

Advanced Smile & Prosthetically-Driven Full-Arch Guide

GuidedSMILE fundamentally changes full-mouth implant surgery. GuidedSMILE's immediate protocol utilizes superior, industry-leading floating guide technology with an excellent visualization and irrigation design, and a less invasive philosophy. GuidedSMILE offers an easy-to-convert final prosthetic protocol, an affordable package, and the most advanced process and technical support in the industry. We know you'll be amazed!

Key Benefits

- High surgical precision and restorative efficiencies
- Reduces chairtime to 2-4 hours per arch
- Full irrigation and visualization due to floating guide technology
- Compatible with most implant systems and guided kits
- Fully guided bone reduction, implant placement, and immediate prosthetics
