Metal Frame Pools

RUST-RESISTANT GALVANIZED STEEL FRAME POOLS!

With the added protective finish of galvanized steel, frame pools can now be manufactured in even larger sizes, such as our 24' diameter (732cm) pool with a 52" (132cm) depth, which is capable of supporting over 12,400 gallons (47,000 L) of water.

- SUPER-TOUGH™ sidewalls are triple strong. Made with 3 separate layers of material for extra strength and durability - two outer layers of heavy-gauge PVC laminated to an inner layer of polyester mesh for extra reinforcement.
- Separate laminated band provides additional wall support.
- Reinforced polypropylene rope wraps around the bottom of the pool liner to keep the legs firmly in position.
- Convenient drain plug for easy draining. Connects to garden hose so the water can be drained away from the pool area.

Ladder included. Also available separately (see page 33)
