Rectangle Tablecloth

Description

Burlap fabric is a coarse, slightly sheer, and durable fabric. Sourced from thick, fibrous, sustainable, and hypoallergenic, 100% jute fibers, Burlap is woven in a loose plain, 1-over-1 style weave. This means the fabric causes less skin reactions than synthetically made fabrics, it is moisture-resistant, breathable, and it is slightly see-through where the woven yarns meet. Measuring 60/61 inches wide, Burlap fabric is 0.95 millimeters thick, has a 325 GSM, and weighs approximately 18 ounces per linear yard.

Use Burlap fabric to sew stylish and rustic accessories or décor. Sew items such as table covers, curtains, fabric flowers, arts and craft projects, picnic blankets, and more! Furthermore, this fabric can be used for industrial accessories like aerated sacks for food, nurse tree root wraps, landscaping fabric, privacy screens, and fencing for gardens.

Shop Burlap fabric online by the yard or in bulk by the roll at wholesale prices today!
