Enterprise Credit Information Publicity Report

Enterprise Name	Ambilight Intelligent Technology (Suzhou) Co., Ltd.
Report Generation Time	2026/06/05 15:32:09
Applicant's E-mail	zhouyinyin@lannray.com

(The content of this Report is for information only, and subject to the information set out on the relevant query pages of the National Enterprise Credit Information Publicity System.)

Governmental Authority Published Information

License information

Unified social credit code: 91320505MA24YUJQ5M

Type: Limited liability company (wholly owned by a Taiwan, Hong Kong or Macao corporation)

Registered capital: USD140 million

Commencement date of the term of operation: January 6, 2021

Registration authority: Administration for Market Regulation of Suzhou New District (Huqiu District)

Registration status: Active (in operation, open, duly registered)

Domicile: 122 Yong'an Road, Suzhou New District

Business scope: General items: Technical services, technology development, technical consultation, technical exchange, technology transfer and technology promotion; research and development of new material technologies; new material technology promotion services; manufacture of opto-electronic devices; sale of opto-electronic devices; manufacture of plastic products; sale of new-type film materials; sale of electronic components, electromechanical assemblies and equipment; manufacture of laboratory analytical instruments; manufacture of special machines for the production of building materials; manufacture of technical glass products; sale of technical glass products; manufacture of smart wearables; manufacture of special electronic materials; manufacture of smart on-board devices; sale of smart on-board devices; sale of smart wearables; manufacture of smart home devices; sale of smart home devices; import and export of goods; manufacture of automobile components and parts; research and development of electric machines and their control systems; research and development of power distribution switchgear and control equipment; manufacture of power and electronic components; sale of power distribution switchgear and control equipment; re-manufacture of automobile components; retail of automobile components; research and development of automobile components; manufacture of spray guns and similar tools; retail of sports goods and equipment; manufacture of smart devices for sports consumption (except the business subject to approval according to law, the Company shall conduct the business within the scope of its business license in its sole discretion subject to law).

Enterprise name: Ambilight Intelligent Technology (Suzhou) Co., Ltd.

Legal representative: WANG Chao

Date of incorporation: January 6, 2021

Expiry date of the term of operation:

Date of approval: January 28, 2026

Information of shareholders and their capital contributions

Administrative licensing information

No.	Licensing document No.	Title of licensing document	Commencement date of the validity period	Expiry date of the validity period	Licensing authority	Content of license
1			August 6, 2021	December 31, 2099	Administration for Market Regulation of Suzhou New District (Huqiu District)	Special equipment use registration
2			July 29, 2021	December 31, 2099	State Administration of Tax Suzhou New District Office	On July 29, 2021, we accepted the application for tax administrative permission regarding the maximum amount of special value-added tax invoices issued through the value-added tax control system submitted by you on the same day. After examination of your application, we hereby decide to grant this tax administrative permission to you pursuant to Article 38 Paragraph 1 of the Administrative License Law of the People's Republic of China.
3			June 6, 2022	December 31, 2099	Suzhou Municipal Bureau of Ecology and Environment	We hereby acknowledge the receipt of the Environmental Impact Report on the Construction Project of Ambilight Intelligent Technology (Suzhou) Co., Ltd. for Producing 5 Million Sets of Intelligent Electrochromic Devices per Year (the "Report") submitted by you. Upon consideration, we hereby reply to you as follows: I. The project is located at 122 Yong'an Road, Xushuguan Economic and Technological Development Zone, Suzhou New District, Jiangsu, and is designed to produce 5 million sets of intelligent electrochromic devices per year. II. According to the conclusion of the Report issued by Jiangsu Qibang Environmental Protection Technology Co., Ltd. (person in charge of preparing the Report: ZHAO Ming, whose professional qualification certificate number is 06353143505310201) at your request, the implementation of the project will have certain adverse impact on the ecological environment, but such adverse environmental impact can be mitigated and controlled from the perspective of ecological and environmental protection, to the extent that all necessary measures

					are effectively adopted to prevent and control pollutions and environmental risks, and ensure the discharge of all kinds of pollutants constantly meets the applicable standards. Therefore, in principle, we consent to the overall conclusion on environmental impact, and proposed ecological and environmental protection measures set forth in the Report. III. During the construction of the project, the “Three Simultaneities” system must be implemented strictly, i.e. the environmental protection facilities and the principal part of the construction project must be designed, constructed and put into operation simultaneously. During the design, construction and environmental management of the construction project, you must comply with all ecological and environmental protection requirements set forth in the Report, to ensure the discharge of all kinds of pollutants meets the applicable standards. In addition, you shall take the following actions: 1. A rainwater-sewage diversion and clean water-sewage separation system shall be implemented at the plant area. Wastewater and domestic sewage from the steam generators of the project shall be discharged to the Xudong Water Purification Plant in accordance with Grade III standards set out in Table 4 of the Integrated Wastewater Discharge Standard (GB8978-1996), where the discharge of ammonia nitrogen, total phosphorus, and total nitrogen shall comply with Grade B standards set out in Table 1 of the Wastewater Quality Standards for Discharge to Municipal Sewers (GB/T31962-2015). 2. The waste gas pollutant collection and treatment measures proposed in the Report must be strictly implemented. For the waste gases generated from RTO incineration in the project, the emission of particulate matters, SO₂, NO_x, non-methane hydrocarbon and xylene shall comply with the standards set out in Table 1 of the Integrated Emission Standard for Air Pollutants of Jiangsu Province (DB32/4041-2021); the odor concentration shall comply with the Emission Standards for Odor Pollutants (GB14554-1993); and the emission of isopropanol shall comply with the standards for Category C substances set out in Appendix A.4 of the Integrated Emission Standard for Air
--	--	--	--	--	--

					Pollutants of Shanghai (DB31/933-2015). For the waste gases generated from the steam generators, the emission of particulate matters, SO₂, NO_x and flue gas blackness shall comply with the standards for gas-fired boilers set out in Table 3 of the Emission Standard of Air Pollutants for Boilers (GB13271-2014) (where the emission of NO_x shall not exceed the limit of 50 mg/m³ specified in the Yangtze River Delta Action Plan for Comprehensive Control of Air Pollutants in Autumn and Winter 2019-2020). For the waste gases generated from the combustion equipment, the emission of particulate matters, SO₂ and NO_x shall comply with the standards set out in Table 1 of the Emission Standard of Air Pollutants for Industrial Kilns of Jiangsu Province (DB32/3728-2019). The fugitive emission of non-methane hydrocarbon from the factory boundary shall comply with the standards set out in Table 2 of the Integrated Emission Standard for Air Pollutants of Jiangsu Province (DB32/4041-2021). The fugitive emission of waste gas pollutants, including SO₂, NO_x, particulate matter, non-methane hydrocarbon and xylene, from the factory boundary shall comply with the standards set out in Table 3 of the Integrated Emission Standard for Air Pollutants of Jiangsu Province (DB32/4041-2021). The fugitive emission of odor shall comply with the standards set out in Table 1 of the Emission Standards for Odor Pollutants (GB14554-1993). Operating condition monitors and online VOC monitors shall be installed, and connected with the network of the Bureau of Ecology and Environment. 3. Effective noise reduction and vibration control measures shall be taken to ensure that noise emitted from the boundary of the project complies with Category 3 standards set forth in the Emission Standard for Industrial Enterprises Noise at Boundary (GB12348-2008) (daytime ≤ 65 dB(A); nighttime ≤ 55 dB(A)). 4. The project owner shall adopt all solid waste pollution prevention and control measures proposed in the Report, and collect and dispose of domestic wastes, non-hazardous industrial solid wastes and hazardous wastes separately. Domestic wastes shall be sent to the places designated by the local government for disposal, and shall not be
--	--	--	--	--	--

					dumped or piled at will. Hazardous wastes generated by the project shall be stored, transferred, transported and disposed of in accordance with relevant national regulations. Hazardous wastes shall be managed in accordance with the Technical Specifications for Collection, Storage and Transportation of Hazardous Waste (HJ2025-2012) and the Standard for Pollution Control on Hazardous Waste Storage (GB18597-2001, including its 2013 amendment). The discharge of non-hazardous industrial solid wastes shall comply with the Standard for Pollution Control on the Non-Hazardous Industrial Solid Waste Storage and Landfill (GB18599-2020). 5. After the implementation of the project, the project owner shall comply with the 100-meter sanitary protection distance from the workshop boundary as proposed in the environmental impact assessment document. There isn't any residential or other sensitive receptor within this range at present. In the future, no environmentally sensitive receptor, such as residential property, shall be constructed within this sanitary protection distance. 6. You shall take effective environmental risk prevention and emergency response measures, formulate a response plan for environmental emergencies, and file it with us, in order to prevent all kinds of pollution incidents. 7. The discharge outlets shall be deployed in accordance with the Administrative Measures of Jiangsu Province for the Deployment and Regulation of Pollution Discharge Outlets (Su Huan Kong [1997] No. 122). Monitoring and sampling ports and environmental protection signage shall be installed at all pollutant discharge outlets. You are required to actively promote the concept of circular economy, adopt clean production measures, and implement the ISO14000 standards. 8. Where the design, installation and operation of environmental pollution control facilities involve workplace safety, you shall comply with the relevant design and operational specifications and the requirements of competent authorities. You shall identify, manage and control safety risks of environmental pollution control facilities, improve the internal reliable operation and responsibility system for pollution prevention and control facilities, construct environmental pollution control facilities
--	--	--	--	--	--

						in accordance with the applicable standards and specifications, and ensure their safe, stable and effective operation. IV. According to the regional total volume balance plan, after the implementation of the project, the preliminarily permitted pollutant discharge volumes are as follows: wastewater pollutants (assessed based on connection pipelines; the project): wastewater: wastewater volume $\leq 3,600$ t/a; COD ≤ 1.02 t/a; SS ≤ 0.78 t/a; ammonia nitrogen ≤ 0.072 t/a; total phosphorus ≤ 0.01 t/a; waste gas pollutants (the project): organized emissions: non-methane hydrocarbon ≤ 0.577 t/a; xylene ≤ 0.1614 t/a; isopropanol ≤ 0.1614 t/a; SO₂ ≤ 0.3548 t/a; NO_x ≤ 1.4077 t/a; particulate matters ≤ 0.2129 t/a; fugitive emissions: non-methane hydrocarbon ≤ 0.326 t/a; xylene ≤ 0.066 t/a; isopropanol ≤ 0.066 t/a. The finally permitted pollutant discharge volumes shall be set forth in the pollutant discharge permit. V. You shall strictly fulfill your principal responsibility for ecological and environmental protection, and be responsible for the content and conclusion of the Report. VI. You shall complete the final acceptance procedures for the environmental protection facilities in accordance with the Interim Measures for Environmental Protection Acceptance of Construction Projects.
4	Su Gao Xin Zhu Jian Xiao Yan Zi [2022] No. 0084	Other permission	September 28, 2022	December 31, 2099	Bureau of Housing and Development of Suzhou New District (Huqiu District)	Fire protection acceptance opinion for special construction project
5			July 29, 2021	December 31, 2099	State Administration of Tax Suzhou New District Office	On July 29, 2021, we accepted the application for tax administrative permission regarding the maximum amount of special value-added tax invoices issued through the value-added tax control system submitted by you on the same day. After examination of your application, we hereby decide to grant this tax administrative permission to you pursuant to Article 38 Paragraph 1 of the Administrative License Law of the People's Republic of China.

6	(Suzhou Shui Xin) Xu Zhun Zi [2021] No. 7883	Decision to Grant Tax Administrative Permission	July 29, 2021	December 31, 2099	State Administration of Tax Suzhou New District Office	On July 29, 2021, we accepted the application for tax administrative permission regarding the maximum amount of special value-added tax invoices issued through the value-added tax control system submitted by you on the same day. After examination of your application, we hereby decide to grant this tax administrative permission to you pursuant to Article 38 Paragraph 1 of the Administrative License Law of the People's Republic of China.
7	(Suzhou Shui Xin) Xu Zhun Zi [2021] No. 7883	Decision to Grant Tax Administrative Permission	July 29, 2021	December 31, 2099	State Administration of Tax Suzhou New District Office	On July 29, 2021, we accepted the application for tax administrative permission regarding the maximum amount of special value-added tax invoices issued through the value-added tax control system submitted by you on the same day. 8	Su Gao Xin Zhu Jian Xiao Yan Zi [2022] No. 0017	Fire protection acceptance opinion for special construction project	April 6, 2022	December 31, 2099	Bureau of Housing and Development of Suzhou New District (Huqiu District)	Fire protection acceptance opinion for special construction project
9			May 10, 2024	December 31, 2099	Suzhou New District Management Committee	I. The project is located at Building C, Weige Industrial Park, 122 Yong'an Road, Xushuguan Economic and Technological Development Zone, Suzhou New District, and is designed to produce 1,500,000 m ² of intelligent electrochromic films per year. II. According to the conclusion of the Report and the technical assessment report (Su Ying Ping Gu [2023] No. 1205) issued by Suzhou Hongyu Environment Technology Co., Ltd. (person in charge of preparing the Report: TIAN Rong, whose professional qualification certificate number is 2015035320352015320501000032) at your request, the implementation of the project will have certain adverse impact on the ecological environment, but such adverse environmental impact can be mitigated and controlled from the perspective of ecological and environmental protection, to the extent that

all necessary measures are effectively adopted to prevent and control pollutions and environmental risks, and ensure the discharge of all kinds of pollutants constantly meets the applicable standards. Therefore, in principle, we consent to the overall conclusion on environmental impact assessment, and proposed ecological and environmental protection measures set forth in the Report. III. During the construction of the project, the “Three Simultaneities” system must be implemented strictly, i.e. the environmental protection facilities and the principal part of the construction project must be designed, constructed and put into operation simultaneously. During the design, construction and environmental management of the construction project, you must comply with all ecological and environmental protection requirements set forth in the Report, to ensure the discharge of all kinds of pollutants meets the applicable standards. In addition, you shall take the following actions: 1. A rainwater-sewage diversion and clean water-sewage separation system shall be implemented at the plant area. Domestic sewage and process wastewater not containing ammonia and phosphorus shall be discharged to the Suzhou Xudong Water Purification Plant through pipelines in accordance with indirect discharge standards set out in Table 1 of the Discharge Standard of Water Pollutants for Electronic Industry (GB39731-2020). 2. The waste gas pollutant collection and treatment measures proposed in the Report must be strictly implemented, to ensure the emissions meet the applicable standards. The emission of benzene derivatives, non-methane hydrocarbon, particulate matters, SO₂ and NO_x from DA001 exhaust pipes shall comply with the standards set out in Tables 1 and 2 of the Emission Standard of Air Pollutants for Industrial Coating Process of Jiangsu Province (DB32/4439-2022). The emission of xylene shall comply with the standards set out in Table 1 of the Integrated Emission Standard for Air Pollutants of Jiangsu Province (DB32/4041-2021). The odor concentration shall comply with the standards set out in Table 2 of the Emission Standards for Odor Pollutants (GB14554-1993). The emission of isopropanol shall comply with the

					standards for Category C substances set out in Appendix A.4 of the Integrated Emission Standard for Air Pollutants of Shanghai (DB31/933-2015). The emission of particulate matters, SO₂, NO_x and flue gas blackness from DA002 exhaust pipes shall comply with the standards set out in Table 1 of the Emission Standard of Air Pollutants for Boilers of Jiangsu Province (DB32/4385-2022). The emission of particulate matters, SO₂, NO_x and flue gas blackness from DA003 exhaust pipes shall comply with the standards set out in Table 1 of the Emission Standard of Air Pollutants for Industrial Furnaces and Kilns of Jiangsu Province (DB32/3728-2020). The fugitive emission of non-methane hydrocarbon and xylene from the factory boundary shall comply with the standards set out in Table 3 of the Integrated Emission Standard for Air Pollutants of Jiangsu Province (DB32/4041-2021). The fugitive emission of odor from the factory boundary shall comply with the standards set out in Table 1 of the Emission Standards for Odor Pollutants (GB14554-1993). The fugitive emission of non-methane hydrocarbon within the factory shall comply with the standards set out in Table 2 of the Integrated Emission Standard for Air Pollutants of Jiangsu Province (DB32/4041-2021). Automatic monitors shall be installed to monitor non-methane hydrocarbon emitted from DA001 exhaust pipes, and connected with the network of the ecology and environment authority. 3. Effective noise reduction and vibration control measures shall be taken to ensure that noise emitted from the boundary of the project complies with Category 3 standards set forth in the Emission Standard for Industrial Enterprises Noise at Boundary (GB12348-2008) (daytime ≤ 65 dB(A); nighttime ≤ 55 dB(A)). 4. The project owner shall adopt all solid waste pollution prevention and control measures proposed in the Report, and collect and dispose of domestic wastes, non-hazardous industrial solid wastes and hazardous wastes separately. Domestic wastes shall be sent to the places designated by the local government for disposal, and shall not be dumped or piled at will. Hazardous wastes shall be managed in accordance with the Technical Specifications for Collection, Storage and Transportation of Hazardous Waste (HJ2025-2012) and the
--	--	--	--	--	---

					Standard for Pollution Control on Hazardous Waste Storage (GB18597-2023). 5. After the implementation of the project, the project owner shall comply with the 100-meter sanitary protection distance from the workshop boundary as proposed in the environmental impact assessment document. There isn't any residential or other sensitive receptor within this range at present. In the future, no environmentally sensitive receptor such as residential property shall be constructed within this sanitary protection distance. 6. You shall take effective environmental risk prevention and emergency response measures, formulate a response plan for environmental emergencies, and file it with the Bureau of Ecology and Environment of Suzhou New District, in order to prevent all kinds of pollution incidents. 7. You shall implement the environment monitoring system according to the requirements of the Report, prepare a self-monitoring plan and conduct monitoring in accordance with the Self-monitoring Technology Guidelines for Pollution Sources – Coating (HJ1086-2020), and keep the monitoring results and related data for reference. The discharge outlets shall be deployed in accordance with the Administrative Measures of Jiangsu Province for the Deployment and Regulation of Pollution Discharge Outlets (Su Huan Kong [1997] No. 122). Monitoring and sampling ports and environmental protection signage shall be installed at all pollutant discharge outlets. 8. Where the general layout plan in project design, construction and production, and installation and use of major process equipment, storage and transportation facilities, utility and auxiliary facilities, and pollution prevention and control facilities involve workplace safety, you shall comply with the relevant design and operational specifications and the requirements of competent authorities. You shall identify, manage and control safety risks of major environmental pollution control facilities, improve the internal reliable operation and responsibility system for pollution prevention and control facilities, construct environmental pollution control facilities in accordance with the applicable standards and specifications, and ensure their safe, stable and effective operation.
--	--	--	--	--	---

						IV. According to the regional total volume balance plan, after the implementation of the project, the preliminarily permitted pollutant discharge volumes are as follows: waste gas pollutants (the project/entire factory): organized emission of volatile organics: non-methane hydrocarbon $\leq 1.1684/1.7454\text{t/a}$; particulate matters $\leq 0.2662/0.4791\text{t/a}$; $\text{SO}_2 \leq 1.6488/2.0036\text{t/a}$; $\text{NO}_x \leq 0.3597/1.7674\text{t/a}$; fugitive emission of volatile organics: non-methane hydrocarbon $\leq 0.5415/0.8675\text{t/a}$; wastewater pollutants (assessed based on connection pipelines; the project/entire factory): domestic sewage: volume $\leq 1440/3840\text{t/a}$; COD $\leq 0.576/1.536\text{t/a}$; ammonia nitrogen $\leq 0.0432/0.1152\text{t/a}$; total nitrogen $\leq 0.1008/0.1008\text{t/a}$; total phosphorus $\leq 0.0072/0.0172\text{t/a}$; process wastewater: volume $\leq 1551.6/2751.6\text{t/a}$; COD $\leq 0.07758/0.13758\text{t/a}$. The finally permitted pollutant discharge volumes shall be set forth in the pollutant discharge permit. V. You shall strictly fulfill your principal responsibility for ecological and environmental protection, and be responsible for the content and conclusion of the Report.
