

Progress Powered by Technology, Seeded by People

Our vision is a renewed Earth. We begin with our SEEDesign™ platform

Our Points of Distinction

Cutting-Edge Technology and IP Platform

Predictive Design: creating an editing blueprint through deep learning and machine learning

Advanced Multiplex Gene Editing Toolkit: facilitating multiple edits across multiple genes

A rich pool of intellectual property with broad application

Well-Defined Commercial Strategy

Unique commercial relationships with Independent Seed Companies (ISCs) selling directly to farmers

A superior feedback loop between Inari and farmers via ISCs, informing future products

Strategic partnerships with leading seed companies enabling market expansion in new crops and regions

Step-Change Products

Sustainability Impact: focusing on the world's largest crop types

Efficiency Improvements: product pipeline includes fertilizer and water use

Yield Increase: projecting as much as +20% in Inari's current crops vs. historical increases of ~1% per year

Diverse and Highly Experienced Team

Unparalleled experience across agriculture, biotech, commercial, intellectual property and academia

Active support from a world-class Scientific Strategy Board composed of genetics experts from top global institutions - including Jennifer Doudna, 2020 winner of the Nobel Prize in Chemistry for the development of CRISPR-Cas9
