Attachments: HUB WITH 4 TENTS.PDF; HUB WITH 3 TENTS.PDF; HUB FRAME.PDF

Donald,

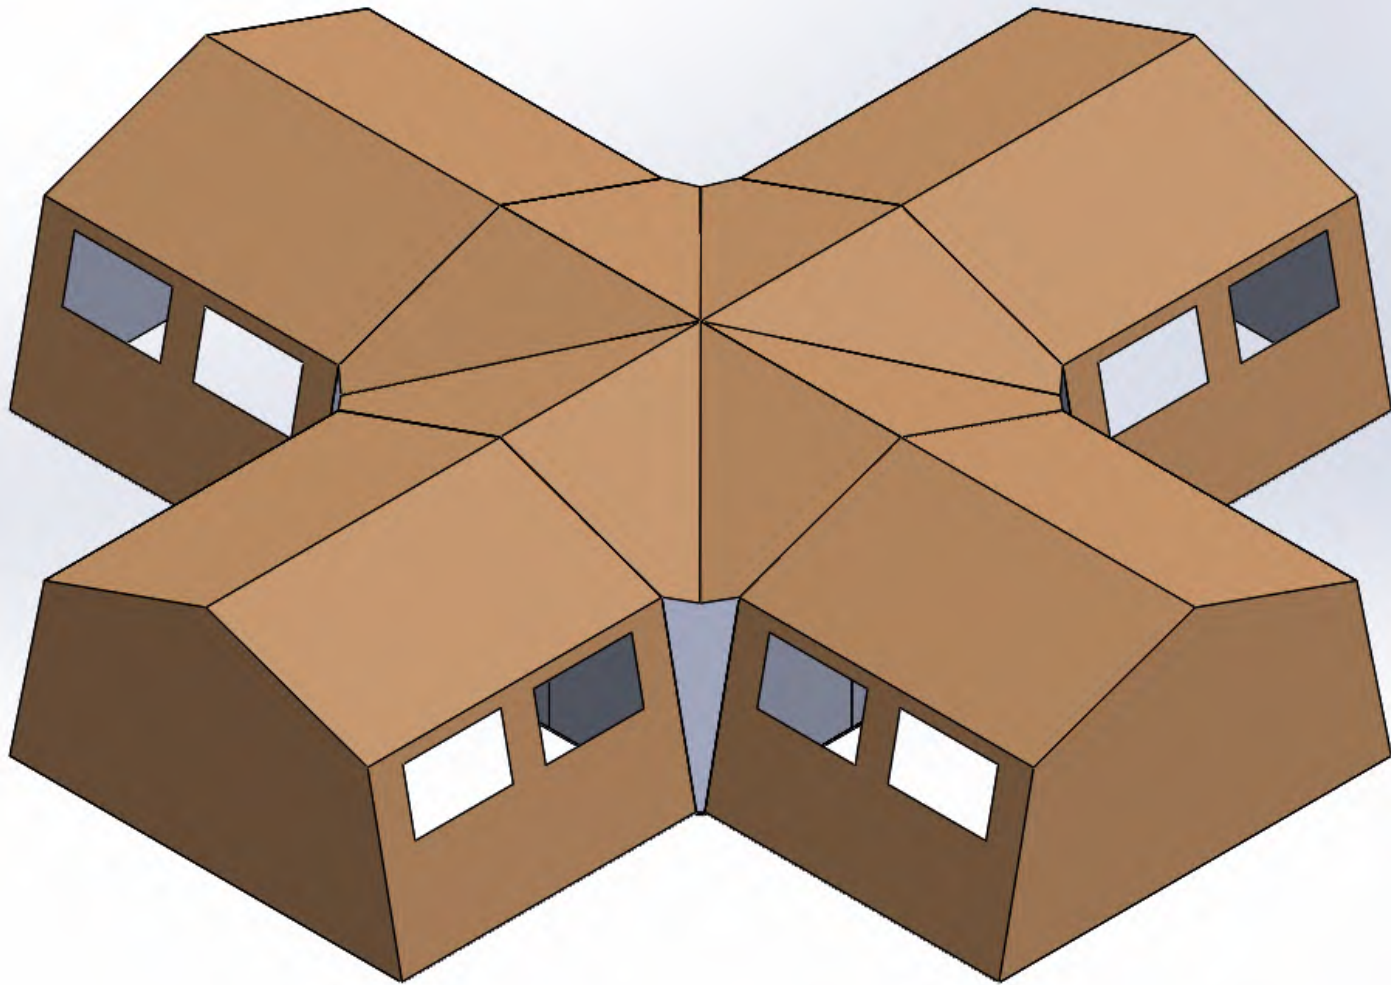

Attached are some very rough sketches of the Hub Tent we discussed. I wanted to get your thoughts about the direction we are heading. This design would allow us to utilize the current ASAP end walls when a ASAP tent is not connected to the hub. Also we could build a small adapter or vestibule to connect the Hub to the ASAP using the flange on the end walls.

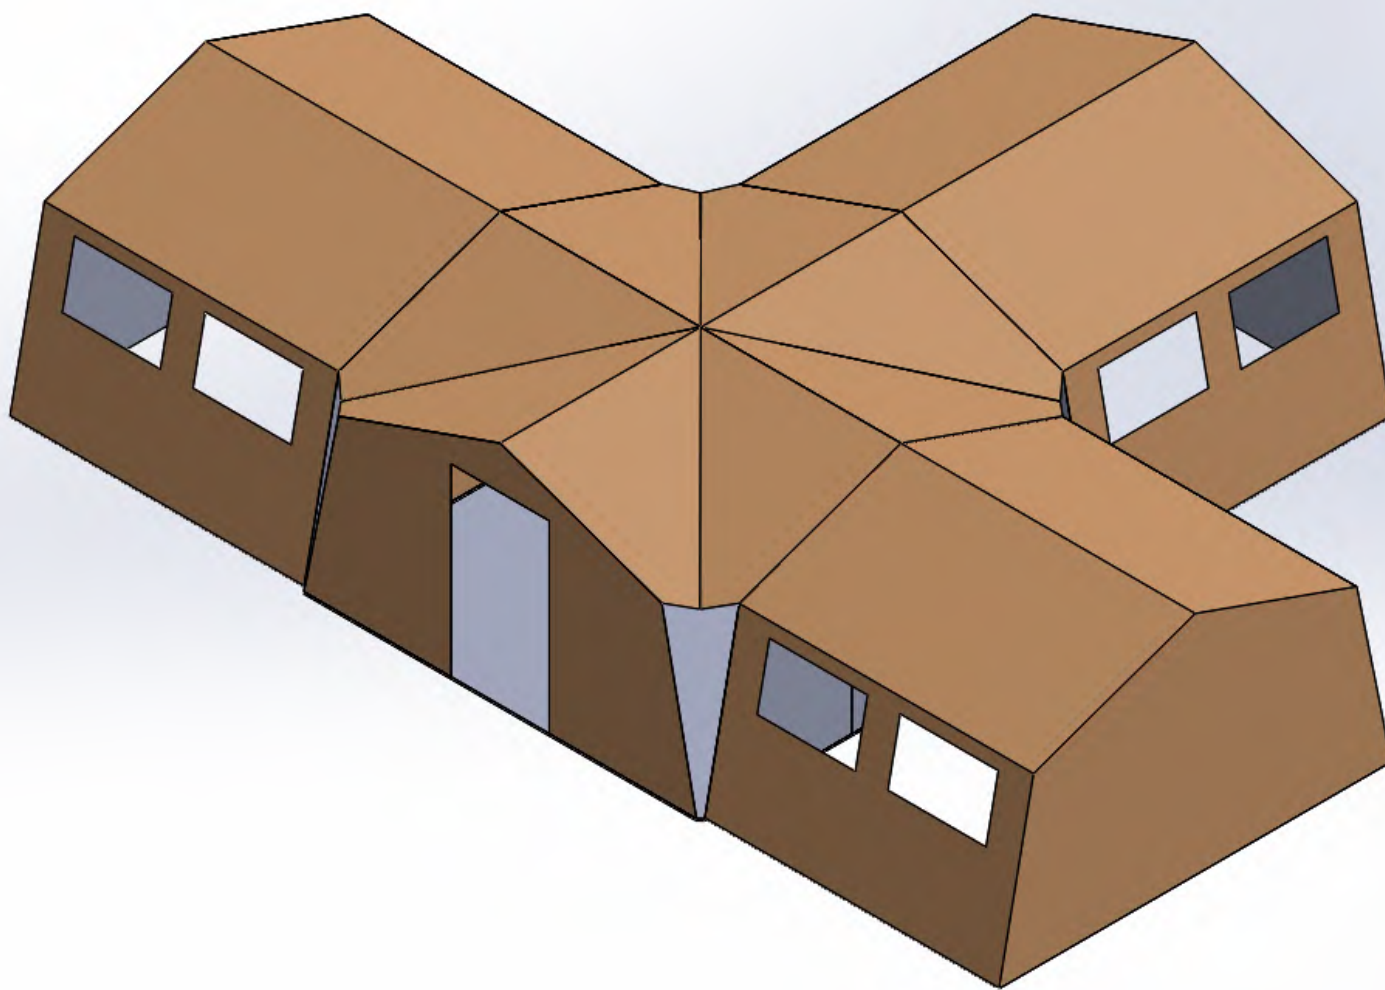

Thanks,

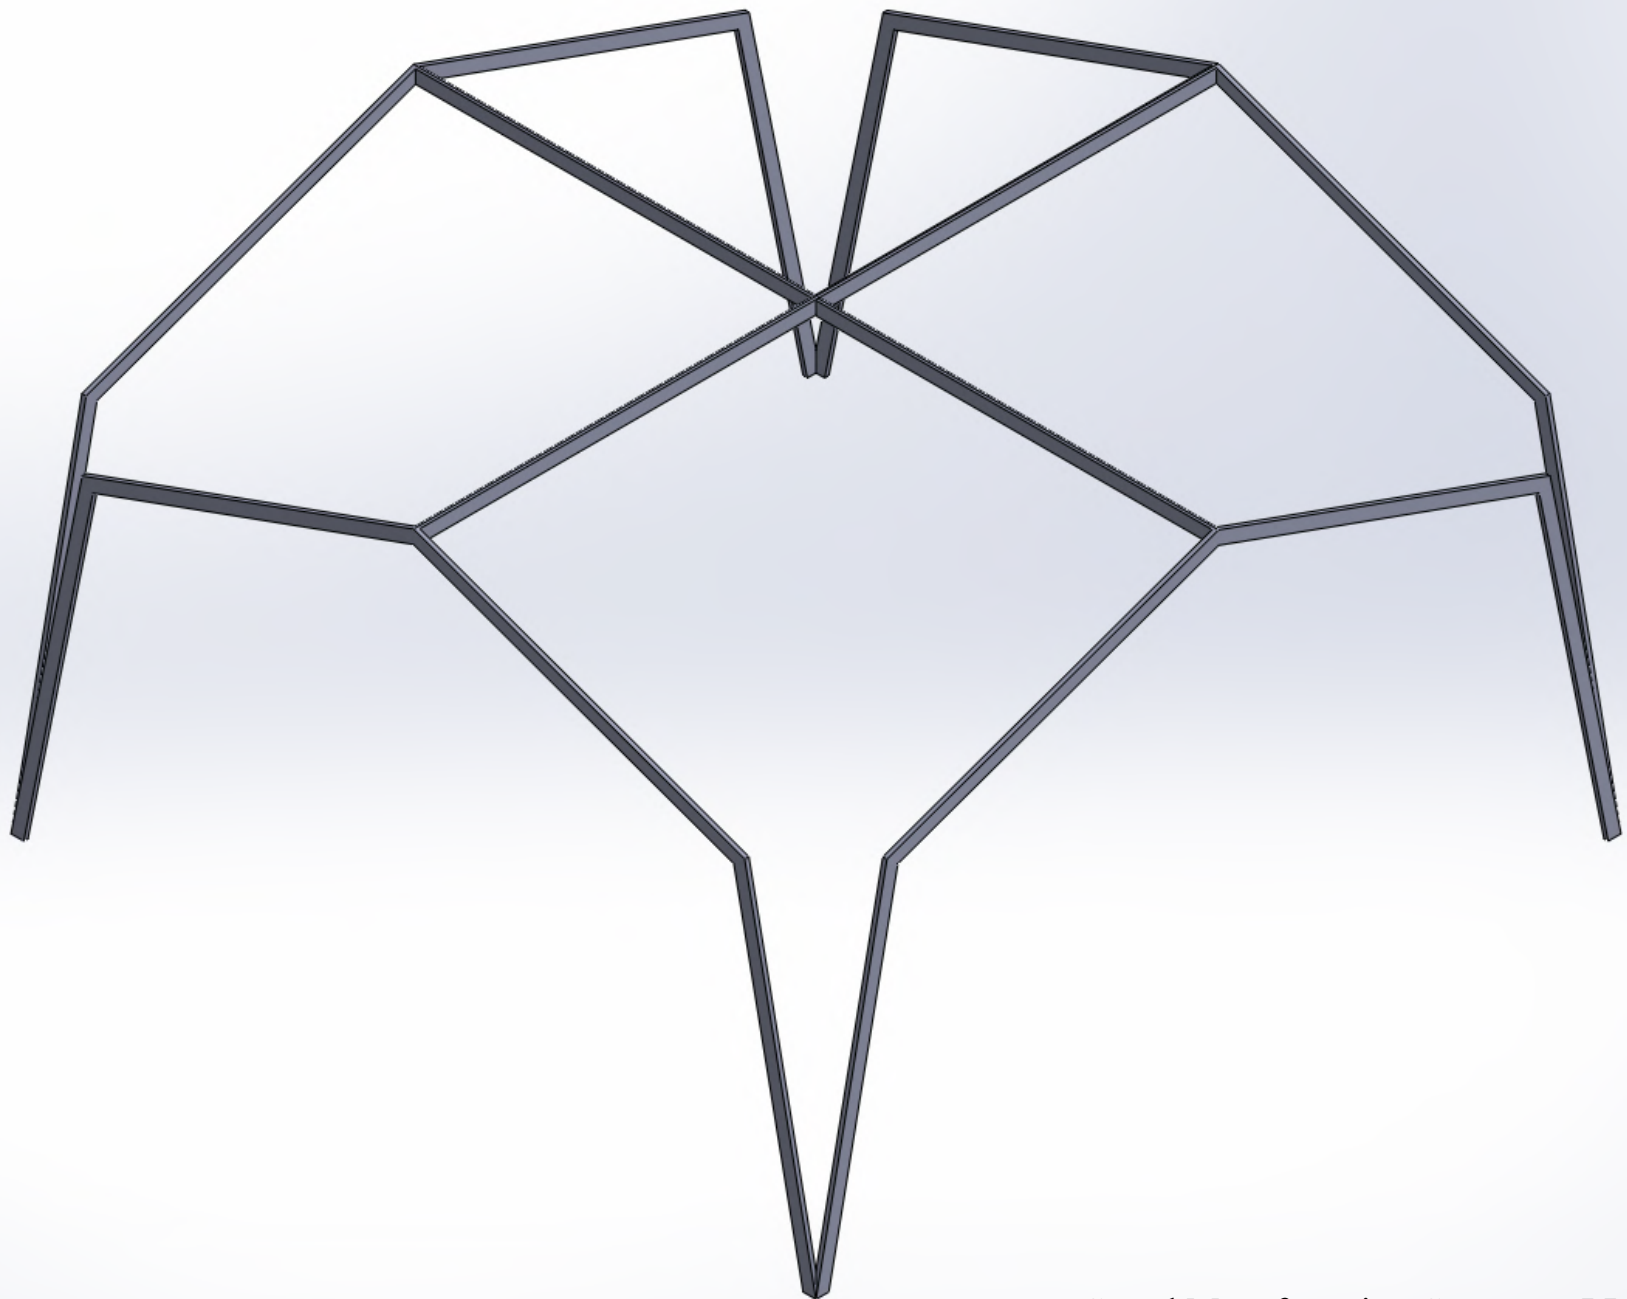

Scott Campbell

Good afternoon JJ,
Any idea when you would want the couple of hub units?

Thanks,
Scott

Hey Scott,

Thanks again for moving this forward. What do you think would be the best chance of a prototype? We will have the FBI and ATF visiting us at the end of July and if we could get a unit by then to show them they would buy several. As well would several customers. We are prepared to buy a couple for demo units immediately.

Thank you,

JJ Urhausen

Good afternoon JJ,

We have the prototype HUB tent complete. We are sending the frame out to powder coat in the morning. When will you need the tent in OR? Would it be beneficial for one of us to come out to help with the erection of the tent? I will send you some pictures as soon as I get them uploaded to my pc.

Thanks,
Scott

Scott,

That sounds awesome. Send pics please. We may try to coordinate that our guys go out there the week you send it. We have several other things to go over with you all and going to swap out the Western Shelter Frame you have. In the end we need it here by July 31 or Aug 1 at very latest.

Good afternoon all,
Frame is back from powder coat. Hub is complete. I hope you guys like it. It will probably ship out Friday.

Thanks,
Scott
