedded USB Host system.
3. (Previously presented) A system as recited in claim 1, wherein the system is configured to recognize whether the consumer device connected to the USB Port is configured to act as a USB Host or as a USB Device and control the USB routing switch accordingly.
4. (Previously presented) A system as recited in claim 7, wherein the system is configured to dynamically switch operation of USB Ports connected to the USB Hub Module between USB Device mode and USB Host mode.

5. (Previously presented) A system as recited in claim 1, wherein the system further comprises an infotainment system containing the embedded USB Host system.
6. (Cancelled)
7. (Previously presented) A system as recited in claim 1, wherein the USB Hub, the USB Bridge, and the USB routing switch system are disposed within a USB Hub Module.
8. (Previously presented) A system as recited in claim 7, wherein the USB Hub Module is connected to the embedded USB Host system and a plurality of USB Ports connected to a plurality of consumer devices.
9. (Previously presented) A system as recited in claim 8, wherein the USB routing switch is configured to connect each consumer device of the plurality of consumer devices to either the USB Bridge or the USB Hub based on whether each consumer device attached to each USB Port in the plurality of USB Ports is configured to act as a USB Host or a USB Device.
10. (Previously presented) A system as recited in claim 1, wherein the USB routing switch comprises a plurality of USB analog multiplexing switches.
11. (Previously presented) A system as recited in claim 1, wherein the USB Bridge is configured to control the USB routing switch.
12. – 16. (Cancelled)
17. (Previously presented) A system as recited in claim 23, wherein the USB Hub, the USB Bridge, and the USB routing switch system are integrated in an Integrated Circuit (IC).
18. (Previously presented) A system as recited in claim 1, wherein the USB Bridge comprises a bridge controller as well as endpoint buffers.
19. (Previously presented) A system as recited in claim 18, wherein the endpoint buffers are configured to support a USB data connection pipe between an infotainment system and the consumer device.

20. (Previously presented) A system as recited in claim 1, wherein the system further comprises an infotainment system with a single USB host which is electrically connected to the USB Hub via a single USB data connection.

21. (Previously presented) A system as recited in claim 1, wherein the system further comprises an infotainment system, wherein the system is configured to support simultaneous active USB data connections between the infotainment system and multiple consumer devices, at least one of which is a USB Host while others are USB Devices.

22. (Previously presented) A system as recited in claim 1, wherein the system further comprises an infotainment system, wherein the system is configured to support simultaneous active USB data connections between the infotainment system and some combination of embedded devices and consumer devices that are USB Devices along with at least one that is a USB Host.

23. (Previously presented) A system as recited in claim 1, wherein the USB routing switch comprises digital routing logic.

REMARKS AND ARGUMENTS

Claim Rejections based on 35 USC § 102(a)(1)

Claims 1-5, 7-9, and 18-23 stand rejected under 35 USC § 102(a)(1) as being anticipated by Bohm, et al. [U.S. Patent Publication No. 2006/0227759], hereinafter referred to as Bohm.

Pending claim 1 is directed to a system disposed within a vehicle that includes an embedded Universal Serial Bus (USB) Host system, a USB Hub interconnected to the embedded USB Host system, a USB Bridge interconnected to the USB Hub, and a USB routing switch interconnected to the USB Bridge, the USB Hub, and a USB Port. The USB routing switch is configured to connect the USB Port to the USB Hub through the USB Bridge when a consumer device connected to the USB Port is acting as a USB Host. The USB routing switch is configured to connect the USB Port directly to the USB Hub when the consumer device connected to the USB Port is acting as a USB Device, thereby rendering the consumer device compatible with the embedded USB Host system.

In Item 2, of the instant office action, Examiner asserts that Fig. 3 and paragraphs 0037 and 0040 of Bohm disclose all of the features of pending claim 1. Particularly, Examiner asserts that the USB Hub interconnected to the USB Host system is shown by the USB switching hub 119 of Bohm and the USB Bridge interconnected to the USB Hub is shown by hub controller 203 of Bohm. Examiner also asserts that the USB routing switch is shown by the downstream switching logic 201 of Bohm.

Applicant respectfully points out the hub controller 203 and the downstream switching logic 201 are components of the USB switching hub 119, rather than a separate elements.

The BPAI has interpreted Federal Circuit case law to say it's improper for the Examiner to rely on the same structure to disclose two separate claimed elements. In several anticipation rejections where this issue arose, the Board relied upon the following citations:

Lantech, Inc. v. Keip Machine Co., 32 F.3d 542 (Fed. Cir. 1994) (in infringement context, a single conveyor held to not meet claim element requiring at least two conveyors); and

In re Robertson, 169 F.3d 743 (Fed. Cir. 1999) (claim requiring three separate means not anticipated by structure containing two means where one of the two means was argued to meet two of the three claimed means).

Following are some of the BPAI decisions where the Board has applied the doctrine from *In re Robertson* and *Lantech* to anticipation rejections.

Ex parte Weideman: The claims were directed to a vehicle seat. The Board agreed that the reference disclosed the claimed seat back and seat bottom, but found the Examiner's rejection was "flawed."

The Examiner finds that the horizontally extending portions of frame members 3, 4, also identified more specifically by reference numeral 7, not only constitute part of the seat bottom, but also constitute the structure in Lohr that reads on the claimed "center support extending forwardly from [the] central pillar". Consistent with the principle that all limitations in a claim must be considered to be meaningful, ***it is improper to rely on the same structure in the Lohr reference as being responsive to two different elements*** (seat bottom and center support) in claim 1. (*Weideman*, internal citations omitted.)

Ex parte Koutsky: The claims were directed to a vehicle seat suspension apparatus. The Board agreed that the flange and rollers in the reference correspond to the claimed "means for allowing reciprocating movement," but found the Examiner's reading of the reference with respect to other claimed elements was in error:

However, the Examiner uses the same [flange] 56 and guide rail 34 as the elongated guide and guide engaging member. Thus, the Examiner has used the same element or structure in the Koutsky reference to satisfy two different limitations from the claimed subject matter. However, ***when a claim requires two separate elements using one element construed as performing two separate functions will not suffice to meet the terms of the claim***. Accordingly, it is our finding that Koutsky does not anticipate the claimed subject matter on appeal. (*Koutsky*, internal citations omitted.)

Ex parte Konstant: The claims were directed to a storage rack, which included a horizontal deck beam interconnected between two columns. The beam included an upper flange supporting a locking cross bar, and an outer face in which an aperture was located. The Examiner applied this reference:

The Examiner found the reference's support surface (18) satisfied the "upper flange" (with locking cross bar 30), and that the same support surface 18 satisfied the claimed outer face containing an aperture (20). The Board reversed the rejection:

The Examiner erroneously read both the upper flange/upper support width and the outer face on the same structure in Mulholland. Consistent with the principle that all limitations in a claim must be considered to be meaningful, it is improper to rely on the same structure in the Mulholland reference as being responsive to two different elements (the upper flange/upper support width and the outer face) in claims 1, 10, and 18. (*Konstant*, internal citations omitted.)

The rejection of claim 1 relies on the assertion that the USB switching hub 119 shows the claimed USB Hub interconnected to the USB Host system and that the hub controller 203 and the downstream switching logic 201, which are components of this USB switching hub 119, show the USB Bridge interconnected to the USB Hub and the USB routing switch respectively. Consequently, one element, the USB switching hub 119, is relied upon to show three different claimed elements: the USB Hub interconnected to the USB Host system, the USB Bridge interconnected to the USB Hub, and the USB routing switch. Therefore the rejection of claim 1

uses the same reasoning as was used in the cases cited in *Weideman*, *Koutsky*, and *Konstant* where this reasoning was determined to be improper.

In addition, the hub controller 203 and the downstream switching logic 201 are components of the USB switching hub 119, rather than a separate elements. Applicant submits that it not logical that the hub controller 203 and downstream switching logic 201 are components of the USB switching hub 119 and contained within USB switching hub 119 while at the very same time being separate elements that are interconnected to the same USB switching hub 119.

Therefore, Applicant respectfully submits that Bohm does not show a USB Bridge interconnected to the USB Hub or a USB routing switch interconnected to USB Bridge. Since Bohm does not show each and every element in Applicant's claim 1, it is not anticipated by Bohm and a rejection of claim 1 under 35 USC § 102(a)(1) is improper.

Though dependent claims 2-5, 7-9, and 18-23 each contains their own allowable subject matter, these claims are allowable at least due to their dependence on claim 1 which is believed to be in condition for allowance.

For all of the reasons listed above, Applicant submits that the rejection of Applicant's claim 1 and claims 2-5, 7-9, and 18-23 dependent thereon is improper. Applicant respectfully requests that the rejection of claims 1-5, 7-9, and 18-23 under 35 USC § 102(a)(1) be reconsidered and withdrawn and that the claims be allowed.

Claim Rejections based on 35 USC § 103(a)

Claims 10 and 17 stand rejected under 35 USC § 103(a) as being unpatentable over Bohm in view of Wright [U.S. Patent No. 7,502,878].

Though dependent claims 10 and 17 each contains their own allowable subject matter, these claims are allowable at least due to their dependence on claim 1 which is believed to be in condition for allowance.

CONCLUSION

It is believed that only allowable claims remain in the application. Applicant respectfully requests that a timely Notice of Allowance be issued in this case.

If it would further prosecution of the application, the Examiner is urged to contact the undersigned at the phone number provided.

The Commissioner is hereby authorized to charge any fees associated with this communication and/or credit any overpayments to Delphi Technologies, Inc., Deposit Account No. 50-0831.

Respectfully submitted,

/Robert J. Myers/

DENIAL OF REQUEST FOR POWER OF ATTORNEY

The request for Power of Attorney filed 06/02/16 is acknowledged. However, the request cannot be granted at this time for the reason stated below.

- ☐ The Power of Attorney you provided did not comply with the new Power of Attorney rules that became effective on June 25, 2004. See 37 CFR 1.32.
- ☐ The revocation is not signed by the applicant, the assignee of the entire interest, or one particular principal attorney having the authority to revoke.
- ☐ The Power of Attorney is from an assignee and the Certificate required by 37 CFR 3.73 has not been received.
- ☐ The person signing for the assignee has omitted their empowerment to sign on behalf of the assignee.
- ☐ The inventor(s) is without authority to appoint attorneys since the assignee has intervened as provided by 37 CFR 3.71.
- ☐ The signature(s) of _____, a co-inventor in this application, has been omitted. The Power of Attorney will be entered upon receipt of confirmation signed by said co-inventor(s).
- ☐ The person(s) appointed in the Power of Attorney is not registered to practice before the U.S. Patent and Trademark Office.
- ☐ Only one Customer Number can be designated for the Power of Attorney in an application. The Customer Number that was captured is the first Customer Number provided on the Power of Attorney document.

UNITED STATES PATENT AND TRADEMARK OFFICE

UNITED STATES DEPARTMENT OF COMMERCE
United States Patent and Trademark Office
Address: COMMISSIONER FOR PATENTS
P.O. Box 1450
Alexandria, Virginia 22313-1450
www.uspto.gov

- ☐ A request under 37 CFR 1.48 to add an inventor was granted in this application, however, no power of attorney consistent with the power of attorney granted by the originally named inventive entity has been received. Thus, the addition of the inventor has resulted in the loss of power of attorney in the application. See 37 CFR 1.32(e).
- ☒ The power of attorney has not been accepted because the party who is giving power of attorney has not been identified. Power of attorney may only be signed by the applicant for patent (37 CFR 1.42) or the patent owner. A patent owner who was not the applicant must appoint any power of attorney in compliance with 37 CFR 3.71 and 3.73. See 37 CFR 1.32(b)(4).
- ☐ The power of attorney from the inventors has not been accepted because it is a copy from a prior national application for which benefit is claimed and the continuing application names an inventor who was not named as an inventor in the prior application.
- ☐ The power of attorney from the inventors has not been accepted because the power of attorney must be signed by the applicant for patent. See 37 CFR 1.32(b)(4).
- ☒ Any request to correct or update the name of the applicant must include an application data sheet (ADS) in compliance with 37 CFR 1.76 specifying the correct or updated name of the applicant in the applicant information section. Any request to change the applicant after an original applicant has been specified under 37 CFR 1.46(b) must include a new ADS in compliance with 37 CFR 1.76 specifying the applicant in the applicant information section and comply with 37 CFR 3.71 and 3.73. See 37 CFR 1.46(c).

Any inquiries regarding this notice should be directed to the Application Assistance Unit at 571-272-4200.

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

STATEMENT UNDER 37 CFR 3.73(c)Applicant/Patent Owner: Robert M. Voto, et al.Application No./Patent No.: 14/487,947Filed/Issue Date: 09-16-2014Titled: FLEXIBLE MOBILE DEVICE CONNECTIVITY TO AUTOMOTIVE SYSTEMS WITH USB HUBS

Delphi Technologies, Inc. _____, a corporation

(Name of Assignee)

(Type of Assignee, e.g., corporation, partnership, university, government agency, etc.)

states that, for the patent application/patent identified above, it is (choose one of options 1, 2, 3 or 4 below):

1. ☒ The assignee of the entire right, title, and interest.
2. ☐ An assignee of less than the entire right, title, and interest (check applicable box):
- ☐ The extent (by percentage) of its ownership interest is ____%. Additional Statement(s) by the owners holding the balance of the interest must be submitted to account for 100% of the ownership interest.
- ☐ There are unspecified percentages of ownership. The other parties, including inventors, who together own the entire right, title and interest are:

Additional Statement(s) by the owner(s) holding the balance of the interest must be submitted to account for the entire right, title, and interest.

3. ☐ The assignee of an undivided interest in the entirety (a complete assignment from one of the joint inventors was made). The other parties, including inventors, who together own the entire right, title, and interest are:

Additional Statement(s) by the owner(s) holding the balance of the interest must be submitted to account for the entire right, title, and interest.

4. ☐ The recipient, via a court proceeding or the like (e.g., bankruptcy, probate), of an undivided interest in the entirety (a complete transfer of ownership interest was made). The certified document(s) showing the transfer is attached.

The interest identified in option 1, 2 or 3 above (not option 4) is evidenced by either (choose one of options A or B below):

- A. ☐ An assignment from the inventor(s) of the patent application/patent identified above. The assignment was recorded in the United States Patent and Trademark Office at Reel _____, Frame _____, or for which a copy thereof is attached.
- B. ☒ A chain of title from the inventor(s), of the patent application/patent identified above, to the current assignee as follows:

1. From: Robert M. Voto, et al. To: Unwired Technology LLCThe document was recorded in the United States Patent and Trademark Office at
Reel 033785, Frame 0399, or for which a copy thereof is attached.2. From: Unwired Technology LLC To: Delphi Data connectivity US LLCThe document was recorded in the United States Patent and Trademark Office at
Reel 038014, Frame 0604, or for which a copy thereof is attached.

STATEMENT UNDER 37 CFR 3.73(c)3. From: Delphi Data Connectivity US LLC To: Delphi Technologies, Inc.The document was recorded in the United States Patent and Trademark Office at
Reel 038035, Frame 0127, or for which a copy thereof is attached.

4. From: _____ To: _____

The document was recorded in the United States Patent and Trademark Office at
Reel _____, Frame _____, or for which a copy thereof is attached.

5. From: _____ To: _____

The document was recorded in the United States Patent and Trademark Office at
Reel _____, Frame _____, or for which a copy thereof is attached.

6. From: _____ To: _____

The document was recorded in the United States Patent and Trademark Office at
Reel _____, Frame _____, or for which a copy thereof is attached.☐ Additional documents in the chain of title are listed on a supplemental sheet(s).☐ As required by 37 CFR 3.73(c)(1)(i), the documentary evidence of the chain of title from the original owner to the assignee was, or concurrently is being, submitted for recordation pursuant to 37 CFR 3.11.

[NOTE: A separate copy (i.e., a true copy of the original assignment document(s)) must be submitted to Assignment Division in accordance with 37 CFR Part 3, to record the assignment in the records of the USPTO. See MPEP 302.08]

The undersigned (whose title is supplied below) is authorized to act on behalf of the assignee.

SignatureCraig A. Baldwin

Filing By Reference:

Only complete this section when filing an application by reference under 35 U.S.C. 111(c) and 37 CFR 1.57(a). Do not complete this section if application papers including a specification and any drawings are being filed. Any domestic benefit or foreign priority information must be provided in the appropriate section(s) below (i.e., "Domestic Benefit/National Stage Information" and "Foreign Priority Information").

For the purposes of a filing date under 37 CFR 1.53(b), the description and any drawings of the present application are replaced by this reference to the previously filed application, subject to conditions and requirements of 37 CFR 1.57(a).

Application number of the previously filed application	Filing date (YYYY-MM-DD)	Intellectual Property Authority or Country

Publication Information:

☐ Request Early Publication (Fee required at time of Request 37 CFR 1.219)
☐ Request Not to Publish. I hereby request that the attached application not be published under 35 U.S.C. 122(b) and certify that the invention disclosed in the attached application has not and will not be the subject of an application filed in another country, or under a multilateral international agreement, that requires publication at eighteen months after filing.

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it contains a valid OMB control number.

Representative Information:

Representative information should be provided for all practitioners having a power of attorney in the application. Providing this information in the Application Data Sheet does not constitute a power of attorney in the application (see 37 CFR 1.32). Either enter Customer Number or complete the Representative Name section below. If both sections are completed the customer Number will be used for the Representative Information during processing.

Please Select One:	☒ Customer Number	☐ US Patent Practitioner	☐ Limited Recognition (37 CFR 11.9)
Customer Number	22851 00279		

Domestic Benefit/National Stage Information:

This section allows for the applicant to either claim benefit under 35 U.S.C. 119(e), 120, 121, 365(c), or 386(c) or indicate National Stage entry from a PCT application. Providing benefit claim information in the Application Data Sheet constitutes the specific reference required by 35 U.S.C. 119(e) or 120, and 37 CFR 1.78. When referring to the current application, please leave the "Application Number" field blank.

Prior Application Status		Remove	
Application Number	Continuity Type	Prior Application Number	Filing or 371(c) Date (YYYY-MM-DD)
	Claims benefit of provisional	61882915	2013-09-26

Additional Domestic Benefit/National Stage Data may be generated within this form by selecting the Add button.

Foreign Priority Information:

This section allows for the applicant to claim priority to a foreign application. Providing this information in the application data sheet constitutes the claim for priority as required by 35 U.S.C. 119(b) and 37 CFR 1.55. When priority is claimed to a foreign application that is eligible for retrieval under the priority document exchange program (PDX)¹ the information will be used by the Office to automatically attempt retrieval pursuant to 37 CFR 1.55(i)(1) and (2). Under the PDX program, applicant bears the ultimate responsibility for ensuring that a copy of the foreign application is received by the Office from the participating foreign intellectual property office, or a certified copy of the foreign priority application is filed, within the time period specified in 37 CFR 1.55(g)(1).

Application Number	Country ¹	Filing Date (YYYY-MM-DD)	Remove
			Access Code ¹ (if applicable)

Additional Foreign Priority Data may be generated within this form by selecting the Add button.

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it contains a valid OMB control number.

		Application Number	
Title of Invention	FLEXIBLE MOBILE DEVICE CONNECTIVITY TO AUTOMOTIVE SYSTEMS WITH USB HUBS		

Authorization or Opt-Out of Authorization to Permit Access:

When this Application Data Sheet is properly signed and filed with the application, applicant has provided written authority to permit a participating foreign intellectual property (IP) office access to the instant application-as-filed (see paragraph A in subsection 1 below) and the European Patent Office (EPO) access to any search results from the instant application (see paragraph B in subsection 1 below).

Should applicant choose not to provide an authorization identified in subsection 1 below, applicant **must opt-out** of the authorization by checking the corresponding box A or B or both in subsection 2 below.

NOTE: This section of the Application Data Sheet is **ONLY** reviewed and processed with the **INITIAL** filing of an application. After the initial filing of an application, an Application Data Sheet cannot be used to provide or rescind authorization for access by a foreign IP office(s). Instead, Form PTO/SB/39 or PTO/SB/69 must be used as appropriate.

1. Authorization to Permit Access by a Foreign Intellectual Property Office(s)

A. Priority Document Exchange (PDX) - Unless box A in subsection 2 (opt-out of authorization) is checked, the undersigned hereby **grants the USPTO authority** to provide the European Patent Office (EPO), the Japan Patent Office (JPO), the Korean Intellectual Property Office (KIPO), the State Intellectual Property Office of the People's Republic of China (SIPO), the World Intellectual Property Organization (WIPO), and any other foreign intellectual property office participating with the USPTO in a bilateral or multilateral priority document exchange agreement in which a foreign application claiming priority to the instant patent application is filed, access to: (1) the instant patent application-as-filed and its related bibliographic data, (2) any foreign or domestic application to which priority or benefit is claimed by the instant application and its related bibliographic data, and (3) the date of filing of this Authorization. See 37 CFR 1.14(h)(1).

B. Search Results from U.S. Application to EPO - Unless box B in subsection 2 (opt-out of authorization) is checked, the undersigned hereby **grants the USPTO authority** to provide the EPO access to the bibliographic data and search results from the instant patent application when a European patent application claiming priority to the instant patent application is filed. See 37 CFR 1.14(h)(2).

The applicant is reminded that the EPO's Rule 141(1) EPC (European Patent Convention) requires applicants to submit a copy of search results from the instant application without delay in a European patent application that claims priority to the instant application.

2. Opt-Out of Authorizations to Permit Access by a Foreign Intellectual Property Office(s)

☐ A. Applicant **DOES NOT** authorize the USPTO to permit a participating foreign IP office access to the instant application-as-filed. If this box is checked, the USPTO will not be providing a participating foreign IP office with any documents and information identified in subsection 1A above.

☐ B. Applicant **DOES NOT** authorize the USPTO to transmit to the EPO any search results from the instant patent application. If this box is checked, the USPTO will not be providing the EPO with search results from the instant application.

NOTE: Once the application has published or is otherwise publicly available, the USPTO may provide access to the application in accordance with 37 CFR 1.14.

Applicant Information:

Providing assignment information in this section does not substitute for compliance with any requirement of part 3 of Title 37 of CFR to have an assignment recorded by the Office.

Applicant 1

If the applicant is the inventor (or the remaining joint inventor or inventors under 37 CFR 1.45), this section should not be completed. The information to be provided in this section is the name and address of the legal representative who is the applicant under 37 CFR 1.43; or the name and address of the assignee, person to whom the inventor is under an obligation to assign the invention, or person who otherwise shows sufficient proprietary interest in the matter who is the applicant under 37 CFR 1.46. If the applicant is an applicant under 37 CFR 1.46 (assignee, person to whom the inventor is obligated to assign, or person who otherwise shows sufficient proprietary interest) together with one or more joint inventors, then the joint inventor or inventors who are also the applicant should be identified in this section.

☒ Assignee ☐ Legal Representative under 35 U.S.C. 117 ☐ Joint Inventor

☒ Person to whom the inventor is obligated to assign. ☐ Person who shows sufficient proprietary interest

If applicant is the legal representative, indicate the authority to file the patent application, the inventor is:

Name of the Deceased or Legally Incapacitated Inventor:

NOTE: This Application Data Sheet must be signed in accordance with 37 CFR 1.33(b). However, if this Application Data Sheet is submitted with the INITIAL filing of the application and either box A or B is not checked in subsection 2 of the "Authorization or Opt-Out of Authorization to Permit Access" section, then this form must also be signed in accordance with 37 CFR 1.14(c).

This Application Data Sheet must be signed by a patent practitioner if one or more of the applicants is a juristic entity (e.g., corporation or association). If the applicant is two or more joint inventors, this form must be signed by a patent practitioner, all joint inventors who are the applicant, or one or more joint inventor-applicants who have been given power of attorney (e.g., see USPTO Form PTO/AIA/81) on behalf of all joint inventor-applicants.

See 37 CFR 1.4(d) for the manner of making signatures and certifications.

This collection of information is required by 37 CFR 1.76. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 23 minutes to complete, including gathering, preparing, and submitting the completed application data sheet form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

RESPONSE TO DENIAL OF REQUEST FOR POWER OF ATTORNEY

Commissioner for Patents
P. O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

This is sent in response to the “Denial of Request For Power of Attorney” for the subject patent application mailed June 10, 2016.

Enclosed are the following items for filing with the subject patent:

1. Revocation of Power of Attorney with a New Power of Attorney (PTO Form PTO/SB/81); and
2. Statement under 37 CFR §3.73(c).
3. Amended Application Data Sheet.

The Commissioner is hereby authorized to charge any fees associated with this communication and/or credit any overpayments to Delphi Technologies, Inc., Deposit Account No. 50-0831.

Respectfully submitted,

/Robert J. Myers/

TITLE OF INVENTION: FLEXIBLE MOBILE DEVICE CONNECTIVITY TO AUTOMOTIVE SYSTEMS WITH USB HUBS

APPLN. TYPE	ENTITY STATUS	ISSUE FEE DUE	PUBLICATION FEE DUE	PREV. PAID ISSUE FEE	TOTAL FEE(S) DUE	DATE DUE
nonprovisional	SMALL	\$480	\$0	\$0	\$480	09/20/2016

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the ENTITY STATUS shown above. If the ENTITY STATUS is shown as SMALL or MICRO, verify whether entitlement to that entity status still applies.

If the ENTITY STATUS is the same as shown above, pay the TOTAL FEE(S) DUE shown above.

If the ENTITY STATUS is changed from that shown above, on PART B - FEE(S) TRANSMITTAL, complete section number 5 titled "Change in Entity Status (from status indicated above)".

For purposes of this notice, small entity fees are 1/2 the amount of undiscounted fees, and micro entity fees are 1/2 the amount of small entity fees.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

PART B - FEE(S) TRANSMITTAL

Complete and send this form, together with applicable fee(s), to: **Mail** **Mail Stop ISSUE FEE**
Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450
or Fax **(571)-273-2885**

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

CURRENT CORRESPONDENCE ADDRESS (Note: Use Block 1 for any change of address)

Note: A certificate of mailing can only be used for domestic mailings of the Fee(s) Transmittal. This certificate cannot be used for any other accompanying papers. Each additional paper, such as an assignment or formal drawing, must have its own certificate of mailing or transmission.

Certificate of Mailing or Transmission

I hereby certify that this Fee(s) Transmittal is being deposited with the United States Postal Service with sufficient postage for first class mail in an envelope addressed to the Mail Stop ISSUE FEE address above, or being facsimile transmitted to the USPTO (571) 273-2885, on the date indicated below.

1. Change of correspondence address or indication of "Fee Address" (37 CFR 1.363).

- ☐ Change of correspondence address (or Change of Correspondence Address form PTO/SB/122) attached.
- ☐ "Fee Address" indication (or "Fee Address" Indication form PTO/SB/47; Rev 03-02 or more recent) attached. **Use of a Customer Number is required.**

2. For printing on the patent front page, list

- (1) The names of up to 3 registered patent attorneys or agents OR, alternatively, 1 _____
- (2) The name of a single firm (having as a member a registered attorney or agent) and the names of up to 2 registered patent attorneys or agents. If no name is listed, no name will be printed. 2 _____
- 3 _____

3. ASSIGNEE NAME AND RESIDENCE DATA TO BE PRINTED ON THE PATENT (print or type)

PLEASE NOTE: Unless an assignee is identified below, no assignee data will appear on the patent. If an assignee is identified below, the document has been filed for recordation as set forth in 37 CFR 3.11. Completion of this form is NOT a substitute for filing an assignment.

(A) NAME OF ASSIGNEE

(B) RESIDENCE: (CITY and STATE OR COUNTRY)

Please check the appropriate assignee category or categories (will not be printed on the patent): ☐ Individual ☐ Corporation or other private group entity ☐ Government

4a. The following fee(s) are submitted:

- ☐ Issue Fee
- ☐ Publication Fee (No small entity discount permitted)
- ☐ Advance Order - # of Copies _____

4b. Payment of Fee(s): (Please first reapply any previously paid issue fee shown above)

- ☐ A check is enclosed.
- ☐ Payment by credit card. Form PTO-2038 is attached.
- ☐ The director is hereby authorized to charge the required fee(s), any deficiency, or credits any overpayment, to Deposit Account Number _____ (enclose an extra copy of this form).

5. Change in Entity Status (from status indicated above)

- ☐ Applicant certifying micro entity status. See 37 CFR 1.29
- ☐ Applicant asserting small entity status. See 37 CFR 1.27
- ☐ Applicant changing to regular undiscounted fee status.

NOTE: Absent a valid certification of Micro Entity Status (see forms PTO/SB/15A and 15B), issue fee payment in the micro entity amount will not be accepted at the risk of application abandonment.

NOTE: If the application was previously under micro entity status, checking this box will be taken to be a notification of loss of entitlement to micro entity status.

NOTE: Checking this box will be taken to be a notification of loss of entitlement to small or micro entity status, as applicable.

NOTE: This form must be signed in accordance with 37 CFR 1.31 and 1.33. See 37 CFR 1.4 for signature requirements and certifications.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (Applications filed on or after May 29, 2000)

The Office has discontinued providing a Patent Term Adjustment (PTA) calculation with the Notice of Allowance.

Section 1(h)(2) of the AIA Technical Corrections Act amended 35 U.S.C. 154(b)(3)(B)(i) to eliminate the requirement that the Office provide a patent term adjustment determination with the notice of allowance. See Revisions to Patent Term Adjustment, 78 Fed. Reg. 19416, 19417 (Apr. 1, 2013). Therefore, the Office is no longer providing an initial patent term adjustment determination with the notice of allowance. The Office will continue to provide a patent term adjustment determination with the Issue Notification Letter that is mailed to applicant approximately three weeks prior to the issue date of the patent, and will include the patent term adjustment on the patent. Any request for reconsideration of the patent term adjustment determination (or reinstatement of patent term adjustment) should follow the process outlined in 37 CFR 1.705.

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

OMB Clearance and PRA Burden Statement for PTOL-85 Part B

The Paperwork Reduction Act (PRA) of 1995 requires Federal agencies to obtain Office of Management and Budget approval before requesting most types of information from the public. When OMB approves an agency request to collect information from the public, OMB (i) provides a valid OMB Control Number and expiration date for the agency to display on the instrument that will be used to collect the information and (ii) requires the agency to inform the public about the OMB Control Number's legal significance in accordance with 5 CFR 1320.5(b).

The information collected by PTOL-85 Part B is required by 37 CFR 1.311. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, Virginia 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450. Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

Notice of Allowability	Application No. 14/487,947	Applicant(s) VOTO ET AL.	
	Examiner ERNEST UNELUS	Art Unit 2181	AIA (First Inventor to File) Status Yes

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address--

All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. **THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS.** This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.

1. ☒ This communication is responsive to Examiner's amendment on 06/09/2016.
☐ A declaration(s)/affidavit(s) under **37 CFR 1.130(b)** was/were filed on _____.

2. ☐ An election was made by the applicant in response to a restriction requirement set forth during the interview on _____; the restriction requirement and election have been incorporated into this action.

3. ☒ The allowed claim(s) is/are 1-5, 7-11 and 17-23. As a result of the allowed claim(s), you may be eligible to benefit from the **Patent Prosecution Highway** program at a participating intellectual property office for the corresponding application. For more information, please see http://www.uspto.gov/patents/init_events/pph/index.jsp or send an inquiry to PPHfeedback@uspto.gov.

4. ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

Certified copies:

a) ☐ All b) ☐ Some *c) ☐ None of the:

1. ☐ Certified copies of the priority documents have been received.

2. ☐ Certified copies of the priority documents have been received in Application No. _____.

3. ☐ Copies of the certified copies of the priority documents have been received in this national stage application from the International Bureau (PCT Rule 17.2(a)).

* Certified copies not received: _____.

Applicant has THREE MONTHS FROM THE "MAILING DATE" of this communication to file a reply complying with the requirements noted below. Failure to timely comply will result in ABANDONMENT of this application.
THIS THREE-MONTH PERIOD IS NOT EXTENDABLE.

5. ☐ CORRECTED DRAWINGS (as "replacement sheets") must be submitted.
☐ including changes required by the attached Examiner's Amendment / Comment or in the Office action of Paper No./Mail Date _____.

Identifying indicia such as the application number (see 37 CFR 1.84(c)) should be written on the drawings in the front (not the back) of each sheet. Replacement sheet(s) should be labeled as such in the header according to 37 CFR 1.121(d).

6. ☐ DEPOSIT OF and/or INFORMATION about the deposit of BIOLOGICAL MATERIAL must be submitted. Note the attached Examiner's comment regarding REQUIREMENT FOR THE DEPOSIT OF BIOLOGICAL MATERIAL.

Attachment(s)

1. ☐ Notice of References Cited (PTO-892) 2. ☐ Information Disclosure Statements (PTO/SB/08), Paper No./Mail Date _____ 3. ☐ Examiner's Comment Regarding Requirement for Deposit of Biological Material 4. ☒ Interview Summary (PTO-413), Paper No./Mail Date <u>20160609</u> .	5. ☒ Examiner's Amendment/Comment 6. ☒ Examiner's Statement of Reasons for Allowance 7. ☐ Other _____.

/ERNEST UNELUS/ Primary Examiner, Art Unit 2181	
--	--

DETAILED ACTION

The present application, filed on or after March 16, 2013, is being examined under the first inventor to file provisions of the AIA.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Robert J. Myers (Reg. No. 69,783) on June 8, 2016. The examiner proposed amendments to better place the application in condition for allowance, particularly adding the limitation that prior arts fail to teach. Mr. Myers agreed.

The application has been amended as follows:

Listing of Claims:

1. (Currently amended) A system disposed within a vehicle, comprising:
 - an embedded Universal Serial Bus (USB) Host system;
 - a USB Hub having a plurality of USB Ports and interconnected to the embedded USB Host system, said USB Hub configured to simultaneously broadcast data from the embedded USB Host system to each USB Port in the plurality of USB Ports and to transmit data from each USB Port to the embedded USB Host system;

a USB Bridge interconnected to the USB Hub~~[[;]]~~ and configured to connect the embedded USB Host system to a second USB Host; and
a USB routing switch interconnected to the USB Bridge, the USB Hub, and ~~[[a]]~~ the plurality of USB Port Ports, wherein the USB routing switch is configured to connect ~~the~~ a first USB Port of the plurality of USB Ports to the USB Hub through the USB Bridge when a consumer device connected to the USB Port is ~~acting as a USB Host~~ the second USB Host and is configured to initiate bidirectional communication with the embedded USB Host, and wherein the USB routing switch is configured to connect the first USB Port directly to the USB Hub when the consumer device connected to the first USB Port is ~~acting as a~~ configured to only respond to communication from the embedded USB Device Host, thereby rendering the consumer device compatible with the embedded USB Host system.

2. (Currently amended) A system as recited in claim 1, wherein the USB routing switch is configured to connect ~~[[a]]~~ the first USB Port of a plurality of USB Ports to the USB Hub through the USB Bridge when a first consumer device connected to the first USB Port is ~~acting as a~~ the second USB Host, and wherein the USB routing switch is configured to simultaneously connect a second USB Port of the plurality of USB Ports directly to the USB Hub when a second consumer device connected to the second USB Port is ~~acting as a~~ the USB Device, thereby rendering the first and second consumer devices compatible to function simultaneously with the embedded USB Host system.

Art Unit: 2181

3. (Currently amended) A system as recited in claim 1, wherein the system is configured to recognize whether the consumer device connected to the USB Port is ~~configured to act as a~~ the second USB Host or ~~as a~~ the USB Device and control the USB routing switch accordingly.
4. (Previously presented) A system as recited in claim 7, wherein the system is configured to dynamically switch operation of USB Ports connected to the USB Hub Module between USB Device mode and USB Host mode.
5. (Previously presented) A system as recited in claim 1, wherein the system further comprises an infotainment system containing the embedded USB Host system.
6. (Cancelled)
7. (Previously presented) A system as recited in claim 1, wherein the USB Hub, the USB Bridge, and the USB routing switch system are disposed within a USB Hub Module.
8. (Currently amended) A system as recited in claim 7, wherein the USB Hub Module is connected to the embedded USB Host system and ~~[[a]]~~ the plurality of USB Ports connected to a plurality of consumer devices.
9. (Currently amended) A system as recited in claim 8, wherein the USB routing switch is configured to connect each consumer device of the plurality of consumer devices to either the USB Bridge or the USB Hub based on whether each consumer device attached to each USB Port in the plurality of USB Ports is ~~configured to act as a~~ the USB Host or ~~[[a]]~~ the USB Device.

Art Unit: 2181

10. (Previously presented) A system as recited in claim 1, wherein the USB routing switch comprises a plurality of USB analog multiplexing switches.

11. (Previously presented) A system as recited in claim 1, wherein the USB Bridge is configured to control the USB routing switch.

12. – 16. (Cancelled)

17. (Previously presented) A system as recited in claim 23, wherein the USB Hub, the USB Bridge, and the USB routing switch system are integrated in an Integrated Circuit (IC).

18. (Previously presented) A system as recited in claim 1, wherein the USB Bridge comprises a bridge controller as well as endpoint buffers.

19. (Previously presented) A system as recited in claim 18, wherein the endpoint buffers are configured to support a USB data connection pipe between an infotainment system and the consumer device.

20. (Currently amended) A system as recited in claim 1, wherein the system further comprises an infotainment system with ~~a single~~ the embedded USB ~~host~~ Host which is electrically connected to the USB Hub via a single USB data connection.

21. (Currently amended) A system as recited in claim 1, wherein the system further comprises an infotainment system, wherein the system is configured to support simultaneous active USB data connections between the infotainment system and multiple consumer devices, at least one of which is ~~[[a]]~~ the second USB Host while others are USB Devices.

Art Unit: 2181

22. (Currently amended) A system as recited in claim 1, wherein the system further comprises an infotainment system, wherein the system is configured to support simultaneous active USB data connections between the infotainment system and some combination of embedded devices and consumer devices that are USB Devices along with at least one that is [[a]] the second USB Host.

23. (Previously presented) A system as recited in claim 1, wherein the USB routing switch comprises digital routing logic.

ALLOWABLE SUBJECT MATTER

The primary reason for allowance of claim 1 in the instant application is that prior arts don't teach a peripheral device to communicate with a USB hub bi-directionally in a first mode and to communicate with the hub only uni-directionally in a second mode and said USB Hub configured to simultaneously broadcast data from an embedded USB Host system to a plurality of USB Ports on the hub and to transmit data from each USB Port to the embedded USB Host system.

The remaining claims 2-5, 7-11 and 17-23 are allowed by virtue of their dependencies on the independent claim. Hence, the examiner has allowed claims 1-5, 7-11 and 17-23.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

CLOSING COMMENTS

Conclusion

a. STATUS OF CLAIMS IN THE APPLICATION

The following is a summary of the treatment and status of all claims in the application as recommended by **M.P.E.P. 707.07(i)**:

a(1) CLAIMS ALLOWED IN THE APPLICATION

Per the instant office action, claims 1-5, 7-11 and 17-23 have been allowed.

b. DIRECTION OF FUTURE CORRESPONDENCES

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ernest Unelus whose telephone number is (571) 272-8596. The examiner can normally be reached on Monday to Friday 9:00 AM to 5:00 PM.

IMPORTANT NOTE

If attempts to reach the above noted Examiner by telephone are unsuccessful, the Examiner's supervisor, Mr. Idriss Alrobye, can be reached at the following telephone number: Area Code (571) 270-1023.

The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status

Art Unit: 2181

information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PMR system, see [her//pair-direct.uspto.gov](http://pair-direct.uspto.gov). Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217- 91 97 (toll-free).

Receipt is acknowledged of this non-provisional patent application. The application will be taken up for examination in due course. Applicant will be notified as to the results of the examination. Any correspondence concerning the application must include the following identification information: the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. **If an error is noted on this Filing Receipt, please submit a written request for a Filing Receipt Correction. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections**

Domestic Priority data as claimed by applicant

This appln claims benefit of 61/882,915 09/26/2013

Foreign Applications for which priority is claimed (You may be eligible to benefit from the **Patent Prosecution Highway** program at the USPTO. Please see <http://www.uspto.gov> for more information.) - None.

Foreign application information must be provided in an Application Data Sheet in order to constitute a claim to foreign priority. See 37 CFR 1.55 and 1.76.

Permission to Access Application via Priority Document Exchange: Yes

Permission to Access Search Results: No

Applicant may provide or rescind an authorization for access using Form PTO/SB/39 or Form PTO/SB/69 as appropriate.

If Required, Foreign Filing License Granted: 09/22/2014

The country code and number of your priority application, to be used for filing abroad under the Paris Convention, is **US 14/487,947**

Projected Publication Date: Not Applicable

Non-Publication Request: No

Early Publication Request: No

**** SMALL ENTITY ****

Title

FLEXIBLE MOBILE DEVICE CONNECTIVITY TO AUTOMOTIVE SYSTEMS WITH USB HUBS

Preliminary Class

710

Statement under 37 CFR 1.55 or 1.78 for AIA (First Inventor to File) Transition Applications: No

PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at <http://www.uspto.gov/web/offices/pac/doc/general/index.html>.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, <http://www.stopfakes.gov>. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4258).

LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

SelectUSA

The United States represents the largest, most dynamic marketplace in the world and is an unparalleled location for business investment, innovation, and commercialization of new technologies. The U.S. offers tremendous resources and advantages for those who invest and manufacture goods here. Through SelectUSA, our nation works to promote and facilitate business investment. SelectUSA provides information assistance to the international investor community; serves as an ombudsman for existing and potential investors; advocates on behalf of U.S. cities, states, and regions competing for global investment; and counsels U.S. economic development organizations on investment attraction best practices. To learn more about why the United States is the best country in the world to develop technology, manufacture products, deliver services, and grow your business, visit <http://www.SelectUSA.gov> or call +1-202-482-6800.

PART B - FEE(S) TRANSMITTAL

Complete and send this form, together with applicable fee(s), to: **Mail Stop ISSUE FEE**
Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450
 or Fax (571)-273-2885

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

CURRENT CORRESPONDENCE ADDRESS (Note: Use Block 1 for any change of address)

279 7580 06/20/2016
 MARIA E. KITZ
 CLARK HILL PLC
 150 NORTH MICHIGAN AVENUE
 SUITE 2700
 CHICAGO, IL 60601

Note: A certificate of mailing can only be used for domestic mailings of the Fee(s) Transmittal. This certificate cannot be used for any other accompanying papers. Each additional paper, such as an assignment or formal drawing, must have its own certificate of mailing or transmission.

Certificate of Mailing or Transmission

I hereby certify that this Fee(s) Transmittal is being deposited with the United States Postal Service with sufficient postage for first class mail in an envelope addressed to the Mail Stop ISSUE FEE address above, or being facsimile transmitted to the USPTO (571) 273-2885, on the date indicated below.

 3

3. ASSIGNEE NAME AND RESIDENCE DATA TO BE PRINTED ON THE PATENT (print or type)

PLEASE NOTE: Unless an assignee is identified below, no assignee data will appear on the patent. If an assignee is identified below, the document has been filed for recordation as set forth in 37 CFR 3.11. Completion of this form is NOT a substitute for filing an assignment.

(A) NAME OF ASSIGNEE

Delphi Technologies, Inc.

(B) RESIDENCE: (CITY and STATE OR COUNTRY)

Indy, Mi

Please check the appropriate assignee category or categories (will not be printed on the patent): ☐ Individual ☒ Corporation or other private group entity ☐ Government

4a. The following fee(s) are submitted:

- ☒ Issue Fee
☐ Publication Fee (No small entity discount permitted)
☐ Advance Order - # of Copies

4b. Payment of Fee(s): (Please first reapply any previously paid issue fee shown above)

- ☐ A check is enclosed.
☐ Payment by credit card. Form PTO-2038 is attached.
☒ The director is hereby authorized to charge the required fee(s), any deficiency, or credits any overpayment, to Deposit Account Number 500331 (enclose an extra copy of this form).

5. Change in Entity Status (from status indicated above)

- ☐ Applicant certifying micro entity status, See 37 CFR 1.29
☐ Applicant asserting small entity status. See 37 CFR 1.27
☐ Applicant changing to regular undiscounted fee status.

NOTE: Absent a valid certification of Micro Entity Status (see forms PTO/SB/15A and 15B), issue fee payment in the micro entity amount will not be accepted at the risk of application abandonment.

NOTE: If the application was previously under micro entity status, checking this box will be taken to be a notification of loss of entitlement to micro entity status.

NOTE: Checking this box will be taken to be a notification of loss of entitlement to small or micro entity status, as applicable.

NOTE: This form must be signed in accordance with 37 CFR 1.31 and 1.33. See 37 CFR 1.4 for signature requirements and certifications.

-------------------------------------	--------

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

ISSUE NOTIFICATION

The projected patent number and issue date are specified above.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment is 0 day(s). Any patent to issue from the above-identified application will include an indication of the adjustment on the front page.

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Application Assistance Unit (AAU) of the Office of Data Management (ODM) at (571)-272-4200.

APPLICANT(s) (Please see PAIR WEB site <http://pair.uspto.gov> for additional applicants):

The United States represents the largest, most dynamic marketplace in the world and is an unparalleled location for business investment, innovation, and commercialization of new technologies. The USA offers tremendous resources and advantages for those who invest and manufacture goods here. Through SelectUSA, our nation works to encourage and facilitate business investment. To learn more about why the USA is the best country in the world to develop technology, manufacture products, and grow your business, visit SelectUSA.gov.

PATENT ASSIGNMENT COVER SHEET

Electronic Version v1.1
 Stylesheet Version v1.2

EPAS ID: PAT5157768

SUBMISSION TYPE:	NEW ASSIGNMENT	
NATURE OF CONVEYANCE:	ASSIGNMENT	
CONVEYING PARTY DATA		
Name		Execution Date
DELPHI TECHNOLOGIES INC.		01/01/2018
RECEIVING PARTY DATA		
Name:	APTIV TECHNOLOGIES LIMITED	
Street Address:	ERIN COURT, BISHOP'S COURT HILL	
City:	ST. MICHAEL	
State/Country:	BARBADOS	
PROPERTY NUMBERS Total: 966		
Property Type	Number	
Patent Number:	6646845	
Patent Number:	6286222	
Patent Number:	6401047	
Patent Number:	6286221

Confirmatory Assignment

Whereas, **DELPHI TECHNOLOGIES, INC.**, of 5725 Delphi Drive, Troy, Michigan 48098, U.S.A, hereinafter called Assignor, is the assignee of record of the entire right, title and interest in the U.S. Patents listed in the attached **Appendix** (hereinafter the "Assigned Patent Rights") by assignment recorded with the U.S. Patent and Trademark Office; and

Whereas, **APTIV TECHNOLOGIES LIMITED**, a company incorporated in accordance with the Companies Act CAP 308 of the laws of Barbados (company no. 41949) and licensed to operate as an International Business Company, whose registered office is at Erin Court, Bishop's Court Hill, St. Michael, Barbados, hereinafter called Assignee, desires to acquire the Assignor's entire right, title, and interest including rights to recover for past infringement in the Assigned Patents.

Therefore, for valuable consideration, receipt of which is hereby acknowledged, the above named Assignor, hereby sells, assigns and transfers to the above named Assignee, its successors and assigns, the Assignor's entire right, title and interest including rights to recover for past infringement in the Assigned Patents; and Assignor will execute without further consideration all papers deemed necessary by the Assignee in connection with said Assigned Patents when called upon to do so by the Assignee.

This Assignment is made effective as of January 1, 2018.

ASSIGNOR:

Delphi Technologies, Inc.

By:

Name:

CRAIG A. BALDWIN

Title:

ASSISTANT SECRETARY

APPENDIX

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

POWER OF ATTORNEY OR REVOCATION OF POWER OF ATTORNEY WITH A NEW POWER OF ATTORNEY AND CHANGE OF CORRESPONDENCE ADDRESS	Application Number	14/487,947
	Filing Date	2014-09-16
	First Named Inventor	Robert Voto, et al.
	Title	Flexible Mobile Device Connectivity to Automotive Systems with USB Hubs
	Art Unit	2181
	Examiner Name	Ernest Urelus
	Attorney Docket Number	7021 145US1 (formerly DP-322037)

I hereby revoke all previous powers of attorney given in the above-identified application.

☐ A Power of Attorney is submitted herewith.

OR

☒ I hereby appoint Practitioner(s) associated with the following Customer Number as my/our attorney(s) or agent(s) to prosecute the application identified above, and to transact all business in the United States Patent and Trademark Office connected therewith:

171991

OR

☐ I hereby appoint Practitioner(s) named below as my/our attorney(s) or agent(s) to prosecute the application identified above, and to transact all business in the United States Patent and Trademark Office connected therewith:

Practitioner(s) Name	Registration Number

Please recognize or change the correspondence address for the above-identified application to:

☒ The address associated with the above-mentioned Customer Number.

OR

☐ The address associated with Customer Number:

OR

☐ Firm or Individual Name

Address

City

State

Zip

Country

Telephone

Email

I am the:

☐ Applicant/Inventor.

OR

☒ Assignee of record of the entire interest. See 37 CFR 3.71.

Statement under 37 CFR 3.73(b) (Form PTO/SB/96) submitted herewith or filed on _____.

DocuSigned by:

SIGNATURE of Applicant or Assignee of Record

Signature

David Ford

Date

May 5, 2022

Name

David J. Ford

Telephone

248-813-1234

Title and Company

Assistant Secretary, Aptiv Technologies Limited

NOTE: Signatures of all the inventors or assignees of record of the entire interest or their representative(s) are required. Submit multiple forms if more than one signature is required, see below*.☒ *Total of 1 forms are submitted.

This collection of information is required by 37 CFR 1.31, 1.32 and 1.33. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 3 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

<p>This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.</p> <p><u>New Applications Under 35 U.S.C. 111</u> If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.</p> <p><u>National Stage of an International Application under 35 U.S.C. 371</u> If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.</p> <p><u>New International Application Filed with the USPTO as a Receiving Office</u> If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.</p>					

STATEMENT UNDER 37 CFR 3.73(b)Applicant/Patent Owner: Aptiv Technologies LimitedApplication No./Patent No.: 14/487,947 / 9,460,037Filed/Issue Date: 2014-09-16 / 2016-10-04Titled: Flexible Mobile Device Connectivity to Automotive Systems with USB HubsAptiv Technologies Limiteda Company

(Name of Assignee)

(Type of Assignee, e.g., corporation, partnership, university, government agency, etc.)

states that it is:

1. ☒ the assignee of the entire right, title, and interest in;
2. ☐ an assignee of less than the entire right, title, and interest in
(The extent (by percentage) of its ownership interest is _____ %); or
3. ☐ the assignee of an undivided interest in the entirety of (a complete assignment from one of the joint inventors was made)
- the patent application/patent identified above, by virtue of either:

- A. ☐ An assignment from the inventor(s) of the patent application/patent identified above. The assignment was recorded in the United States Patent and Trademark Office at Reel _____, Frame _____, or a copy* is attached.

OR

- B. ☒ A chain of title from the inventor(s), of the patent application/patent identified above, to the current assignee as follows:

1. From: Voto, Robert; Veda, Shyambabu; Petku, Craig To: Unwired Technology LLC

____The document was recorded in the United States Patent and Trademark Office at
Reel: 033785, Frame 0399, or a copy* is attached.

2. From: Unwired Technology LLC To: Delphi Data Connectivity US LLC

The document was recorded in the United States Patent and Trademark Office at
Reel: 038014, Frame 0604, or a copy* is attached.

3. From: Delphi Data Connectivity US LLC To: Delphi Technologies, Inc.

The document was recorded in the United States Patent and Trademark Office at
Reel: 038035, Frame 0127, or a copy* is attached.

☒ Additional documents in the chain of title are listed on a supplemental sheet(s).

☐ *As required by 37 CFR 3.73(b)(1)(i), if a copy/copies is/are attached, the documentary evidence of the chain of title from the original owner to the assignee was, or concurrently is being, submitted for recordation pursuant to 37 CFR 3.11.

[NOTE: A separate copy (i.e., a true copy of the original assignment document(s)) must be submitted to Assignment Division in accordance with 37 CFR Part 3, to record the assignment in the records of the USPTO. See MPEP 302.]

The undersigned (whose name is signed below) is authorized to act on behalf of the assignee.

This collection of information is required by 37 CFR 3.73(b). The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

Privacy Act Statement

The **Privacy Act of 1974 (P.L. 93-579)** requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (*i.e.*, GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.
